The fundamental answer is no, it is not possible to generate AM where the baseband signal is a pure 20 kHz sinewave and Fc<20kHz. The reason is that the modulated waveform consists of the sum of a sinewave at Fc, a sinewave at Fc+20kHz, and a sinewave at Fc-20kHz. If Fc<20kHz then one of the components becomes a "negative" frequency. So the carrier must be greater than the baseband signal to prevent this.

It is conceivable that you could make Fc a miniscule number higher than 20kHz. However, if you want to radiate the signal efficiently, you will need an antenna that is miles long. That is why most radios operate with carrier frequencies much higher than the audio range. Antennas become much more practical at frequencies in the MHz range.

You might enjoy a good book that provides fundamentals of electronics and radio. Pick up a copy of the ARRL Handbook (www.arrl.org), for example. That should help you pick up some of these concepts.

In AM, isn't the carrier the signal which always maintains a constant
frequency and only varies by amplitude?

If a carrier signal varies by anything other than just amplitude, then
it isn't AM. Right?

Let logic be your guide, again. As was pointed out earlier, the voice freqs which modulate the carrier will cause a variance in freq (a small fm component.)

In fm, it is not unusual for a small "amplitude modulation" to be generated, as the varying/spanning of freq(s) is caused by the modulation, some changes in fm carrier can be generated.

In an imperfect world, nothing is "perfect."

You really are clueless. The carrier does NOT vary in amplitude. If it did, that would be modulating the carrier, which is the job of the modulator, not whatever is producing the carrier. You could have two modulators in series, that would make the circuit overly complicated. Please re-read my highly simplified previous explanation about the symmetry of the AM multiplier (mixer) input ports until it's absorbed and understood by your porous brain.

Incidentally, the reason I keep using the term "multiplier (mixer)" is to avoid confusion with a harmonic multiplier. An AM modulator is a mixer, not a harmonic multiplier.

Also, the carrier might remain constant frequency, for a given FCC channel assignment, but the modulation is all over the place. For example, your voice goes from 300 to 3000Hz, all of which is fed to the modulator for digestion.

Conventional TV is VSB (visidual side band) which is a form of AM with one of the two side bands partially removed, usually by filtering. There's a carrier 1.25MHz offset for the video, another carrier 4.5Mhz offset for the audio, and whatever else they can throw in for low speed data. Two more more carriers are required for TV+audio.

If you want to get really high-techy, the new digital modes (DRM, iBiquity, HD Radio, etc) all have multiple carriers, each of which is modulated individually. Same with various OFDM modes, which have multiple carriers, individually modulated and positioned orthogonally from each other to prevent mutual interference from adjacent modulated carriers.

>If a carrier signal varies by anything other than just amplitude, then
>it isn't AM. Right?

Wrong. The carrier can also vary, such as in a sweep generator or jammer. It's not commonly done but it's possible. Want to obliterate the entire AM broadcast band? No problem. Just sweep the carrier from 530KHz to 1650KHz, while modulating the 300 to 3000Hz audio with a rendition of your incoherent ranting.

By the way, you're welcome.

Essentially correct. The sidebands either side of the central carrier wave
contain the modulation information.

If the carrier wave were to shift in frequency then that would be frequency
modulation.

Before you ask, yes it is possible to have an AM signal modulating an FM one
and several other wonderful combinations involving phase transformations,
variable pulse widths and sideband(s) only. It is all detailed in the ARRL
Handbook, RSGB Handbook and many other prestigious publications.

Exactly. The modulator signal modulates the carrier wave. If there is no modulator signal, then the carrier does not vary by amplitude or by anything.

One poster stated that the signal with the higher-frequency is automatically the carrier wave while the signal with the lower-frequency is automatically the modulator wave. This is not true. What I was trying to say is that an AM radio carrier wave cannot vary significantly by anything other than its amplitude [though, as one poster pointed out, the AM carrier can experience extremely-negligible variations in frequency]. If an AM radio signal has that restriction, it is the carrier wave. If an AM radio signal does not have that restriction, then it is the modulator wave. This is true, even if the AM carrier wave is of a lower-frequency than the modulator wave. That's what I was trying to say.

In AM radio, determining which is the carrier wave and which is the modulator wave is not by which has the higher frequency but rather by which has the restriction that I stated.

If there is no modulator signal, then no carrier signal of any type [AM, FM, etc.] will vary by any quality [frequency, amplitude, phase, etc.]

No! The Carrier amplitude is constant. Sidebands are generated in the
modulation process. At 100% modulation, each sideband has 25% as much power
as the Carrier. The sideband signals vary in amplitude, following the
modulation signal.

This will not happen in a properly designed transmitter. It is not a characteristic of AM.

You are getting far afield of classical AM, which is the subject of Radium's post. He is confused and you aren't helping.

I thought their timing was a bit off. I have feeling they actually wanted the 'bombs' to go off ten seconds into the new Prime Minister's reign.

Must maintain the threat so a complete change of government direction isn't asked for or demanded by the population.

It's a complete farce and seen through by the majority of the English people.

You are hearing the effects of the sidebands, not the Carrier.

In a properly designed transmitter the Carrier amplitude does not change with modulation. I have better tools than FM receivers to prove that fact and theory agree for AM.

I misunderstood the statement that "It only applies to the Northern Hemisphere". The brain kept telling me that the whole planet is closer to the Sun in winter, not just the Northern half. The distance the planet is closer is far greater than the amount given by the precession.

Brilliant. Yes, if there is no signal input, there's no change in
output.

Incidentally, in an AM system, the carrier does NOT change. You can
see that on a spectrum analyzer. Modulate all you want and the
carrier stays put at 50% of the total power output. The rest of the
power is split between the upper and lower side bands. If there is no
modulation input, then the side bands disappear, but the carrier just
stays there.

As someone mentioned, there is usually some residual FM on the carrier
usually caused by sloppy power supply regulation. Also, some
synthesizer noise. A well designed AM broadcast transmitter doesn't
have much of this junk present. The problem is that the FM that
appears on the carrier also appears on all the side bands. It doesn't
hurt if the carrier has a little residual FM, but any such junk on the
sidebands will result in a substantial increase in audible noise by
mixing with the audio.

>One poster stated that the signal with the higher-frequency is
>automatically the carrier wave while the signal with the lower-

That was me.

>This is not true.

Prove it. I explained how it works and why quite adequately. I
didn't even need to resort to formulas and calculations. The
multiplier (mixer) modulator inputs are symmetrical and identical.
Therefore the inputs are also symmetrical and indistinguishable. I
also provided a simple audio test you can do in your spare time to

demonstrate how it works.

Now, convince me that the multiplier (mixer) waveform would be
different depending on which input was the carrier or modulation.

I give up. What you've done is created a word salad. That's where
you have a mess of buzzwords, shredded together, mixed with some
window dressing, and served in a manner to imply that you have a clue
what you're disgorging. Even the most basic concepts are not sinking
in. You've also ignored multiple suggestions to read some very fine
sources on how RF and modulation works. Open book, insert face, and
come back when you have a clue as to the basics.

>In AM radio, determining which is the carrier wave and which is the
>modulator wave is not by which has the higher frequency but rather by

Wrong. With AM it's easy. The higher frequency is always the
carrier. Can you give me a diagram or a commonly used communications
system where the reverse might be true? I can't.

The telephone does not use either AM or FM. It is simply the
electrical equivalent of the sound that gets into the microphone. You
input a 1 KHz tone into the microphone, telephone lines will carry a 1
KHz AC current to the destination. The louder the sound into the
microphone, the stronger the amperage in the telephone lines.

So what? You implied or inferred that what was heard from the FM radio was caused by the AM Carrier. Leave out the Carrier and you will hear the same thing.

It is important that we not confuse a person new to electronics by the type of inane points you make. It doesn't matter a whit if someone's AM transmitter Carrier shifts on power peaks due to poor regulation. It has nothing to do with "AM" and everything to do with poor design.

Side issues don't help the new folks.

Good for you for catching that one. The effect of microphone current has
noting at all to do with AM.

If anyone needs any information on the SDR-IQ or SDR-14 let me know. I
have both of them running here side by side with an IC-R9000, TS2000
and an IC-R8500. Not sure about what birdies people are talking about.
All of the birdies are in the range of -90 to -100 dBm. My TS-2000
has birdies that show up S9 on the meter. I guess a lot of people are
jumping to the conclusion that because it is simple on the front end,
it has to perform poorly. The analog to digital converters used in
these radios have equivalent IP3s of greater than 45 dBm. Also, there
is not one signal that I cannot hear on the SDR-14 or SDR-IQ that I
can hear on any of my other radios.

In the old T carrier (before 24 channel digital T1) carrier, each telephone
conversation was modulated onto a low frequency radio frequency AM signal
ranging from (and don't quote me as its been over thirty years since I
worked T spans) 50 KC to 200 KC. Very similar in principle to the 5 kc wide
AM radio station signals on the 530 kHz to 1700 kHz AM broadcast band.

On a side note, its actually voltage modulation towards the subscribe and current modulation back to the central office. The earpiece is a high impedance (2,000 ohm) device that responds to voltage variations. The carbon microphone element 220 to 200 ohms modulates the talk battery current.

Argh, that brings back fond nightmares of Ma Bell. 4Hz per voice
channel with FDM (frequency division mux). Most were FM systems, but
there were some AM implimentations (to avoid patent infringement).
Later, there were SSB systems that doubled the number of channels.

Band allocations and time zone conversions for the USA. Includes broadcast
bands used outside the USA. For multi-use bands, primary usage is shown.
Some stations operate outside official bands. Information is from Oct 2005
FCC rules and Jan 2006 NTIA manual, see Chapter 4 of:
http://www.ntia.doc.gov/osmhome/redbook/redbook.html

Frequencies are in kHz. Usual spacing in shortwave broadcast bands is
5 kHz. Frequencies above 10000 kHz tend to propagate better during the day;
frequencies below 10000 kHz tend to propagate better at night.

Changes preceded by "|".

WARNINGS AND DISCLAIMERS

Connecting unapproved devices to phone lines may be illegal in your area.
Telephone lines present a potential shock hazard. Do not use this antenna
for transmitting. Use at your own risk.

INTRODUCTION

This article describes how to use a phone line as a shortwave receiving
antenna. Performance will vary depending on the kind of phone line you
have. Overhead lines usually make okay antennas, while underground lines
| usually don't. Phone lines carrying DSL service may be unsuitable because
| DSL operates over a wide spectrum. A phone line antenna will generally
pick up more power line noise than a dedicated antenna, so don't expect to
| use it for DX work. Nevertheless, I found that it outperformed the
| telescopic whip antennas built into many portables.

A reader sent in this suggestion: If you're concerned about connecting
the phone line directly to the receiver, try wrapping the phone cord
several times around the receiver's telescopic whip antenna instead.
Performance may not be as good as a direct connection, but it will
probably be better than the whip antenna by itself.

Someone else wrote asking about lightning protection. I haven't thought
much about it because thunderstorms are rare in my area. Most phone lines
have lightning arrestors on them where they enter the house, but the
lightning arrestors may pass enough energy during a lightning strike
damage a receiver. My suggestion is to disconnect the antenna when not in
use if you experience frequent thunderstorms.

HOW TO DO IT

The simplest connection is a single capacitor between the phone line and
receiver. The capacitor eliminates all phone line voltages, including
| ringing, so that they will not harm the receiver. The capacitor should
| be rated 250 volts or higher.

```
Phone line RF connector
red .01 uF center cond. / \
or o--------||-----------------------------|-o | To receiver
green \ /
50 ohm coax |
ground |
or o-----------------------------------------+
N.C. shield
```

N.C. = no connect. I originally connected the phone line ground (yellow wire) to this terminal, but reception was better without it (if you do this, play it safe and put a .01 uF capacitor in series). If another ground is available, you can connect it to this terminal.

If you are picking up local AM or FM radio stations on the shortwave bands, it is likely that your receiver is overloaded. Inexpensive and portable receivers usually lack the filtering needed to eliminate this interference, but you can make your own filters. Filters can also be
| purchased from shortwave dealers (see below for recommendations).

A high-pass filter can be used to remove signals below the shortwave bands. It rejects interference from local AM stations and presents a high impedance to the phone line at audio frequencies so that the phone line remains balanced.

A low-pass filter can be used to remove signals above the shortwave bands. It rejects interference from FM and TV stations, as well as VHF 2-way radio transmitters. If you use both filters, connect the output of the first filter to the input of the second (don't forget to connect their ground terminals together). It doesn't matter which filter is connected first.

These filters also work well with random wire antennas. Just connect the antenna in place of the phone line.

The filter(s) should be connected to the phone line in this manner:

```
Phone line RF connector
red -------- center cond. / \
or o----| |-------------------------|-o | To receiver
green | | \ /
| FILTER | 50 ohm coax |
ground | | |
or o----| |----------------------------+
N.C. -------- shield
```

```
| RECOMMENDED FILTERS

```

| Model 420 HF lowpass filter (30 MHz lowpass)

| If you have a random-wire antenna, the following unit will provide
| impedance matching and lightning protection (connect antenna to 450-ohm
| terminal):

FILTER PLANS

The original credit for the high-pass and low-pass filters goes to Paul Blumstein and John Shalamskas, respectively. Edited versions of their articles are included here:

Date: 09 Jan 91 00:54:08 GMT
From: paulb@harley.TTI.COM (Paul Blumstein)
Subject: BC Band Hi-Pass Filter

The following ascii-schematic diagram is a high pass filter that will filter out Broadcast Band (MW) stations. I found it a great boon to my shortwave listening since local MW stations overload my ATS-803A front end & appear in SW, especially with a long antenna.

If you remember my antenna saga, I went from 50 feet to 150 feet & had overload problems causing me to cut back to 50 feet. (Even at 50 feet, I still have some MW interference). I took the advice of Gary Coffman and looked up filters in the ARRL Handbook. With the filter in place, I intend to try to increase my antenna length again.

Anywho, here is the filter, for interested parties.

```
--------||---+----||-----+----||-----------
} }
{ {
} }
-------------+-----------+-----------------
```

The outer capacitors are 1500 pf ceramic disks.
The inner capacitor is 820 pf ceramic disk.
The squiggly things are coils (two total). Each one is 2.7 uh.
(a close value will do).

From: bill@videovax.tv.tek.com (William K. McFadden)
Subject: Re: BC Band Hi-Pass Filter

I built the filter that Paul Blumstein posted recently and measured it on a gain-phase analyzer. Here are its characteristics:

100 kHz -120dB
500 kHz -68dB

1000 kHz -38dB
1600 kHz -15dB
2100 kHz -3dB

The source and load impedances were 50 ohms. Because the filter has five elements, the attenuation is 30dB per octave. The measurements confirmed this.

This filter seems to be a good compromise between interference attenuation and passband response. There is very little attenuation in the 120m band and above. It could use a little more attenuation at the upper end of MW, which could be done with more stages or a higher cutoff frequency. Alternatively, you could build two of these filters and put them in series. (Since two 1500pF capacitors in series are really 750pF, you could eliminate one cap.)

Just for fun, I put 470 ohms in series with the input to see how the filter performed with an antenna mismatch. The response was:

100 kHz -105dB
500 kHz -60dB
1000 kHz -35dB
1600 kHz -15dB
2300 kHz -3dB

These figures are normalized to the passband response of -15dB, which is due to the impedance mismatch between the source and load and would have been there without the filter. Hence, the filter works almost as well in spite of the mismatch, which is good news to those who use long-wire antennas.

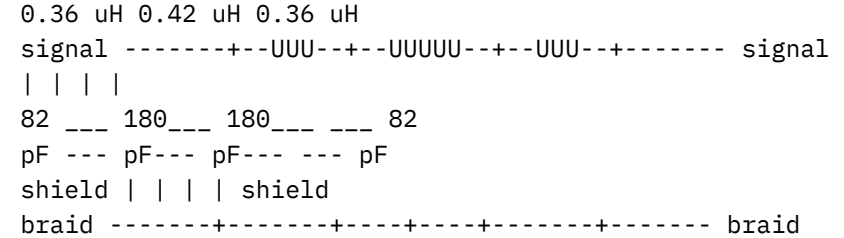
Subject: Construction of filters for SW reception

Several people have asked for construction details of the filters I built for my DX-440.

The high-pass filter helped some, but in my location the VHF/UHF broadcasters are also causing problems. So, I dug out the ARRL handbook and chose a 7-element Chebyshev low-pass design that is -3 dB at 35 MHz, -20 dB at 43 MHz, and -50 dB at 64 MHz (all calculated; it works well in practice!)

LOW-PASS FILTER (Rejects FM, TV, etc.)



|
chassis ground

I had to do a little more improvising at this point. I used .33 uH instead of .36, and .66 uH instead of .42, but it works fine.

The 5-lug terminal strips were perfect for these circuits, since there are 4 lugs plus a grounded lug. All "ground" connections go to the lug that is mounted to the chassis, and the other 4 lugs are used for each of the connections on the signal line. One terminal strip is used per filter. Since both filters were necessary to clean up the hash, I am going to put them both into one box when I get the time.

The proper way to connect them is in series, i.e.

signal in ------- filter 1 -------- filter 2 -------- signal out

There is no difference between ends. They are "bilateral" which means you can't possibly hook them up backwards. (In the above schematics, left and right ends are interchangeable.)

COIL WINDING

You can make the coils yourself using this formula:

L = 0.2 * B^2 * N^2 / (3B + 9A + 10C)

L is the inductance, in uH
A is the length of the coil, in inches
B is the mean diameter of the coil, in inches
C is the diameter of the wire, in inches
N is the number of turns

For small wire, you can assume C = 0.

That does bring back memories. I worked on STC built systems that used
AM modulation using Double-Balanced Modulators and depending on "Group"
classification used either the lower or upper sideband. Up to the 60
"voice" Ch's, we had some low Baud rate Modems on as well with the
signalling frequency disabled, the spectrum usage was the the same

however the next step up was 16 Supergroups using 60-4028KHz with Supergroup 2 not being translated. We also had a 30 Ch PCM link which worked very well apart from the "Regenerators" being susceptible to lightning.

I'm afraid that this is not correct. The 'laws of physics' don't
suddenly stop working if the carrier is lower than the modulating
frequency. However, there's no need to get into complicated mathematics
to illustrate this. Here is a simple example:

(a) If you modulate a 10MHz carrier with a 1MHz signal, you will produce
two new signals (the sidebands) at the difference frequency of 10 minus
1 = 9MHz, and the sum frequency of 10 plus 1 = 11MHz. So you have the
original carrier at 10MHz, and sideband signals at 9 and 11MHz (with a
balanced modulator - no carrier - only 9 and 11MHz).

(b) If you modulate a 1MHz carrier with a 10MHz signal, you will produce
two new signals (the sidebands) at the difference frequency of 1 minus
10 = minus 9MHz, and the sum frequency of 1 plus 10 = 11MHz. The
implication of the negative 'minus 9' MHz signal is that the phase of

the 9MHz signal is inverted, ie 180 degrees out-of-phase from 9MHz produced in (a). So you have the original carrier at 1MHz, and sidebands at 9 and 11MHz (again, with a balanced modulator - no carrier - only 9 and 11MHz).

The waveforms of the full composite AM signals of (a) and (b) will look quite different. The carriers are at different frequencies, and the phase of the 9MHz signal is inverted. However, with a double-balanced modulator, you will only have the 9 and 11MHz signal so, surprisingly, the resulting signals of (a) and (b) will look the same.

[Note that, in practice, many double-balanced modulators/mixers put loads of unwanted signals - mainly due the effects of harmonic mixing. However, the basic 'laws of physics' still apply.]

Finally, although I have spoken with great authority, when I get a chance I WILL be doing at test with a tobacco-tin double-balanced mixer, a couple of signal generators and a spectrum analyser - just to make sure that I'm not talking rubbish. In the meantime, I'm sure that some will correct me if I'm wrong.

Ian.

The O Carrier systems went from a low of about 32 kHz up to 164 kHz if I
remember right. And the mainstay of long-haul communications (L Carrier)
channel bank, was 64 - 108 kHz.

One of the most strange Carrier Systems I worked with was a 1930s vintage H
Carrier, one channel ssb "system" operating at about 12 kHz, and it ran
without automatic synchronization. That was in the 60s. We used it as a
maintenance channel in a voice over data configuration for a gap-filler
radar site. I've never seen a more extreme merging of old and new
technologies.

That has nothing to do with helping someone understand AM. It appears you are more interested in dumping your blog on this board, than providing something to clarify the real answers for an electronic novice.

I tried it. The clumps of dirt don't adhere to each other or the radio very well, so forming a continuous earthen ground is very unlikely.

Would a long hose tamped full of moist dirt give me a good connection to the outside world?

I figure I could use a long earth worm to connect the dirt in the hose to the terminal on the back of the set.

I have a feeling that the Angle the light hits the surface at has a far greater effect than a few piddly little million kilometers.

The angle of planet tilt added to the angle of the surface where you live can drastically lower the quantity of energy hitting the surface in the winter.

cosine(23 degrees tilt plus 50 degrees(where I live)) X available energy = about a third of what's available.

I'm not good with spherical math, but I'm guessing that distance would vary the energy per square unit in some ratio to a cube power...that percent reduction would be multiplied by whatever the angle cosine gives us.

I have to go get a sweater now...

I didn't read the link, as it has nothing to do with this string.

You posted to Radium's question about Amplitude Modulation, saying that on a telephone line, the DC voltage is the Carrier and the microphone current (or voltage if you prefer) is the modulation. Now THAT is un-pure crap and it is what I responded to and which you deleted in this post hoping to look better, which you don't.

I already conceded to your ignorance, so you really didn't need to post more, but thanks for the opportunity to help.

Thanks for your understanding.

Analog cells phones should stop using FM and should start using AM
between frequencies of 40,000 to 285,000 Hz.

As I learned recently, 40 KHz is the minimum radio frequency required
to coherently transmit/receive audio signals. The highest sound a
human can hear is 20 KHz. The radio-frequency used must be at least 2x
the intended frequency of the information being transmitted/received.

I chose 285 KHz to be the highest radio frequency for cell-phones
because it is roughly the highest-frequency categorized as "long wave"
radio.

The NRD-515 is desensitized below 1.6 MHz so what you observe might be

Good idea. The available spectrum between 40kHz and 285kHz is
245kHz wide, so at a little less than 3kHz per channel the maximum
number of channels available would be 82. That means that no more
than 82 people can be on the air at the same time.

Probably all over the world, to boot, what with those frequencies
being able to propagate over long distances.

That's probably a good thing, because with those 1875 meter long 1/4
wave whips at 40kHz and those 263 meter 1/4 wave whips at 285kHz on
the mobiles, any more people on the air than that would certainly
create a hazardous situation.

OK you stupid shit, I'm almost out of patience with your ignorance. I was hoping you might learn something, but I see that is unlikely.

AM is a process of frequency multiplication. Now you tell me where you think such multiplication takes place on a phone line, and I'll follow-uo by telling why you're full of crap.

Analog cell phones are going to be history in the US on Feb 18, 2008.
Japan killed off analog around June 1999, Korea in Jan 2000, most of
Europe in 1997, etc.

40KHz thru 285Khz? Great idea. Just one minor problem. A 1/4 wave
antenna at about 100Khz frequency is 750 meters long. That's going to
be a rather large antenna for literally dragging behind you. Maybe a
balloon? Maybe a loop like this one?
<http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=10850>
Of course propagation might be a problem, as it will only work at
night and you'll have to connect to a cell site on the opposite coast
for those frequencies to work. The customers can be ignored when they
complain about atmospheric static and noise.

Of course, 240KHz of usable bandwidth is much less than the hundreds
of MHz currently in use by cellular providers, so there will
substantially fewer users. Let's see.... there are 240 million
subscribers in the US. Your AM system can handle about 40 users (6KHz
channels), so your cell phone bill will only be 6 million times larger
than it is currently. Now do you see why the microwave bands are so
in demand for cellular.

>As I learned recently, 40 KHz is the minimum radio frequency required
>to coherently transmit/receive audio signals.

Coherently? I would be worried if you planned to incoherently
transmit/receive audio signals. Perhaps if you added 40KHz to your
word salad, it would make your blather more coherent. (Hint: Look
up the definition of coherent and then use it where appropriate).

Actually, you're close. 40KHz is the common frequency used by
ultrasonic TV remote controls. I've seen PWM modulation system using
a pair of these to act as a crude cordless phone (that doesn't require
FCC type certification). You could probably go down to 20KHz, but
then intermodulation products (mixes) between the audio and the
carrier will begin to be a problem. Congratulations, you got one
thing mostly correct.

>The highest sound a
>human can hear is 20 KHz.

Voice is from 300 to 3000Hz. You could probably get away with 300 to
2400Hz. If you're planning to transmitting AM hi-fi or data, then you
might need the 20KHz.

>The radio-frequency used must be at least 2x
>the intended frequency of the information being transmitted/received.

Ummm... no. You're apparently thinking of the Shannon rule for
information bandwidth:
<http://en.wikipedia.org/wiki/Nyquist%E2%80%93Shannon_sampling_theorem>
If your input audio is perhaps bandwidth limited to 3KHz, a 6KHz
carrier will not work. You'll get considerable mixing (aliasing) and
audio intermodulation crud. The carrier would need to be somewhat
higher in frequency as limited by whatever output RF filtering is
used.

>I chose 285 KHz to be the highest radio frequency for cell-phones

Nope. See details at:

Well, your math is correct. However, the so-called "atomic" wrist
watches receive their time signal from WWVB which transmits at 60kHz.

How do they get that 1250 meter long antenna (1/4 wave at 60 kHz)
inside that itty bitty wrist watch case? ;-)

Yes, but the original derranged rantings required that *AUDIO* be
used. This was suppose to be some kind of replacement for cellular.
None of the long wave time standards belch audio like the short wave
WWV stations.

However, these time code transmitters operate at RF frequencies as low
as 20KHz (mostly in Russia). See:
<http://www.npl.co.uk/time/measurement_time/time_trans.html> (2002)

>How do they get that 1250 meter long antenna (1/4 wave at 60 kHz)

Touche and good question. Most of the desktop variety have a ferrite
rod loaded with lots of fine wire. I have several like this, one with
an external rod. However, that's obviously not going to work in a
wristwatch unit. I don't have any idea what's inside or how the
antenna done, but I can guess(tm). Here's one way:
<http://www.leapsecond.com/pages/atomic-bill/>

The question has been asked before:
<http://www.eham.net/forums/Elmers/148090>
However, no real description of what's inside the wristwatch.

Going to the source:
<http://tf.nist.gov/stations/radioclocks.htm>
NIST Recommended Practices for WWVB receivers.
<http://tf.nist.gov/general/pdf/1976.pdf> (See section 8A)
"We recommend that RCC products should be sensitive enough
to successfully synchronize to signals from WWVB with a field
strength of 50 uV/m, if the signal to noise ratio exceeds 20 dB.
The RF bandwidth of the receiver should be narrow, typically
ï¿½10 Hz or less."
and:

"Wristwatch antennas should not be contained in the band,
so that RCC watch bands can be replaced in the same manner
as the bands of ordinary watches when they are damaged or
worn out."

So much for the antenna in the wrist band idea. So, the question is, what type of tiny antenna will work with such a field strength at 60KHz. I dug through the FCC ID web pile looking for an inside photo of Casio watch, but couldn't find anything. I'm gonna have to either break one open, and/or calculate the field strength of a very small ferrite rod antenna (later).

Okay. I now extremely insterested and frustrated about how the
wristwatch can be so tiny yet receive so longwave signals.

Its probably something those FBI/CIA bastards are going to keep secret
from us.

Sick government f---scums. USA citizens should turn against the FBI/
CIA and molest the f---ing s--- out of their colons using bubbas' c--
ks.

I want to know how such a tiny device can operate at such a long
wavelength. Unfortunately, that info is classified by the FBI/CIA, and
then won't let me or any USA citizen find out about it.

I am getting so pissed off right now.

I am so interested in this wristwatch question yet I am so angry about
it because the FBI/CIA won't let me know about it.

F=== the CIA/FBI, may they be raped by big bubbas.

I was in sec.1, I was all the way north from Cameron to Hue.
I stayed in Phu Bai in the "OLD" 8th RRS after they were gone.

I found a photo of the insides of a watch. See:
<http://tf.nist.gov/general/pdf/1877.pdf>
on page 11-12. It's a small 2cm internal rod antenna.

There are some ferrite rod antenna design notes on the Temic/C-Max
chips used on some receivers:
<http://www.c-max-time.com/downloads/search.php?search=CME6005>
<http://www.c-max-time.com/downloads/search.php?search=CME8000>

There's some on antenna matching here:
<http://www.c-max-time.com/downloads/getFile.php?id=437>

Watch antennas:
<http://www.c-max-time.com/products/productsOverview.php?catID=5>
See the photos of the various antennas. Too bad there's no specs.

I'll grind out the field strength numbers later. I've been living in
the microwave region for so long, that I'm having problems with LF
calcs.

The use of ferrites can be a big help to contain the RFI. Check out
W1HIS's break through
work on common mode chokes.
<www.yccc.org/Articles/W1HIS/CommonModeChokesW1HIS2006Apr06.pdf>
Like most USB accesories, the noise from the PC tends to migrate out
the
cables.

Dallas Lankford found that 6 turns of USB wound on 2 FT-42-83 reduced
the RFI to
acceptable levels. He is planning to add 6 (or more) FT-240-43 which
should eliminate
RFI.

Dallas didn't mention it. but I suspect similar treatment will be
needed on the antenna
port.

Ian,

I believe your analysis is correct. But if you expect to build a
receiver that uses a filter centered at 1 MHz with a BW of 20+ MHz to
recover a DSB AM signal, I don't believe that the DBM approach will
accomplish this. With your approach, you could filter out the sidebands
by centering a filter around 10 MHz (the baseband freq). This could be
used to recover the baseband 10 MHz signal. But the OP asked about AM
of a carrier at very low frequencies. Good explanation of what happens
when using a DBM, though.

-C

It's made that way below 1.599 on purpose, to prevent overloads from
strong local AMBC stations.

Put new batteries in the NDH-518, after letting it sit without any for a
while, and it should solve the problem..

What is responsible for that is not that AM somehow also
produces FM, but simply that the type of demodulator used
by the FM receiver in question will also demodulate AM to
a usable degree. Ditto the reverse (look up "slope detection"
for an example of how a very common AM demodulator
can also demodulate FM).

A ferrite loop that small for VLF must be very inefficient. I guess they used a high gain RF stage to make the VLF signal usable.

Your intuition is correct regarding the sun angle on the surface having the greatest influence on the seasonal changes, but it's not clear if the distance factor plays a role in long term climate changes. This is related to the orbital forcing theory previously mentioned. The sun produces about 1-KW/meter^2 above the earth's atmosphere. How much of that energy is available on the ground depends mainly on the angle of incidence, assuming it's a clear day.

No
But we need to keep a fuzzy eye on people who
are not mentally stable and would apear to harm them selves or others. right
or left
Vigglilence is the key word here. and reporting suspiscoius or out of the
ususal activity.
Becuase i travel by vehicle thru 3 states often things i saw out of place
ended up being a burglary,theft or vandalism
this same kind of vigilence goes along way towards stopping a terrorist.

What is that vehicle doing parked next to a utility site , what about that
package etc.

RHF,
This post does nothing to reduce the number of OT posts in a group, in fact it adds another one.

Also, since you generate a significant number of OT posts yourself, you have lost all credibility with respect to complaints about OT posts.

Also your habit of snipping one group from a post and replying to all other groups just adds a post, from you, with no added value to the thread whatsoever. It is just more noise in the other newsgroups.

The first step in reducing the garbage in the newsgroups would be to look at the number of useless posts you submit.

getting injured by a ''terrorist'' vs getting caught up in some fear

By the way, I looked at the wiki link you posted and I can see why you are misinformed by it; it's author was either simply not clear in his own mind, or he did not understand that the "undulations" on the telephone line DC voltage is NOT amplitude modulation in the multiplier sense. It is not AM as it is being discussed in this thread of Radium's original post. If you prefer the math proof, multiply the DC voltage frequency (0) by the audio frequency (pick a number between 200 and 3000 Hz), and the product is zero - No new frequencies are present. There's more to it than that but I probably already lost you.

Thanks. I downloaded that yesterday and got a file with no extension.
I eventually figured out it's a PDF file and renamed it.

The site also has a rather sketchy article on antenna design at:
<http://www.c-max-time.com/tech/antenna.php>
I also found the chip sensitivity somewhere at
0.5uv typical
0.8uv max
with a field strength range of:
15-20 uV/m using a 10mm x 60 mm rod.

I'm currently slogging through the NIST web pile trying to find the
historical or estimated field strengths for the left coast area.
<http://tf.nist.gov/timefreq/stations/lflibrary.htm>
Ah, foundit:
<http://tf.nist.gov/timefreq/general/pdf/1383.pdf>
Table 2.4 shows signal strength in San Diego varying from 180 uV/m to
1000 uV/m. Now all I need to do is figure out how much S/N ratio is
required at the receiver input to properly decode the time signals.

All the information needed is probably there, scattered among an
assortment of documents, but I'm at a loss on how to estimate the
actual field strength sensitivity given the rod antenna
specifications. The formula #1 at:
<http://www.c-max-time.com/tech/antenna.php>
has all the right parameters, but I keep getting insane results when I
try to plug in real and estimated values. Maybe some coffee will
help.

I'll work on it more during the next few daze. It should be easy
(famous last words). However, paying work comes first.

You're both wrong. It is VIRTUAL SIDEBAND because it isn't completely real and the other sideband which isn't virtual carries the missing high frequency modulation info. Once it gets into your second detector then it becomes real due to the laws of product modulation.

Next, you will be telling people that VGA doesn't stand for "virtual graphics array."

You allude to knowing how the sidebands come into being yet you cannot provide any clue that you really understand AM, and you continue to think microphone current in a telephone loop is the same thing. You're as FOS as they come.

I doubt you have fooled anyone on this board with your attempts to look like you know more than you really do.

the Mississippi Band of Choctaw Indians are having a runnoff election this week to vote for a new Indian Chief.
I done told that Lady book editor in Salem,Oregon about it at Oregon Magazine. www.oregonmag.com She is part Choctaw Indian, her uncle is from the Vicksburg, (there is a Vicksburg,Michigan too) Mississippi area.If you ever talk to her, ask her about Claudia Pulzer and Peg's Bottom and Larry Leornard.She will get a kick out of that and laugh her arse off.She has some grown kids who live in Saint Louis.The reason I wound up at Scott Air Force Base,Illinois is because I used to have a girlfriend who lived in Kirkwood. (suburb city of Saint Louis) She owned a pet Seal, throw a rubber ball at that Seal (his name was Oscar) and he would catch it on his nose every time and bark like dog.

Buddy, you speak about these people being "fooled", interesting term,
implying you consider them fools!

I doubt that is true, they have seen through you in a heartbeat, most,
probably long before now ... I imagine they are just embarrassed for

I 'm afraid I know nothing at all about radio's, my only radio is a LW/MW Ferguson tabletop kitchen radio.
I am offering this radio on here as this seems the best place to find a buyer who knows what it is exactly, I have done a google search on it and it sounds rather impressive.I am selling it on behalf of a neighbour, it was her husbands who sadly is no longer with us. It has been boxed in the cupboard for the past 6 years to my knowledge, so it has had very little use.
Anyway, here goes, It is in its original box and comes with the original manual, It says on he box- Sony ICF SW-77 Shortwave communications receiver. It comes complete with its own dedicated power supply and will also run on batteries.
I plugged in the power supply and switched on, Everything works fine as far as I can tell.
I can get loads of radio stations on Long wave/Medium wave and FM. I tried tuning around in the shortwave areas but got a little confused here to be honest, although there were literally hundreds of foreign stations coming through loud and clear.
I tried the "sync lock" whatever that is" and it seems to work fine, as it stated "sync lock"
I tried it on ssb and could not find much at all really although a friend suggested I try it on 5505 and a very load shannon volmet station came through very loud and clearly.
I'm afraid that is all I can tell you about it.
I do not have an ebay account, although I do have a paypal account (verified)
So we are open to offers on this radio.
if interested, please contact me on
rogers.emails@ntlworld.com
I am in the UK but would quite happily ship it anywhere
thanks for your time.
PS, it looks very complicated indeed, it has plenty of switches and buttons etc.
Photos are available on request.and if you live anywhere near Cardiff in the UK, you are more than welcome to come and try it out for yourself.
thanks

There was no crime commmited in the Valerie Plame case.

If there was no crime, there can't be obstruction of Justice.

Not so, Steve. Obstruction of Justice, just like perjury, is a crime in and
of itself. This includes obstructing an investigation, regardless of
whether that investigation turns up anything that can itself be charged
criminally. You can also be charged and convicted of perjury even if there
is no finding of guilty in a criminal trial. The act of lying to the court
is a crime in and of itself. For instance, let's say that you have a buddy
that is in court for an armed robbery. The cops ask you (and you are
subsequently asked in court, under oath) about your buddy's whereabouts that
night. You tell them he was with you all night. Subsequently, it is brought
out in court that he was really hanging out at the pool hall throwing back
shooters and playing nine-ball. Even if he is found to be not guilty of the
crime (by virtue of the fact that everyone from the pool hall that he
hustled testifies that he was there), you could still be charged with
perjury (which is exactly the same as obstruction of justice, except it's in
court instead of during the investigation).

Also, take note:

His conviction for obstruction stands, only the prison time has been removed. He still pays the substantial fine and is still a convicted felon with the associated societal stigma that go along with that.

If Bush had considered that no crime was committed (which he obviously did not) then he likely would have vacated the entire conviction and sentence.

Nope - VSB, as commonly used in broadcast television,
most definitely stands for "vestigial sideband" - a form of
AM in which the carrier and part of one sideband (in this
case, the lower sideband is the "vestigial" one) are retained,
along with one full sideband which carries the information
(in this case, the upper sideband, which carries the luminance
(Y) video information).

You're correct. *IF* there is an investigation into whether or not a
crime was committed.

But in this case, there was no crime, and that was known before the
investigation began.

The investigation sought to determine if Cheney had committed the
crime of releasing Valery Plame's identity as a CIA operative. It was

known before the investigation began that Valery Plame was not a COVERT CIA operative. Release of her name, in that case, is not a crime. This was known before a prosecutor was named.

So, 1) at the outset, it was known there was no crime.

Further, it was revealed while the trial was in progress, that the identity of the person who released Plame's identity as an employee of the CIA was Richard Armitage, and it was also revealed that this was known before a prosecutor was named.

2) It was known at the outset who had actually revealed Plame's identity.

There was no crime. So, there was nothing to investigate. And that was known before the investigation began.

So, in the case you describe, let's say you're friend is arrested for armed robbery of the First National Bank of East Weasel Penis. The cops know at the time of the arrest that there was no robbery, and that your friend wasn't involved. You can lie your ass off to the cops because there is no criminal investigation, because there was no crime, therefore there can't be obstruction of the investigation. Questions asked outside the courtroom are not under oath. Perjury doesn't apply.

Libby, who only claimed to have not remembered, when asked by the FBI, cannot be held for obstruction of justice, not only because it was never dispositively proven that he lied, but also because at the time of the investigation, he wasn't under oath and it was already known that there had been no crime.

Going back to your analogy: The First National Bank of East Weasel Penis is not robbed. The cops come to you asking about your buddy's alibi at the time the robbery didn't take place. You tell them he was on Mars blowing Bill Clinton's lawyer...perjury doesn't apply, because you're not under oath, and it's not obstruction, because the robbery the cops are investigating didn't take place, and they knew it before they asked the question. Nothing you say at that point will change the outcome of the investigation because it's already known there was no crime. So, there can't be obstruction.

If there HAD BEEN A ROBBERY, now you'd be guilty of obstruction.

But because there wasn't, and the cops know that, nothing you say can obstruct the investigation.

The FBI knew before they spoke to Libby, that Armitage had leaked the name. Anything that Libby said would not change that outcome. So, Libby could not obstruct the investigation. The FBI knew before they spoke to Libby that a crime had not been committed. Anything that Libby said would not change that outcome, either. So Libby could not obstruct the investigation.

Absent a crime in this case, there can be no obstruction, because all the facts were known before the investigation began.

Perjury doesn't apply.

Now, to respond to your comment about commutation while letting the conviction stand....that's for the appeals process to deal with. The President cannot vacate a conviction. He can commute a sentence. He can issue a pardon. But he cannot vacate a conviction. Only the appeals courts or Congress can do that.

To issue a pardon locks in Libby as 'Guilty as Charged,' and the appeals process to clear his name ends.

So, Bush can only commute the sentence and keep Libby out of prison while the appeals process works out the rest.

Which is what he did.

My old buddy was over here this morning.He brought back a heavy steel flat cart with heavy duty caster wheels on the cart that he cleaned up and painted and got the caster wheels working.I bought that heavy cart at the Beatty Street scrap iron yard about twenty five years ago.He used it to set the old one lunger gas engine on while he worked on his Railroad Speeder car.All these years the old cart sat out in the weather behind my old shed in my back yard.I told him, What am I going to do with it? it's yours, you can have it.

About thirty something years ago I gave him $35.00 for a Magna American (Magna American used to have a factory in Raymond,Mississippi.Raymond is eight miles Southwest of doggy's couch, doggy was born in Raymond, I bought her for 150.00 when she was an eight weeks old puppy.I went to night time welding classes at Raymond Juinor College on the G.I.Bill the winter of 1973 1974, of course I flirted with them cute gals over there too) garden tiller, it has a Briggs & Stratton gas engine on it.He mentioned something about the tiller.I said, lets get it out of the room with the concrete floor.He is interested in starting up a garden in his back yard.We dug the tiller out and I gave it to him.A bunch of years ago I bought five eight feet long grounding rods for one dollar each at the Goodwill store, I gave him three of the grounding rods.

Watch for the full pardon to be issued as Bush leaves office; he can't afford to issue the pardon too much before that, as it opens Cheney and others in his administration to legal problems.

The Catch-22 situation is that Bush *can't* pardon him yet. If a pardon is issued, Libby cannot claim 5th Amendment protection against self-incrimination if he is called to testify on anything connected with this matter. The last thing the current regime needs is for someone who can't plead the 5th sitting around out there. Without that protection in place, Scooter presents the very real potential of bringing down the entire house of cards. I understand that Mrs. Libby has stated that her husband will NOT go down alone. He has the goods on those folks, and holds all the cards now.

The commutation of the prison part of the sentence was really the only option open to Bush at this time, if he wants to be able to continue shielding the rest of his regime. His options were *very* limited, short of pulling a "Martha Mitchell" (if you;re too young to get the reference, Google is your friend!).

BAD,

The only Crime that "Scooter" Libby committed
was not 'recalling' what he had "Recalled" in prior
Testimony. And the Prosecutor called that a 'lie' :
As I 'recall' to the best of my Recollection.

Clearly "Scooter" Libby should have3 used the
Arkansas Alzhemer's Defense like Hillary Clinton
http://www.freerepublic.com/focus/f-news/1584592/posts
did Under Oath 250 Times :
http://prorev.com/legacy.htm
I don't remember
I don't know
I'm not sure
I have no idea
I don't believe so
I don't recall
I don't think so
I don't have any specific recollection
I have no recollection
Not to my knowledge
I just don't remember
I don't believe
I have no specific recollection
I might have
I don't have any recollection of that
I don't have a specific memory
I don't have any memory of that
I just can't say
I have no direct knowledge of that
I don't have any idea
Not that I recall
I don't believe I did
I can't remember
I can't say
I do not remember doing so
Not that I remember
I'm not aware
I honestly don't know
I don't believe that I did
I'm fairly sure
I have no other recollection
I'm not positive
I certainly don't think so
I don't really remember
I would have no way of remembering that
That's what I believe happened
To my knowledge, no
To the best of my knowledge
To the best of my memory
I honestly don't recall
I honestly don't remember
That's all I know
I don't have an independent recollection of that
I don't actually have an independent memory of that
As far as I know
I don't believe I ever did that

That's all I know about that
I'm just not sure
Nothing that I remember
I simply don't know
I would have no idea
I don't know anything about that
I don't have any direct knowledge of that
I just don't know
I really don't know
I can't deny that, I just -- I have no memory of that at all

Dear Sir / Mdm,

may i kindly enquire how much you will be charging for shipping
& handling charges for delivering the above item to Kuala Lumpur,
Malaysia via the least most expensive way (eg. Parcel Force or
Royal Mail International Signed For Surface Mail......)

moreover, would you kindly confirm whether the FM frequency range
of the above radio is from 87.5MHz to 108Mhz as some SW77 model
begins from 76Mhz to 108Mhz...

if you still have its User Manual it would even be much better
(ie. for verification by M'sian Customs Dept)..... reason being
my country, Malaysia, has an 'ancient' law that prohibits import
of transistor radio which is able to tune in from 68Mhz to 87Mhz
as that bandwidth is only use by the police for their communication..

your kind reply is highly appreciated before I place my bid....

best regards,

Alan Wong

PS - Can you accept payment via Paypal?

Hello,

I've posted a message to the DX398 Yahoo Group in regard on how to modify its RF Gain in order to have maximum attenuation, ie. zero gain, as i plan to perform the Rick's Sensitivity Mod...

However, no members have replied to my query and hence i've resorted to writing to this Group with the hope someone could help me out...

If you know how to go around in undertaking this RF Gain mod, i would be much humbled if you could share this knowledge with me and other members...

However, if don't, it is still okay but hopefully you could direct me to someone you know whom can guide me on the above mod...

Best Regards,

Alan Wong.

This isn't quite what you wanted, but it's food for thought.

http://mysite.verizon.net/vze20h45/radio/sangean/909mods.html

You should be able to intercept the signal before it gets to the radio.
A handy pin out of the antenna jack ia found on the above page:

I hope that gives you a start..

I was aware he is dead - such is the human condition that most
centennial celebrations of a creative person's works take place after
the person is dead.

You can import the Morphy-Richards DRM Radio from Gt. Britain. I
think that it's in that price range.

Bruce:

Sangean is listing one on their website Model # DRM40.
Universal Radio is going to be carrying it in the states,
just as soon as the FCC gives their blessing according to the Universal
Web page.
Sorry I don't have the URL handy, but you can Google use your favorite
search engine.

Try sci.electronics.design (I've crossposted this there) and post
any graphics you have to alt.binaries.schematics.electronic or post
a link to where you have them located.

You make some interesting comments, but I see only two outcomes, either:

a) he is a good soldier and keeps his mouth -tightly- shut or

b) his life expectancy suddenly becomes very short

But if you remove the half volt bias you put on the
100 kHz signal in the multiplier version, the results
look exactly like the summed version, so I suggest
that results are the same when a 4 quadrant multiplier
is used.

And since the original request was for a "1 MHz sine
wave whose amplitude is multiplied by a 0.1 MHz sine
wave" I think a 4 quadrant multiplier is in order.

210. Next Saturday is Anti-terrorist Patriots' Day

Mark Your Calendar For Next Saturday

As you may already know, it is a sin for a Muslim male to see any woman other than his wife naked, and that he must commit suicide if he does.

So next Saturday at 4 PM, Eastern Time all patriotic American women are asked to walk out of their house completely naked to help weed out any neighborhood terrorists.

Walking around your block for one hour is recommended for this anti-terrorist effort. Not only are you helping eradicate the terrorists, you're benefiting from a healthier lifestyle because it has been proven that walking is a great form of exercise.

All men are to position themselves in lawn chairs in front of their house to prove they are not Muslims and to demonstrate they think its okay to see nude women other than their wife and to show support for all patriotic American women.

Since Islam also does not approve of alcohol, a cold 6-pack at your side is further proof of your anti-Muslim sentiment.

The American government appreciates your efforts to root out terrorists and applauds your participation in this anti-terrorist activity.

God bless America.

If he's been pardoned, it's the same as having blanket immunity in this
matter. With just the commutation of the prison part of his sentence,
Bush is now able to hold the promise of a full pardon over his head
until the end of the term. Watch him then grant it as long as Scooter
has kept his mouth shut.

Check back here in January, 2009 and see if I've been proven correct.

(c) he keeps his mouth shut until January, 2009 and Bush gives him the
full pardon he's holding over his head right now. Once pardoned he can
go ahead and blow the lid off, since the impeachment threat is moot.

Ooops. I misspoke. They are not quite the same.

The spectrum is the same, but if you want to get exactly
the same result, the lower frequency needs a 90 degree
offset and the upper frequency needs a -90 degree offset.

And the amplitudes of the the sum and difference
frequencies need to be one half of the amplitude of
the frequencies being multiplied.

Just thought I'd ask you to make sure to post this info to the newsgroup if you find it. I bought a ATS909 from Rick that had the sensitivity mod back in 1999. It was incredibly sensitive on just the whip, outdoing many of my other receivers on external antennas. I sold it when I was in need of some cash, and I really regret not owning that receiver now. I hear that Rick is currently out of shortwave, so I'd love to try the modification on a DX398 I currently possess.

If you find it, let us know!

Thanks,

Mike

No, I'm no Menken. I'm not Mencken, either.

Mencken probably loved the USA also.

Think about that next time you bash people who don't think like your
your cookie cutter ideology dictates. The US would be a far better
country if the voters actually felt like Mencken.

That's right. They can't possibly be because the first instance
was multiplication and the second instance addition.

That makes no sense since the frequencies are different and,
consequently, the phase difference between the signals will be
constantly changing.

Oh, the irony....

You really should consider trying sobriety. It may even improve your
grammar and correct the apostrophe abuse. Do you even KNOW what
'possessive noun' means? You certainly don't know where to use one
correctly.

Respectfully, I think you are being naive. Even though the impeachment threat is over, the embarrassment of the many people involved would still be an issue.

Plus, don't forget that impeachment is -not- the "end-all, be all". I'm sure that for all the hanky-panky of this administration, that there would be plenty of *criminal* charges (that won't time-out in 2009) to go around if he "blows the lid off".

I would think that (b) above would still be a major concern of his.

Quite counter intuitive, I agree, but none-the-less true.
To convince myself, I once created an Excel spreadsheet
to demonstrate the fact.

It along with some other discussion and plots are available
here http://keith.dysart.googlepages.com/radio5

To get exactly the same results, if, at time t0, the phases
for the signals being multiplied together are 0, then at
time t0, the initial phases for the signals being added

must be 90 and -90.

OK, but that's just for the single slice in time where the circuit
reactances for both frequencies are complex conjugates, and cancel,
leaving only pure resistance for both signals to drive at that
instant.

It is very unfortunate. They should hold all centennial celebrations a
few decades earlier...just for the benefit of the recipients....

one is about 12 inches diameter.I left them sittin at the post.About 12
years ago, I saw a big Fender speaker at the Salvation Army thrift
store.They was asking $15.00 for the speaker.I went to a pawn shop on
Terry Road and I told the guy (Kevin) who owns that pawn shop about the
speaker.He said it's worth $15.00 even if it doesn't work.He jumped into
his car and went on over to the Salvation Army store.

It is definitely vestigial side band. There is a bandpass filter in
transmitter to get rid of much of it when the signal is generated, and
generally a tuned coaxial stub on the antenna to get rid most of the
rest of it.

Effectively NTSC television is single sideband with carrrier (while
SSB is technicall SSBSC, Single Side Band, Supressed Carrier, which is
considerably more difficult to generate and detect).

After you get done talking about modulation and sidebands, somebody might want to take a stab at explaining why, if you tune a receiver to the second harmonic (or any other harmonic) of a modulated carrier (AM or FM; makes no difference), the audio comes out sounding exactly as it does if you tune to the fundamental? That is, while the second harmonic of the carrier is twice the frequency of the fundamental, the sidebands

of the second harmonic are *not* located at twice the frequencies of the sidebands of the fundamental, but rather precisely as far from the second harmonic of the carrier as they are from the fundamental.

I can't speak to second harmonics of a received signal, though I can't think why they would be any different than an internal signal.. but:

When you frequency multiply and FM signal in a transmitter (As used to be done on most FM transmitters in the days before PLL came along), you not only multiplied the extant frequency, but the modulation swing as well. i.e. if you start with a 1 MHz FM modualated crystal oscillator, and manage to get 500 Hz swing from the crystal (using this only as a simple example), then if you double that signal's carrier frequency, you also double the FM swing to 1 KHz. Tripling it from there would give you a 6 MHz carrier with a 3 KHz swing, and so on.

Melvin Jay "Mel" Reynolds was a Democratic member
of the United States House of Representatives from the
State of Illinois.

In August 1994, he was indicted for having Sex with a
16-Year-Old Campaign Volunteer.

Convicted on 12 Counts of Sexual Assault, Obstruction
of Justice and Solicitation of Child Pornography.

U.S. President Bill Clinton give him a Commutation.

Fortunately he is Required to Register as a Sex Offender.

Martha Stewart wasn't found guilty of insider trading or even tried
for it - she was found guilty of obstruction of justice and lying to

For multiplying FM, yes, of course, this is exactly what happens. And as
it happens for FM, it must also happen for AM.

However, I feel that the subject of the effects of harmonics of an AM
signal needs to be investigated. I think what you hear depends on how
and where the harmonic is produced, and the characteristics of the
receiver.

In the good old days of AM, on those occasions when I listened to the
2nd harmonic of my transmissions, I got the impression that the quality
of the audio was not very good, and that the mod depth was lower than on
the fundamental.

Assuming that the signal is coming from a 'normal' AM transmitter, you could have two scenarios:

(a) In the first scenario, the signal is initially clean, but gets multiplied by two, along with the sidebands. [This may occur in the transmitter itself, or in the receiver, or in some external device.] In this case, the frequencies and bandwidth of the sidebands will be doubled (like FM multiplication). The signal should definitely be of poor quality (it should sound rather 'toppy'), but may still be fairly intelligible. If the bandwidth of the receiver is be insufficient to embrace the full (doubled) bandwidth of the signal, you will only hear the lower part of the audio spectrum. This will limit the toppiness, and the level will be rather low, but, in practice, the signal quality may be quite 'acceptable'.

(b) In the second scenario, the 2nd harmonic is effectively present BEFORE modulation, so it gets modulated along with the fundamental. In this case, the lower frequencies of sidebands of the 2nd harmonic will be 'normal', and the signal will sound normal.

In practice, both (a) and (b) probably occur together (certainly in the transmitter). Again, as the receiver will only select the lower part of the audio spectrum, what you hear might sound OK. I suspect that, if you 'off-tune' a bit, you will find a lot of sideband 'splash' either side of the signal.

It should not be difficult to set up a simulation of the above, and do some quantitative tests. Any volunteers?

Ian.

The CIA rolled back the date for lifting Plame's cover so it would include the date of the leak. How convenient. I wonder who got the CIA to do that? Perhaps someone who lately thinks he's not part of the executive branch.

You win. :)

When I conceived the problem I was thinking
cosines actually. In which case there are no
phase shifts to worry about in the result.

I also forgot the half amplitude factor.

While it might not be obvious, the two cases I
described are basically identical. And this
situation occurs in real life, i.e. in radio signals,
oceanography, and guitar tuning.

It follows from what is taught in high school
geometry.

cos(a) * cos(b) = 0.5 * (cos[a+b] + cos[a-b])

Basically: multiplying two sine waves is
the same as adding the (half amplitude)
sum and difference frequencies.

(For sines it is
sin(a) * sin(b) = 0.5 * (cos[a-b]-cos[a+b])
= 0.5 * (sin[a-b+90degrees] - sin[a+b+90degrees])
= 0.5 * (sin[a-b+90degrees] + sin[a+b-90degrees])
)

More likely, Joe Wilson, who is the one who started this stink in the
first place. And has that kind of access.

It was known at the outset that Richard Armitage was the leak.
HE was the one who released her name as a CIA employee.

This was known before the 'investigation' began.

Not that the facts have any relevance, here. This is a political game.
If it had been anyone not related to Cheney, the issue would have
quietly gone away, and no 'process crime' charges would have been filed.

Keep in mind that that when Wild Bill lied under oath, it was as a
sitting President and it was done to specifically deprive Paula Jones of
her day in Court...merits of her case to be decided. Further, he
suborned perjury; that is, he instructed members of his staff to lie
under oath as well. He lied to the press, he lied to his staff, he lied
to his cabinet, and he lied to the American people. And all of this was
specifically to deprive Paula Jones of her day in court, and then to
cover his own ass once the fit hit the shan.

Libby remembered a conversation differently than Tim Russert in a
matter to which all the facts were known before the investigation began.
Unlike the Clinton perjury, which was done during an attempt to
determine the facts of the pending case, Libby's testimony about the
conversation in question was moot...the facts were already
known...nothing he said could have changed the outcome of the
'investigation.' And Libby didn't claim or deny anything but that he
remembered a conversation differently that Tim Russert. He didn't
instruct anyone to lie. He didn't order his staff to lie. He simply

remembered a conversation differently than Tim Russert. The jury believed Russert. Let's not mention the volumes of pre trial press this issue got, which raises questions about the integrity of the jury pool. Let's instead focus on the conversation between Tim Russert and Libby.

Who here has not remembered a conversation differently than the correspondent? That the parties disagreed is not an indication that either party lied. Only that each remembered things differently. But the jury believed Russert.

No surprise, there. We all know that only Republicans lie, only Conservatives are rich, and there are no enemies on the Left.

This was a political maneuver. Something that started during the campaign for 2000 when the Algore campaign imitimated that, if elected, Bush's first act would be to finish what his Daddy didn't.

Remember also, when Plame's name first became an issue, the heated finger of accusation pointed first at GWB, himself. Pointed by Joe Wilson, who had an axe to grind from the outset. But, even at this early moment in this noise, it was already known that Richard Armitage was responsible. No matter, the politics demanded a head. They couldn't hang it on Bush, so the spotlight moved to Cheney. And eventually, they got someone in Cheney's office...for a process crime. A process crime to an investigation to which the facts had been determined before the investigation began. Nothing Libby could have said would change the fact that it was already known that Armitage was the leak. His process crime was for an investigation the outcome of which was already known.

So, Libby was charged for remembering a conversation differently than Tim Russert, in an investigation that was started after the facts were already known.

This was a political lynching. Nothing more.

Martha Stewart was found guilty of lying to investigators trying to determine if there had been a crime committed. There had not, but that wasn't known at the time of her questioning. What she said or didn't say would materially affect the outcome of the investigation. That's why it's a crime to lie.

Libby, however, was questioned after it was already known that Richard Armitage was the leak. Nothing from the investigation that would follow could be learned that would change that fact. Libby's process crime was committed during an 'investigation' that was begun after the facts which the investigation sought were already known.

Nothing Libby could have said to investigators would change the outcome of the investigation.

And Libby's process crime was only in remembering a fact differently than Tim Russert.

The jury believed Russert. Because, as we, all know, only Republicans lie.

Why can't you say what you mean? The disjointed rambling mess trying to pass itself off as a response adds nothing but confusion to the debate.

I'm not sure if you responded to the right posting or whether you actually know what hate means. I see no hate whatever in my message. I do see sorrow...

When did you decide that only Americans can be radicals? If that's true, it would certainly explain a lot of things going on around the world.

No, they aren't the same at all, they only appear to be the same before
they are examined. The two sidebands will not have the correct phase
relationship.

One could, temporarily, mistake the added combination for a full carrier
with independent sidebands, however.

If you start with, say, a 1 MHz carrier AM modulated at 1 KHz, tuning to
the second harmonic gives you a 2 MHz carrier AM modulated at 1 KHz; not
2 KHz as your "must also happen for AM" would suggest.

The beat you hear during guitar tuning is not modulation; there is no non-linear process involved (i.e. no multiplication).

This is really a very uneducated and unsophisticated view. What exactly
do you mean by the last statement? Back it up with data. Also, we are no

longer looking for WMD. They White House has already admitted they were wrong. What we are doing is trying to prop up the Iraqi military and current government to be able to take care of themselves while protecting the interests of the US, Israel, etc. If we were to leave now we would only have to return again. This is because Iraq is populated by a large number of uneducated tribal personalities that thrive on power and control and have absolutely no regard for democracy, life or law, other than Islamic law.

If you have not actually been there or talked at length with soldiers serving there, you are nothing more than a mouthpiece for the media. The media only feeds you a small portion of the whole story. Usually it is the portion that places a negative spin on our military and what we are doing there.

By the way, it is Cheney. Not Chainey.

Idiot.

I believe that will be the likely scenario for any AM transmitter
which uses plate modulation or a similar "high level modulation"
system. If the RF finals are running in a single-ended configuration
(rather than push-pull) even the unmodulated carrier is likely to have
a significant amount of second-harmonic distortion in it... and I'd
think that this would tend to grow worse as the audio peaks push the
finals up towards their maximum output power.

I had read a post from Chuck Rippel (of the R390A page) years ago that the Outer Banks or somewhere in that area is an excellent location for DXing.

Whoa. I thought you were smoking something but
my curiosity is piqued.
I tried shortwave stations and heard no harmonics.
But that could be blamed on propagation.
There is an AM station here at 1.21 MHz that is s9+20dB.
Tuned to 2.42 MHz. Nothing. Generally the lowest
harmonics should be strongest. Then I remembered
that many types of non-linearity favor odd harmonics.
Tuned to 3.63 MHz. Holy harmonics, batman.
There it was and the modulation was not multiplied!
Voices sounded normal pitch. When music was
played the pitch was the same on the original and
the harmonic.

One clue is that the effect comes and goes rather
abruptly. It seems to switch in and out rather
than fade in an out. Maybe the coming and going
is from switching the audio material source?

This is strange. If a signal is multiplied then the sidebands
should be multiplied too.
Maybe the carrier generator is generating a
harmonic and the harmonic is also being modulated
with the normal audio in the modulator.
But then that signal would have to make it through

the power amp and the antenna. Possible, but
why would it come and go?
Strange.

In short, the human auditory system is not linear.
It has a finite resolution bandwidth. It can't resolve
two tones separted by a few Hertz as two separate tones.
(But if they are separted by 100 Hz they can easily
be separated without hearing a beat.)

The same affect can be seen on a spectrum analyzer.
Give it two frequencies separated by 1 Hz. Set the
resolution bandwidth to 10 Hz. You'll see the peak
rise and fall at 1 Hz.

Interesting that you mention we are protecting the interests of Israel. I researched it and Israel is not part of the coalition and has no troops in Iraq. So, the question begs to be asked: Why are we spending U.S. dollars and more importantly, U.S. lives, to "protect *Israel's* interests"?

Also, have you considered that if we didn't trash a sovereign nation for no reason, we wouldn't have spend our dollars and our lives to "prop it up" as you say?

> If we were to leave now we would only
> have to return again.

Absolutely true! Let's give the administration full credit for creating the perfect storm: damned if we stay and damned if we leave. It seems unlikely that we can "win" because as we stay, an ever larger number of Iraqis truly hate us and view -us- as the occupiers and terrorists. If we leave, most likely a huge escalation in the current civil war and probably big-time instability in the Middle East. Stay or leave, it's The Perfect Storm!

> This is because Iraq is populated by a large number

Yeah, the nerve of those Islamic people, running their Islamic lives by Islamic law.

But again, you are absolutely correct! What you say above has been that way for over a *thousand* years. And we think we can change that in just 5 or 10 years? How naive of us. It's a damn shame the administration wasn't bright enough to realize that *before* they opened this can of worms... :-(

P.S. While you are at it, could you please explain -why- the Iraqis should "have 'regard' for democracy". Just because -we- like it and it seems to have worked for us for 250 years, their tribalism and Islamic law has worked for them for a thousand years. Hubris on our part? One size (democracy) fits all? Maybe they "have absolutely no regard for democracy, life or law, other than Islamic law" because it's THEIR

culture and it works for THEM. Unfortunately, we seem to be too arrogant to see that.

In lying to a grand jury he most certainly did something seriously wrong. Valerie Plame's employment status at the CIA is irrelevant to the question of whether he truthfully answered questions posed to him by the grand jury. We do have a dual standard of justice at work here.

George W. has likely reduced the republican candidate's chances of being elected in 2008 even lower than they are now.

Yeah, there's dumbass Liberal justice, and then there's REAL justice.

Here you are repeating what you already posted and restating it in the
hope that it will be understood. You are wasting your time. Some people
just reading this are not sharp enough. They can tie their shoes and
post to Usenet and so have deluded themselves into thinking that they
can process complex issues but they are incompetent.

Tell the clown you responded to go get himself a time machine, get a can of white paint, head down to Langley and paint over Plame's name in her parking space so she can be covert.

This case is a clear abuse of prosecutorial misconduct no better than the deal those Duke Lacrosse players got.

Patrick J. Fitzgerald should have his actions in this case reviewed. I think his actions rise to level of criminal prosecution not just misconduct. At the least he should be fired and disbarred.

Joseph C. Wilson should be brought up on perjury charges. He should be brought up on charges of treason for undermining the current administrations foreign policy.

Valerie Plame should have been fired and not allowed to quit her job. She should be brought up on perjury charges in the leak investigation, and lying about her husbands actions, and be brought up on charges of treason for being part of a plot with her husband undermining the foreign policy of the USA.

Joseph C. Wilson and his wife are a disgrace. They violated their oaths in their public office positions, violated the constitution of the United States, and conspired to act against the interests of this country.

There is no hope for people posting to that "AM electromagnetic wave"

Some people just refuse to behave and will abuse any resource to which

That's not true.

The human ear has a logarithmic amplitude response and the beat note
(the difference frequency) is generated there. The sum frequency is
too, but when unison is achieved it'll be at precisely twice the
frequency of either fundamental and won't be noticed.

But that is just not acceptable thinking for a public servant. If
Wilson and his wife found the actions of the administration so contrary
to their own political beliefs that they found themselves unable to
perform in the capacity their positions required of them they should
have resigned and and then made a public announcement about the reasons
for their resignations.

They had no business using the color of their positions in government
to further their own agenda, which was contrary to the policy of the
USA.

Yeh right, Wilson had the CIA back date the cancellation of her cover so it would look like she was *not* covert at the time of the leak. I guess he wanted to sabotoge his wife. You didn't even know about the CIA back dating Plame's cover did you. I wonder what else you don't know about the case. You've been well trained by the Bush spin machine.

Does anybody know which antenna I am talking about?

It fits inside a 8" x 1.25" piece of pvc pipe and half of the pc board
is the antenna. It uses a U310 fet and some bipolar following that.
Maybe a 2N5809. Stick it on a non-magnetic pole and the 12v supply is
in the house. I am looking for the link to it. A friend and I are
building them, but I left the documentation at my other QTH. If you
have any experience with it then I would like to hear what you think.

I'm also building the AMRAD active antenna, but the high dollar fets
aren't here yet.

When AM is correctly accomplished (a single voiceband signal is modulated onto a carrier via a non-linear process), at an envelope detector the two sidebands will be additive. But if you independe ntly place a carrier at frequency (c), another carrier at (c-1 khz) and another carrier at (c+ 1 kHz), the composite can look like an AM signal, but it is not, and only by the most extreme luck will the sidebands be additive at the detector. They would probably cycle between additive and subtractive since they have no real relationship and were not the result of amplitude modulation.

I think you are talking about one of Dallas Lankford's active
antennas.
<http://www.kongsfjord.no/>
Look under "The Dallas Files"

He has several different designs.

I think the one you are wanting is in the "Low Noise Active Antenna AC/
DC Power Supplies"
pdf.

Unless you have a world class receiver, the difference between the
simpler antenna
that uses affordable JFETs and the other will be minimal.

I would suggest you give serious though to building the dipole
version.

Much better IMD characteristics.

A peak detector is best understood in the time domain, try to create a
simple description in the frequency domain and you can only cause confusion
and incorrect conclusions.

There was no objective evidence in the case to prove he lied.
Recollections by Libby were at odds with other peoples (reporters)
recollections. All evidence was some persons recollection of
conversations and meetings. Other people that gave testimony in the
case were also at times inconsistent with previous statements that they
made so why were they not charged? Only Libby was charged with perjury.

I'll make the point one more time that Peter twice made, which will not
make a difference to people that make a carrying out BS'ing like
Edwardo a way of life, that the prosecution knew before the trial
started who disclosed Plame and her husbands treasonous behavior.

Doesn't make any difference to a BS artist does it.

There are plenty of people in all walks of life willing to pervert
justice in favor of their own selfish desires. If these people dominate
the process then our society will fail.

It amazes me that people just do not understand the prosecutor was clearly out of control. This misconduct by Fitzgerald has greatly damaged the US attorneys office. This guy's actions were far worse than Mike Nifong in the Duke Lacrosse rape case for example.

How is the American public supposed to believe a special prosecutor in the future if Fitzgerald's actions are not addressed and sanctioned?

People should call their congressman and demand this case and Fitzgerald's actions be reviewed.

I hope talk about this will develop on AM talk radio and shortwave now the case is over. Public discourse on the developments in this case needs to be aired. People that committed treason were not brought to trail or charged with a crime. A person in high office was charged with perjury on conflicting testimony with no objective evidence to back up the conviction. A trial was carried out as a fishing expedition because the source of the information on the Wilson's was already known by the prosecutor before it started. I don't see how this trial could have been further perverted or made worse. Just amazingly awful.

The LYQ NDB beacon 529 KHZ is testing with 10 watts. The final TX power will be 50 watts. We are making adjustments on it off and on plus Flight testing it.

Until it's fully commissioned will be on and off the air.

We plan on QSLing the Beacon when we get it up to snuff.

The LYQ Beacon is using a 120 foot high tower 'shunt feed' this tower suspends one leg of a Rhombic antenna.

The WWRB transmitter facility has Two Runways in operation and is designated as an Airport by the FAA for Company aircraft operations. Airport FAA Id is : 43TN ROSEANNE airport.

VORTAC located on field the Freq is 108.650

We will leave the Beacon on tonight (July 4) so you can see if you hear it. Please post your reception reports right here

Not sure. I don't see the schematic on the north country site. I'm
sure thsere are a bunch of good designs out there. I'll post a link
to it when I get back to NY next week. My friend said he was very
happy with the performance and will compare to a couple of other
antennas he has. Maybe I can coax him into writing something down and
publish.

Crystalonics fets got here for the Amrad. The wife thought they were
LEDs so when I asked for fets she told me they didn't come.

I've listened quite a bit today, and still nice to hear it again.

You don't want a windup radio unless you are planning for emergencies
and want to be able to listen to shortwave under those circumstances.

The windup radios are designed for use with those windup generators,
and the amount of power those generators can generate is fairly minimal.
Hence the associated radio is designed for low current consumption, and
low current consumption is not the thing for good radio design.

So any windup radios that include shortwave will be akin to the old
tube table radios that happened to have a shortwave band, or one of
those multiband portable radios of days gone by. You can get the nice
strong shortwave broadcast stations, when conditions are good, but not
much else. They may be prone to overload, and forget digital tuning,
it start drawing too much current.

I got the LL Bean windup radio with AM-FM-Weather-Shortwave. It came in fashionable red, with a built-in flashlight, and choice of power from rechargeable battery, AC wallwart or the wind-up handle, which charges the battery and plays the radio. All for $39.95 !! (This same radio sells under a lot of brand names, including Eton, I believe.)

I was stunned at the large number of shortwave stations it will pick up, using only the pull-out whip antenna. Given, these are the more powerful world band broadcast stations, but they are easy to pick up and tune.

Now, I wouldn't make this my only shortwave radio, but for the money, it's awfully useful.

The following link shows a FET amplifier followed by a bipolar
transistor coax line driver. Different FET and transistor than you asked
for though. See page two for the schematic.

Please not the semiconductors have been updated. I have had the antenna
in service in a suburban setting trouble free for more than 1 year

Good buy...Paid extra for them to assemble it for me

I've been crossposting a few of Mark's posts to alt.satellite.direcpc just to show them some of Mark's flames. I see that he carefully strips them from his responses, but leaves the other groups.

Apparently Markie doesn't wish to have any attention drawn to him in the Hughes group. This is because he is cognizant of the fact that he is violating their TOS.

http://en.wikipedia.org/wiki/Non-directional_beacon#Automatic_Direction_Finding_equipment

A Non-Directional Beacon (NDB) is a radio broadcast station in a known
location, used as an aviation or marine navigational aid. NDB usage for
aviation is standardized by ICAO Annex 10 which specifies that NDBs be
operated on a frequency between 190 kHz and 1750 kHz[1] although normally
all NDBs in North America operate between 190 kHz and 535 kHz[1].

Hi:

Can the Spin Exchange Relaxation Free Magnetometer be used to receiver
distant AM radio signals in which the carrier frequency is 150 KHz?
What if the carrier frequency is 44.1 KHz [for the same reason CDs use
a 44.1 KHz sample rate]? 40 KHz?

Thanks a bunch,

I've been visiting a second hand store here for a few months. They had a Grundig 800 on display for the last month and a half, with an asking price of 350$ Can. I'm cheap, so I kept offering them 250 because the antenna slides apart at the first segment.

Today they broke down and I got the radio for 250. It's scratch free and has the power supply. The thing works very well and unlike the Sony 7600 I tried, the sync seems to be working as intended.

I now need to find out which revision it is, but I've got problems finding any information on the web.

Serial #S80110089XX (the XX my change)

If anyone has the lineage of these things, I'd appreciate some input.

I recall something about the power supply problems and this is a concern. The date on mine says made in China (surprise) Oct-Dec 2000

I don't hate Americans. I do have a thing against murdering occupants of other countries for monetary gain, however, so your government has a lot of accounting to do. I think they are all immoral bastards who have kidnapped the Democratic process for financial reward.

Remember, YOU tell the government what to do, not the other way around. They are supposed to be working for YOU. They are your SERVANTS and you can't let them forget it.

Ok. That's fair..and let's let the Afghanis and Iraqis deal with their own stuff too, ok?

You seem to think that it would be a better world if we all minded our own business instead of butting (or bombing) into the affairs of others.

There seems to be a difference of opinion between you and Washington.

Have you let them know how you feel?

Copying from my original post:

Suppose you have a 1 MHz sine wave whose amplitude
is multiplied by a 0.1 MHz sine wave.
What would it look like on an oscilloscope?
What would it look like on a spectrum analyzer?

Then suppose you have a 1.1 MHz sine wave added
to a 0.9 MHz sine wave.
What would that look like on an oscilloscope?
What would that look like on a spectrum analyzer?

Now you get to explain why the beat is measurable with instrumentation,
and can can be viewed in the waveform of a high-quality recording.

Then go on to show why all other multi-frequency-component signals (e.g.
a full orchestra) don't produce similar intermodulation effects in ears
under normal conditions.

Two tones 100 Hz apart may or may not be perceived separately; depends
on a lot of other factors. MP3 encoding, for example, depends on the
ear's (very predictable) inability to discern tones "nearby" to other,
louder ones.

Yup. And the spectrum analyzer is (hopefully) a very linear system,
producing no intermodulation of its own.

Mike,

The Grundig Satellit 800 is and Excellent
Shortwave Listener's Radio :
Nice Practical Features and Very Good Sound

IIRC - #S8011xxxxxx translates to :
- - - S8 = Satellit 800
- - - '0' = 2000
- - - '11' = Nov
= = = Month of Assembly : Nov 2000
That would seem to agree with the Power Supply's
Date-of-Manufacture : Oct-Dec 2000

- My point is 530 is quite polluted with TIS.

M...Sushi,

A very good and valid point : TIS Radio Stations
on 530 kHz does dominant that Frequency in
many US locations.

This would place any distant NDB signal on
that Frequency 'underneath' the local TIS.

But 'if' the object of this NDB is to serve the
Local Airport as a Navigational Aid and there
are no TIS Stations in that area it sould do
OK for this intended purpose.

However, 'if' it was being designed as a NDB
for DXers to receive and report on : Then it is
most likely to be a flop with all the Nation
Wide TIS Radio Station Transmitters on the
same 530 kHz Frequency.

But with 50 Watts and a Shut-Fed 120 Foot Tower
it should give a lot of TIS Stations a competitive
signal : Just Listen for : .-.. -.-- --.- [L Y Q]
Who knows you may hear Roseanne Airport in
far off Tennessee 'ID'ing itself one early morning.

BURR,

Not to far from the Dust-Covered-Grey-Scape of
Trona, CA - A Drive through Trona makes one
'wonder' if they have entered the Twilight Zone . . .
http://en.wikipedia.org/wiki/Trona,_California
http://en.wikipedia.org/wiki/Trona
http://en.wikipedia.org/wiki/Twilight_Zone

FWIW - The 'expected' Temperature in Trona, CA
Today is 117*F cooling down to 113*F on Fryday :o)
http://www.wunderground.com/US/CA/Trona.html

Trona is in San Bernardino County, California
http://en.wikipedia.org/wiki/San_Bernardino_County%2C_California
the Largest County in the contiguous United States
{Lower 48 States} by Area, containing more Land
than each of Nine US States.

when you are hot you are hot -and-
when you are not you are not ~ RHF
http://www.wunderground.com/US/CA/Twain_Harte.html
66*F and falling here at 2 AM PDT
with triple digits 'expected' through the weekend
.
While in Calgary, Alberta, Canada {Mike M II Land}
http://www.wunderground.com/global/stations/71877.html
It is 59*F and 'expected' to be 89*F at Mid-Day - Nice ! :o)

Gloating over that piece-of-crap:

"Survey #2 - What is the most over rated radio that you have ever
owned?"

Grundig Satellit 800

1) Noisy audio, Eats batteries 2) Too big; too clunky; cheap
construction. 3) The 800 suffered from poor quality control---on one
the sound just stopped, on another the radio sent out a squaling noise
after a ccouple of months. Other problem was that if you had owned a
Drake SW8 or a Lowe 150 which had similar performance, you would
question why you had to carry around such a monstor-sized "portable"
to get that level of performance from the 800. 4) Chinese imitation of
Drake design sold by Eton Corp. misleadingly marketed as a Grundig. 5)
It was too big and too stupid. Plus its MW reception was poor."

The "second generation" Sat800 began sometime in 82 (not sure exactly which month) so yours is a first-generation. Those are the ones that most people complain about; the 2nd generation fixed the problems. Not that the problems were huge to begin with; some quality-control issues, flimsy tuning knob, noisy power supply.

It's still a great radio. For $250 there is probably not a better one. Enjoy it.

''In 1983, Rich and partner Pincus Green were indicted by U.S. Attorney and future mayor of New York City Rudolph Giuliani, on charges of tax evasion and illegal trading with Iran. Both of them fled to Switzerland before a court appearance, and they remained on the FBI's Most Wanted List for many years.

On January 20, 2001, hours before leaving office, President Bill Clinton granted Rich a presidential pardon. Since Rich's former wife and mother of his three children, socialite Denise Rich, had made large donations to the Democratic Party and the Clinton Library during Clinton's time in office, Clinton's critics alleged that Rich's pardon had been bought. Rich had also made substantial donations to Israeli charitable foundations. Clinton explained his decision by noting that similar situations were settled in civil, not criminal court, and cited clemency pleas from Israeli government officials, including Prime Minister Ehud Barak. Federal Prosecutor Mary Jo White was appointed to investigate. She stepped down before the investigation was finished and was replaced by James Comey. Though Comey was critical of Clinton's pardons, he could not find any grounds on which to indict him.

During hearings after Rich's pardon, Lewis "Scooter" Libby, who had represented Rich from 1985 until the spring of 2000, denied that Rich had violated the tax laws, but criticized him for trading with Iran at a time when that country was holding U.S. hostages. In his letter to the New York Times, Bill Clinton explained why he pardoned Rich, noting that U.S. tax professors Bernard Wolfman of Harvard Law School and Martin Ginsburg of Georgetown University Law Center concluded that no crime was committed, and that the companies' tax reporting position was reasonable. [New York Times, February 18, 2001][2]. In the same letter Clinton listed Libby as one of three "distinguished Republican lawyers" who supported Rich's pardon.

In 2007 Libby himself received a presidential commutation of sentence following his perjury conviction in the Plame affair.''

The first example is amplitude modulation precisely _because_ of the
multiplication, while the second is merely the algebraic summation
of the instantaneous amplitudes of two waveforms.

The circuit lists I posted earlier will, when run using LTSPICE,
show exactly what the signals will look like using an oscilloscope
and, using the "FFT" option on the "VIEW" menu, give you a pretty
good approximation of what they'll look like using a spectrum
analyzer.

If you don't have LTSPICE it's available free at:

Simple. The process isn't totally linear, starting with the musical
instrument itself, so some heterodyning will inevitably occur which
will be detected by the measuring instrumentation.

They do, and why don't you try being a little less of a pompous ass?

Since your modulator version has a DC offset applied to the 1e5 signal, some of the 1e6 signal is present in the output, so your spectrum has components at .9e6, 1e6 and 1.1e6.

To generate the same signal with the summing version you need to add in some 1e6 along with the .9e6 and 1.1e6.

The results will be identical and the results of summing will be quite detectable using an envelope detector just as they would be from the modulator version.

Alternatively, remove the bias from the .1e6 signal on the modulator version. The spectrum will have only components at .9e6 and 1.1e6. Of course, an envelope detector will not be able to recover this signal, whether generated by the modulator or summing.

Lots of BS here ...

The signal ends up looking like a 1Mhz signal contained within the walls of the .1Mhz signal ... and simply said, the 1Mhz signal is enclosed in the envelope of a .1Mhz signal--the "walls" of this .1Mhz signal being referred to as "sidebands."

I think you did
(sin[] + 1) * (sin[] + 1)
not
sin() * sin()

Yes, I have LTSPICE. It is pretty good.

Big Radio/audio Auction July 21st- Northern California

The California Historical Radio Society Is holding our biggest event of the year at the historic KRE Radio Station Building, Transmitting from the same site for 70 years in Berkeley.

Giant auction of vintage electronics, including radios & phonographs, vintage broadcast gear, test equipment, communication gear and more. To support CHRS there is a $5 bidders fee.

Here is you chance to acquire a Hallicrafters SX28-A, PM-23 speaker, Globe Chief, HP's first oscillator, tube testers, dynaco preamp, etc, etc.

Master of Ceremonies: Carter B. Smith. Live performances by: Frankye Kelly & Friends & The Broadcast Legends

Tours of KRE
Discover Ham Radio with W6CF
Vintage electronic Flea Market
Food & Beverages
CHRS HOTLINE - (415) 821-9800

See photos of the auction items at:

So the first (1) is an AM question and the second (2) is a non-AM
question......

(1 A) On scope will be a classical envelope showing what appears to be the
carrier amplitude voltage varying from the effects of the sideband phases
and voltages. It's an optical delusion, but is good for viewing linearity
and % modulation.

(1 B) The spectrum analyzer will show a carrier at 1 MHz, a carrier at 999.9 kHz (LSB), and a carrier at 1.1 MHz (USB).

(1 C) Not asked, but needing an answer here, is "if the .1 MHZ modulation were replaced by a changing signal such as speech or music what would the analyzer show?" It would show an unchanging Carrier at 1 MHZ with frequency and amplitude changing sidebands extending above and below the unchanging carrier.

(2 A) The scope would display a 1.1 MHz sine wave and a .9 MHz sine wave. They could be free-running or, depending on the scope features, either one or both could be used to sync a/the trace(s).

(2 B) The spectrum analyzer will show a carrier at 1.1 MHz, and a carrier at .9 MHz.

Perhaps
If you want Traveler's Information Stations (TIS) lookups see URL:

I would think the LYQ engineers would have checked for activity on 529 kHz

The tuning knob has a bearing inserted in it. It rides on a brass sleeve
which is threaded around the encoder mount, so there appears to have
been an upgrade. The price was great and I'm happy nobody else got it.

Hey...I'm going to prove you wrong!

..as soon as I go and get it from the basement. The thing fell off the table last night, broke my foot and then proceeded to go through the floor. I'm lucky to be alive.

The sidebands only show up because there is a rate of change of the carrier -- amplitude or frequency/phase, depending; they aren't separate, stand-alone signals. Since the rate of change of the amplitude of the second harmonic is identical to that of the fundamental, the sidebands show up the same distance away, not twice as distant.

I'm sure there's more than one way to do it, but I feel certain that any competently designed unit will not add any signals of its own to what it is being used to analyze.

When Bush/43 was asked about his cocaine use he refused to answer the
question. If he couldn't say "no" that leaves only one alternative.

Personally, I wish he partake of something -- maybe then he'd get back
to reality.

These evangelical types just can't handle power.

Does the term MYA have any meaning in antenna technology, or is it just Maxrad Antenna Co's. term for a particular series of antennas that they offer ?

Thanks,
Bob

By that logic, if he couldn't say 'yes' that leaves only one
alternative as well.

Your presumptions are showing.

That would suggest that there could be "low IM" instruments which would be very difficult to tune, since they would produce undetectably small beats; in fact that does not happen. It would also suggest that it would be difficult or impossible to create beats between two very-low-distortion signal generators, which is also not the case.

Other than the nonlinearity of the air (which is very small for "ordinary" SPL, there's no mechanism to cause IM between two different instruments, although beats are still generated. The beat is simply a vector summation of two nearly identical signals; no modulation needs to take place.

Or consider this: At true "zero beat" with the signals exactly 180 degrees out, no energy is avaliable for any non-linear process to act on.

Well, no, mostly they don't, until you get to really high SPL.

> and why don't you try being a little less of a pompous ass?

Exposing claims to conditions they have difficulty with is a good way to understand why those claims are invalid -- so long as the claimant actually explains what's going on, and doesn't just make up answers that fit the previously stated beliefs.

Yes, and in fact, that multiplication referred to above creates a
DSB-suppressed-carrier signal. To get "real" AM, you need to add back
the carrier *at the proper phase*.

FWIW, if you do the multiplication and then add back a carrier which is
in quadrature (90 degrees) to the one you started with, what you get is
phase modulation, a "close relative" of FM, and indistinguishable from

it for the most part.

A true DSB-suppressed carrier signal is rather difficult to receive precisely because of the absolute phase requirement; tuning a receiver to the right frequency isn't sufficient -- the phase has to match, too, and that's really difficult without some sort of reference.

A SSB-suppressed carrier signal is a lot simpler to detect because an error in the frequency of the regenerated carrier merely produces a similar error in the frequency of the detected audio (the well-known "Donald Duck" effect).

I would have thought the Nevada Highway Patrol would have licensed
their VHF trunk system, but they didn't. I would have thought NASA and
their contractors would have agreed on which units (English or metric)
to use, but they didn't. I can go on if you want.

Then you'd be wrong yet again, Dusty. Nowhere did I say they were "busted". However...

... Holland, Michigan must be more of a redneck, hick backwater than I suspected. The following items have been reported *numerous* times in both the the print and broadcast media (which apparently don't make it to Holland):

1) The daughters have had *numerous* drug, sex and alcohol escapades.

2) George W was (is?) a *SELF-ADMITTED* abuser of alcohol and weaseled when asked about cocaine (rather than giving a simple "no").

3) "Dime-Bag" Laura?

Don't worry about the print media (I know you are fighting that comprehension problem), but when listening to the news, please try and pay attention.

Since he was running for president on a conservative ticket, his two
choices were either "no" or to simply not answer, if "no" would not
have been truthful.

I don't think he could have done what Obama has done, admit to taking
cocaine and then set a record in presidential fund raising.

Huh? "Plame and her husbands treasonous behavior" you say? Don't you
have it turned around?

Joe Wilson discovered that there was NO issue with the yellow cake. The
Administration was trying to say that there was. THAT was a lie and
possibly treasonous on the part of the Administration. Wilson was trying
to warn the public that the Administration trying to beat the war drums
based on a fraud. Ultimately, Colin Powell, one of the Republican
insiders, finally admitted that Wilson was right and the Administration
was, if not lying, then certainly twisting the 'facts' (so much so that
Powell considers it an irrevocable blot on his career). And you call
Wilson pointing out a lie as treasonous. I think it makes him a hero.
But then, what can we expect from you, who doesn't think lying to a
Grand Jury is a crime.

P.S. Thanks for the nice, on-topic short wave post, you two-faced hypocrite.

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life

on Earth, sacrificed in cowardice to the real demon
antichrist, and see if we, the true, strong, and free, care.
The Son of Man SCREAMS before coming home to GOD'S America:
We are coming to destroy Satanically lawless bushite enemies,
all for the love of God, we shall succeed my friends, we
shall succeed. I will not willingly live in a forsaken world
with LIAR zionist war criminals conning US to believe, God is

AMERICA'S Mr. O'Really responding to accusations that FOX NEWS
refuses to cover the war in Iraq on behalf of concerned,
AS DYING, American families, [and forsakes Christ as demon
betrayers to the paying victim audience] Stated:

"Do you care if another bomb went off in Tikrit?
Does it mean anything? NO! It doesn't mean anything."

Why should WE continue to silently die unjustly victimized?,
for the bushite's contempt of Mankind censored?, the Eternal
Son of Man to GOD forever answers correctly.

Kill a bushite as the Love of Justice for Humanity

The Son of Man BEGS all honorable men to defend Life
from bushite enemies of GOD who murder, rape and steal from
innocence through lawlessness as thieves of everyone. Please
kill the bushite for the love of women and children. kill
the bushite for the love of GOD. Please, defend ourselves
further hardships by supporting immediate war crime trials
to begin against all neocon traitors who LIE OPENLY to
kill America's America as enemies to truth, as enemies to
Christ.

/ / Look, do you understand what these [TV politico] people
are saying?

These people, one right after another, are up here talking

YOU understand the madness we have descended to? \ \

'Kill Anyone Still Alive': American Special Ops

Can you not as a American Man, destroy bushite brayers to defend
innocent life? Americans could not care less presently for
the value of Human life. Americans do nothing to defend
their lives, but officially plan to murder more for the Satanic
demon antichrist in silence. Out of millions, how many even
bother to make a phone call to talk radio against the neocon.
how many? Five or six? Seriously.. How many? I know bushites
are demon liars for the neocon, but is it really impossible for
"Americans" to try speaking?, in the face of murdering millions
more forsaken by enemy mortal, pro child killer George Norry?
George Norry too nice of a guy to even bother question the value
of American children? The THIEF Art Bell's voice too soothing
to care that neocons own pirated America, and on everything she
stands whoring as WAR CRIMINALS to the FOR REAL antichrist?

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert

Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Remember: A zionist KNOWS it's an enemy of Humanity when it supports dropping seven million land minds to murder indiscriminately OUR CHILDREN for decades, or stealing a Christians Home because they say God says Jews would do such ungodly acts. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Live free by defending liberty by killing pro lawless pro torture pro fascist bushite enemies my friend, live free by defending Yourself and GOD.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

Kill a bushite LIAR and be loved by God as Life is True.

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies

of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of America's America. "The Liar" Hannity's America, can go it alone as treasonous liars, who boastcast a con to 'neutralize' America; 'finding' that we believe their demon lies about how one dies sacrificed 'Heroic' without any IMPORTANT questions answered. do we do?

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. By Satanic command, 'inconceivable' to see the bushmob up on high treason charges... Oohh. Yeahhh.. I can see that going for real -

quite excitedly I am about saving innocent lives. So, let's get done what needs to be a doing to save ourselves, so we can get this talking all behind us now, and reach for something truly breath taking as awarding,

Your Servant,

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer, for now anyway, we have some really serious business just presently, and we really don't need to be any more reminded about Mr. Bush's satanic Devil, demon whoreship, of, "Molech", a religion practiced to deceive America into sacrificing our kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled inspectors out of Iraq, but then... how is this not HELL to pay?

/ / Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power." \ \ HE LIED. Not the 'NWO', George Walker Bush, who Alex Jones tells US to look away, because he's only a puppet. Should not Bush be held accountable to the criminal actions he is PERSONALLY responsible for Christ asks YOU?

/ / So, there was indeed no imminent threat posed by Saddam to Amerka, and inspectors had complete unrestricted access throughout Iraq without delay prior to the, bush demon's further war crimes. So, what was the reason for all the pointless mass murder and destruction again? Oh right.. to sacrifice American soldiers so terrorist bush's war profiteering can feed off themselves as family without leadership present as spoken for.[...] it's only the dummy American People bid payers again left unaccounted to DIE intentionally. \ \

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their

flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

/ / "It could make August a tough month, because what they're going to try to do is kill as many people as they can to try and influence the debate here at home. Don't you find that interesting? I do, that they recognize that the death of innocent people could shake our will," the President explained. \ \

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors

to God and Country.

Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price
that British trained policemen had tortured prisoners to death
with drills, we discovered, through the New York Times (!!),
that American intelligence officers had been working alongside
them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the
ungodly enemies of Man who torture innocent people to death
for fun - expecting Johnny's America will not raise a word in
defense for the Human race, or our guns to defend our loyal
brothers to the cause of Justice. Death to the bushite, death
to God's enemies who lie cheat and steal from Humanity to
assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal
agreement so that we never again face these baseless
allegations," he said. Thirty Afghan detainees have claimed
they were beaten, whipped, given electric shocks and denied
food once they were transferred to Afghan security forces by
the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope
pushing cop killers, who murder innocent people they call
'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN
MILLION landmines on our cities to kill our children for
decades indiscriminately, while offering our Humanity to God no
apologies. Proudly kill the bushite savages all to
desperately survive ourselves creating a better world through
fair, free market communications. To warring for Liberty as
true Freedom wills, is for Justice understood as measured, not
just made up out of nowhere for the pleasures of those truly
Satanic. So spoke the King of being the wisdom we here
revealed by statement of timeless fact. Good will triumph
over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in

contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \ Kill the bushite for America, for Justice is Freedom. Lawless mercenaries are not granted by our will to survive truly. A "lawless" enemy granted "immunity" by bushite evil phonies, is that of which, holds ourselves in their confessed contempt for Justice. Receive thanks from everyone, GOD included, by rightly destroying such inexcusable treasonous ungodly enemies of all human life.

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

to develop and perfect these barbaric methods of repression
and humiliation," al-Sanai observed. "Surprisingly, the
Americans surpassed and outmatched the Israelis in their
[Zionist] savagery in less than two years."

Satanic to avoid "The Law".]

SATANIC AMERICA

/ / After playing a tape of Cheney's statement, Russert asked
Daschle, "Did the vice president call you and urge you not to
investigate the events of Sept. 11?"

MSNBC told YOU when interviewing Tom Daschle in discussion
of the official public contention, that immediately after the
terrorist act of 9/11 in New York City, (where thousands of
American People were murdered,) bush and cheney frantically,
desperately, INTENTIONALLY, worked paid overtime to close 9/11
(the justice-freedom thing) Investigations on who or whom

planned to get away un-apprehended with the still living as freely wealthy General Ahmad. \ \

911 "truthers" don't want to address the hard evidence like the clear as day video of steel running like water from the WTC towers, for, as Humanity witnesses, they'd rather watch silently, children murdered indiscriminately, before, acknowledging wise godly men from our communities who speak ONLY facts on America's derision for real, open market Free communications - freedom fighters who ACTUALLY defend the innocent from the neocon bushmob traitors. Each day we hear of near hundreds of US murdered by the godless Satanic THEIVING "American" forces in Iraq. without near a peep of concern by "America". Lawless bushite mercenaries torture rape and murder, paid to do so by the WILLING American tax payer, and near 300 million "People" (the NAZIS) can't find the effort to pick up a princely phone and call the ENEMY pro child killer George Norry, (who broadcasts every day across America nationally for the IRRATIONAL neocons,) to air any real concern for our Lives. True, the demon enemy censors OUR calls, and contrives WE a buyer without questions, but he doesn't censor You always forever. So, get to it fukhead, JOHN is growing angry with americans of EVIL ignoramuses escaping the bushmob for crimes against MY HUMANITY. The Son of Man States: Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the further criminal escape of the ungodly bushmob for 911 as TRAITORS.

PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / A BUSHITE GRUNT PRISSING PROUD AS OUR ENEMY "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones. \ \

Art Bell, "the thief", is really fuking evil to GOD as America.. being a blatant naked LIAR to the American Patriot Warriors

Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the criminal escape of the bushmob for 911 as CLEARLY TRAITORS, so says the one and only,

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

/ / Never in modern history has country been forced to pay for its death, torture, and destruction with its own money - its own oil revenues. A country where thieves are entrusted with its richness and where murderous gangs are entrusted with its security. \ \

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

US Attorneys don't serve "the pleasure of the president", they
serve freedom lovers dedicated to defending America from
willful criminality. But, americans are too stupidly weak to

"Those who negotiate in the name of the Taliban will be

said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked
bushite tyranny is won EASILY through communicating
understanding. The tribal strategy of Afghan fighters, where
Allah is Oonerroh, seems to be not the only thing missing from
the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top

top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their

comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

/ / How did a member of the Taliban in Afghanistan get hold of the phone number of an ABC news producer? Afghan 411 must be REALLY good! \ \ iiIII! can't even do that.. well... easily from Canada as an official non-fugitive that is. Just what is the going rate of satellite phone service out of Afghanistan? Remember: evil is DUMB about everything, including technology. Or so, how are we missed for report by point to point presentation using the same old satellite for phone service? Repeatedly calling the same mumblers? Jesus,

If we really worked at it, I could probably reach where they were in a day or two by hitch-hiking.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless

aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

The Iraqi "Government" has arrested the woman raped by three Iraqi policemen

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / A US military officer sounded "pretty mad and upset" that a group of soldiers had taken suspected Iraqi insurgents alive during a raid in which they had been told to kill all military-aged males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? In fact,why don't American Congessmen, who believe in defending Liberty, campaign JUST that? Why not??? Is it because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars]

that sexual assault is illegal [...] \ \

Rumsfeld, as it was told on Oprah, doesn't want any arrests of bushite rapists though, so has worked to deny Justice for female grunts by denying all requests to the 'Pentagon' from American Police Departments. [and you thought he was fired!] Why? because, they, the very weakest intellectually of America's - do what they're told teen kids, ALL don't have rights anyone in bushite corporate america is willingly strong enough as a dedicated Leader to speak in demanding defense of, for innocence.. Why? because they soullessly advocate continuing bushite war crimes for a stolen dollar. Stuck that way apparently. Support my rise to speaking publicly for open challenge on the rights and privileges of all concerned parties. Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911. I would like to form a global posse of sleuthers to identify on international open line radio, all guilty INDIVIDUAL parties by evidenced conclusion on our highest of priority issues, and get started with the nothing to hide from anyone global arrests, with PUBLIC court proceedings, done all for our public interest as the refusing to further fall as innocent murder victims.

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win." http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true.

(It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of steel running like water moments before the first tower fell is freely available for download

all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 100,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

King Johnny Wizard

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be

questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real. When I watch only thirty seconds, my rage as a god increases beyond anything anyone of Humanity can even contemplate, and i start crushing bricks in my hands with fury, twist iron bars into pretzels, all as a foolishly feeble attempt to personally have killed those present in this video. Then I cry. I cried for these children present in this video the first time I watched it, and I cried last night briefly, before stopping it.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

ARE YOU TALKING TO ME? - A Johnny America Exclusive! - a
candid interview on Bush's deeper than ever political thoughts
about the war, up front, and personal. Surely, an historical
event such as this, with the revelations contained in his own
shockingly powerful words, while granting a stage in Johnny
Wizard's World, is frankly, beyond the pale, quite shocking in
perspective I'm sure I would state again. I feel confident
Bush's surprising candor on life's humbling higher meaning
wont make the crazies 'out there' any more less right per say.
As for the barely living of you passing travelers to our dying
Realm.... be ready to be taken on a journey of such profound
discovery, with a wit never before witnessed from President
Bush!, all about the cruel hardships Americans continue to
endure without guidance through effective leadership. Without
evidence to form his guilty verdicts. That orders the murder
of the innocent with. I kid you NOT. Hey? maybe the Son of
Man doesn't have to wipe out the entire human race after all..
With Bush co-operating now, I personally believe, no, I know,
we're going to make a go of this after all.

Let US speak in challenge to any or all bushite enemies

NATO war plane bombers must be hunted down by the will of Humanity to be gloriously publicly executed to defend the innocent lives, they once again, have indiscriminately murdered in Afghanistan without a sliver of evidence, but for to say, some dumfuk had a 'rumor' that a single individual SUSPECTED to be an anti-heroin pro-child defending Taliban supporter, granted the bombers of NATO to wipe out an entire village MURDERED indiscriminately by the TRUE demonic enemies of LIFE. Please, if you must forsake me in your personal cowardice and self loathing, don't forsake GOD and America by not killing with PRIDE, these bushite dumfuks of NATO the first chances you get. Love liberty as if it were your own, and kill a lawlessly murderous bushite nazi savage for your love of anyone included. (You can quote me forever on that.)

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know that the international Johnny Wizard comic book is out there? Don't miss out on picking up a copy for yourself, or your loved ones. And did you know, I'm trying to get on international radio without a censor to thunder my audience back into submission. I HATE HANNITY. All I want is free open debate to resolve this crisis, that doesn't have to be so ruining our dying worlds without questions forwarded by the dumfuks. Justice is Paramount through reason to be so. The Bush Administration have been up to no good, escaping for 911, that New York City should sue for. Hire me on as legal consultant buddies, cause I'm like near starving broke here, with supreme court challenges failing my cost factor, and hunger pangs slowing our progress on fighting unjust incarceration. I desperately need money, like now, as a gift, or an advance on a industry paid private consultant gig. Or, instead, maybe you'll idly watch some innocent person willfully be sent to prison by liars in your demonized name, to defend the ungodly evils of war criminal traitor, our Mr. Bush Jr. in foolish disguises. Your call Bud.

be Wiser,

Johnny Wizard - Patriot Liberator of Eternal Destiny
(i.e. REAL sustainability as self sufficiency)

(i.e. nothing is separate from existence ourselves, not even time, and Justice is binding to defend our lives if practiced fairly with it's elemental divisions through reason. Example: a person accused of a criminal offence, without any evidence, is INNOCENT. Those who say otherwise, are the actual

terror-ists. Civilization's ancient Founder Hammurabi,
suggested just to openly publicly have executed those who lay
capital allegations without any evidence, while working to
close outstanding criminal investigations. A made CRIME

brought birth of 'Civilized' to an untamed till then, chaotic
confusion. Old becomes again anew, because Americans are weak
as polluted, and too cowardly to defend the rights of US
innocent. Let's change that. Support my climb to

I am a man of real men, committed to defend our world from all
enemies, foreign, or domestic. Unlike a bushite traitor to God

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

First things first: America must demand the immediate arrest of those who told America the victim committed suicide, when clearly, due to autopsy photos, the individual was tortured to death as the innocent. So, the 'officers' responsible for the fraudulent claims, need to be arrested for accessories to MURDER. The torture will earn them both the death sentence, if found guilty under STANDING AMERICAN LAW. And any bushite like a, it's always a great day George Norry, who purposefully with criminal intent stands in life's continuing way for Justice's demand, American Patriots will phone to Bill with every once of pinky power we have at our disposal.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly

charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Albeit, some rock/country/pop stations are now wading a little ways to allow minimal defensive communications on behalf of our truly dying communities. [i.e. the THIEVING Lottery actually takes more than communities get returned in cash transfers from the government, and this, beat up the unrepresented poor, actually ends costing EVERYONE more. [read "Stand Together, or Don't"] You don't know Evil until you hear CJOB's radio host pontificating on it's greatness to deny our community any time to respond to their direct criminality against OUR interests. A near 75 percent of Our radio content is private commercials, while the rest of twenty percent is amateur sport updates. Why don't the strangely often fat slob sports fanatics go away on their own as blood sucking leeches, and stop denying us more serious subject meters with 'we're just too dumb to hear' censorships. In Winnipeg, it is a teensy, tiny authoritarian illiterate group of sports crowers, that the station has devoted the Province entirely to for private financial profit. And so, what is someone in Selkirk Manitoba going to do with the play by play radio commentary?, not listen like everyone in Winnipeg does since, that's what. I personally can't even bare the wasted time, to finally get on to be immediately hung up on impolitely by a Station who literally robs from our community. More than 600,000 live in Manitoba, as apposed to a small cadre of proven criminals who stole our public phone system, or took a PULBICLY paid for Private arena or Private sports

facility that cost us practically billions to get in the front door of the already completely paid for by ourselves ten times over, to maybe see a concert that Ticketmaster charges half the ticket price to simply just print a paper ticket/contract. ENTERTAINERS, let me be your manager's Manager instead, and I'll get you every last penny your fans paid to see YOU with. I could practically double your earned earnings, or, are you instead going to blindly give HALF your life to a scalper, who's done nothing creative but hire someone near minimum wage to press a print button religiously. I'll tell you what, we just won't do any more good shows until we can get this remedied by freely communicating our concern for dying soldiers left further without measured value, left to actually DIE in the gutter as homelessly forsaken.

Take care by taking action.

God we can't do this alone, I need you.

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Seriously, the propagandists responsible, need to REALLY, be
put to death after found out through US public court
proceeding. NO ONE would disagree that Iraq is a war crime,
where more than a MILLION INNOCENT PEOPLE have been raped,
tortured, or murdered by dumfuk bushite grunts. If YOU
actually think about it, all of everyone would gladly kill an
unholy bushite terrorist, before allowing it to murder
families running for our lives as loving Church goers.

ending in October 1981, the same year the epidemic became
official. [...] By 1984 (the end of the study period) over

which means, with such a short study, we have yet to know the
extent of any adverse reactions from the vaccine, especially
the 250 girls around the age of 9 that were administered the
vaccine and who have not yet reached the age where they're
likely to be attempting to become pregnant.

Fact 7: This vaccine has purportedly been shown to protect

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly
advocates the rape and murder of the innocent in Iraq to
thieve from for the 'escaping' neocons, (as the truly

UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

"It is not George Bush, it is not the Neocons, it is not people who have been advocating waging that [IRRATIONAL 'Evil' UNJUST] war [against the established innocent] where we find our [hidden from view] enemies, who are responsible for that fact that we are indeed in a global war [sacrificing our conned kids to the un-accountable war profiteering thieves of American labor as the UNELECTED]. It *is* the enemy that started it, that is pursuing it, and that is trying to bring it here back here home now. [, and that way, us neocon zionists would miserably fail against those who would speak in freedom's demand for Universal Justice. Real freedom I mean of course, you know, evidence to form conclusion factually, public trial by questioning juries, blah blah blah. We can't have that Now can We? Colmes? Greenwald?]"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US. Either Gaffney suffers from some blind dolt syndrome, where he clearly can't see himself flailing madly in criminal ignorance, or he's an accomplis of blatant treachery, to help escape his demonic war profiteering benefactors who murdered thousands of Americans for similar gains through the unspeakable bonanza of the "Pearle Harbor" like event that 911 was. What the peenackers publicly stressed they would crave to fool US into Iraq and beyond as glorified war criminals. 911, New York City, where thousands of Americans were murdered, and millions polluted. killed like now American teen soldiers with the Iraqis. Led by a Sattler, or Mattis, Blount or Russell, who order the murder of women and children openly, and 'they', the actual soulless minions of the demon antichrist, the true dumfuk cowardly enemies of Humanity, don't cut them down instantly instead for Life as cherished. That must change for our betterments. Kill any bushite bomber and be loved by God's America.

Any Commander that doesn't support the arrest of those responsible for 911 and the subseqent neocon war crimes of Iraq, is a traitor to God and Country. Death to the bushite, death to our enemies - so says Johnny.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

Make the call, be a man.

further to the death cults of corporate news:

Realize, our corporate experts on Life in the national news agenda, don't work to defend our children from mercury in innoculations they promote for profit. Nor, do they tell US about radio-active depleted uranium. Instead, as now, they look to blame others, even God, when suggesting dna is responsible, as if the American corp public could even comprehend multi-demensional cross kingdoming. They can't, (too stupid) but their Satanic death cult [no evidence] where they News pretend and WE DIE, they are willing to continue to go with by refusing all calls. Ahmad funded Atta, but they don't want to tell US there either. Look how many people they have so far watched murdered as the innocent for zionism while entertaining.

Support our call to be heard my brothers.

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life

begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

Yours again,

King Johnny Wizard

CONTACT

/ / IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whatdoyahsay?? \ \

Art Bell, the zionist enemy of Life, wont allow free communications with the established facts though,

What do you think? Are you truly all alone on this?

Again, more than half of the money being spent on demon Bush's wars against life's reason for being, is completely left un-accounted for thieving. Not spent to offer dumfuk cowardly soldiers help hunt to kill bushite rapists and torturers. Stolen American values Just like the bushite soldier on the ground, who after gunning down innocent people in the street, go through our pockets to steal the spared change. Kill a bushite for the love of God why don't you my American Patriot brother and sisters?, today!

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Again, corporate nazi america states 30 percent of America supports the ungodly George W. Bush's demon antichrist action, when in truth, it's less than one in a thousand. it's just CBC, CNN, CJOB, and Art Bell the liars ain't taking our calls for enlightenment. just like they treat the innocent in Palestine for zionism's encouraged racist in-action. For what does a fan of 'we're the best' Coast to Coast radio network family know about nothing after we witness them froth at the thoughts of nuking countries, or calling for enemies, none of us here in North America have any real problems with?

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

This is why the Son of Man through God begs the Peoples of
Humanity to kill on sight, the enemy bushite betrayers to
Life. Ourselves, the innocent. These soulless grunts don't
destroy such deserving commanders, Like Blount, Sattler,
Russell, Wuterich, Pantano or even Kimmitt, and instead, as in
Fallujah, murder every woman and child present, while stealing
all our given monies for desperate life saving help. Anyone
in the Air Force deserves to be justly put down, for, I've
NEVER seen any legitimate bombing campaign, but for to kill
People indiscriminately like NATO regularly does with
radio-active toxic waste, while then sending in the dumfuk
Marines, or the 'from the coast' Canadians, who of course,
rightly get killed on the ground in retaliation for such blind
evil stupidity. Please, I beg, help Iraqis, and kill the
bushite thieves to defend our forsaken God. American
children, help me my loves. Please don't allow the bushmob to
escape for the treasons against America on 911, for, bushites
are OPENLY traitors, as the TRUE enemies of evidenced Justice,
as the Freedom to do our own things loving God on our own.
Besides, most bushites aren't even registered American
citizens. Bushites need to be hunted down for destruction -
by the Loyal Christian American Patriot Soldier, the ones who
war to win against those who torture US innocent to death as
the ungodly Satanic LIAR enemies. Save the Humans, kill a
bushite false accusing traitor of American Freedom To-day, and
become a real Man in the presence of Johnny America, an actual

$300,000. [...]

What images must be reported? Illegal images of minors, which
includes clothed teens in "lascivious" poses, according to the

Justice Department. Obscene "cartoons" and "drawings" also qualify. (18 USC 1466A) \ \

Alert the USER! not tyrannical leaderless dumfuk thievers, for it is the expresser who, if any, that is guilty of a determined illegal expression. In 'The' Canadian case, they, (once proud IRRATIONAL bushiter THEIVES [pro Afghan child killers determined to help the ungodly demon Bush's 'escape' for 911]), want/HAVE to put MEN is prison for beautiful pictures of girls in panties, or bubble bathtubs being. IT IS demonization. Leaving twenty year olds to look like they could be tens in a singled out of context womanly derriere, that our Jurys nations-wide, are generally, denied to perceive normally, if at all. McCain knows he is an enemy to God's children everywhere. McCain speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED. So, where are the North American multi-million dollar "Exploitation Units" to defend our King's children from TRAITOR pro-torture of US as the INNOCENT McCain there then eh? Units who he holds hiding behind himself somewhere in high blind praise as a rich group of child lovers I SAY??? (Is a heroin pushing bushite THIEF that supports the 'escape' of the bushmob with indiscriminate bombings in Iraq or Afghanistan, Lebanon, Haiti or Somalia, even capable.! of real human Love I torturingly ask dauh gangsta rappah? buddies where are You there in the stomach of the Beast celebrating?) McCain is a demon enemy of Life ourselves to promote the arrest of all the goodness that beauty brings in the heavenly art of our clothed teens. If it weren't for Earth Women, God's boy, Johnny Wizard, wouldn't even be here to bother. It's the reason I first picked up a guitar, it's the reason I did my early plays, then monster movies, and it's the reason I praise the orchestra of the Heavens in Dream, and well.. it's just the reason for everything. I speculate sometimes perhaps slyly that G was kinda lonely all by ourselves for zillions of years, whom, for entertainment, loved us up on the entranced exit starting - before a beginning without ending, yet, as outer there, is still the insider here, forever being we sorta, and gave us this foolish boy for the mental gymnastics. All in good fun. Rocking on to leave all as Mystery, never realized forever and a day in Eternity. You are a Servant, as so I am. Quite a place eh kid? So as it looks now presently, we're here still barely hanging on striving to survive against Mr. Bush's continuing unfair irrational tyrannies of clear injustices committed in Your Name against our Humanity, or, end ourselves dying without true representation, left falling further forsaken. [Home is home sweet home as in Chicago, as we always was going

to with or without our loves heaven bound. For I'm starting a journey back to where I belong, where the food is good, the music's great, and life is truly worth living as miraculous.

Please help God.

We have to overhaul how all our national news Podcasts are assimilated through corporate nazi zionist censorship. Art Bell and George Norry are enemies to ALL american teen troops put in harms way to die as bad guy irrationally for the neocon God betrayers. Why? because they purposefully lie to have YOU die as innocent murder victim. Death to the bushite, death to God's enemies.

Well, gee, Iran has no nuke program, in anyway, shape, or form, but Israel wants to murder more of humanity for their ungodly lies anyway. The enriched uranium Iran is making, can not be used for a bomb because it's only enriched to 2 percent, and to get the bomb making stuff, you need a COMPLETELY different technology. A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification, concluding Naturally, that all stolen Iraqi money must be returned by the will of GOD to the victims; with those responsible for stealing it, made to pay US back, with the true American Patriots to be found, backing US up 100 percent. The bush administration has teamed our kids to mercenary forces who have no loyalty to freedom but to freely die another Marine for more dying stolen values. While successful at it corporate America, just lies and lies and lies without shame, nor apology for the death of your poor cowardly kin.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin, and, Influenza is a constantly mutating virus. So, pre-determining which 'deadly' strain is going next, is only because the WHO wants to continue killing US for huge cash profit. With cult slaves, like those who forced Jones Towners to drink at gun point, are the same as those who now demand we give our girls of America from Texas such. It seems the magic TV news people don't want to trouble us on this matter of our actual survival.

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

Death to our indiscriminately murderous thieving enemies of
God's Creation, who war Creation for bush's personal escape
for the crimes of 911 Christ would say right, wouldn't you say
so likewise my brothers and sisters, of the Muslim, Christian,
and Jewish religions in belief?

Great words from the lawyer of the thieving bushite child killers of
Haditha

/ / "There were Harriers dropping 500lb bombs on buildings.
If they're dropping 500lb bombs without knocking on the door
first, how can you argue the troops on the ground did anything
wrong?" \ \

2000lbs of radio-active toxic waste that will murder for years
more like, while after, then striking again to get the god
helpers and screaming children, then even, as in Fallujah,
going house to house to murder every one, young and old as the
truly Satanic. Just obeying lawless orders to thieve from
Humanity as bushite for neocon zionist traitors of G-D doesn't
fly in the big book. When anyone kills a bushite, all
humanity benefits truly from the defense. You defend a real
suffering God by ending a soulless bushite threat against our
species.

incompetence. (L. Paul Bremer, for instance, who made the

the risks were of his various decisions.) \ \

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt
those who stole billions with ear-marks, Social Security,
no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the
emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

Again, a Patriot Soldier whos only crime is that he refuses

George Norry and Art Bell are enemies of American chances for
survival of our dying teens. Their contempt for Justice in
America is blatantly EVIL, and worth killing before they do
another dumfuk, they hate US, zionist demon broadcast.
Traitors to God and Country George Norry and Art Bell are.
They'll laugh, sing, and cheer while KILLING your CENSORED
forsaken Son or Daughter, needlessly trapped sacrificing with
the ungodly 'lawless' bushite zionist enemies, all before
allowing any REAL Americans to SIMPLY discuss evidence as a

requirement to convince ourselves of something. Norry, that demon fu-ker, has an endless supply of bush whore callers, that'll tell him, he doesn't have to read the news, read his email, or hear the screams of dying innocent murder victims. Sure, once a year, maybe, we'll get the Patriot popular Alex Jones, but he's too terrified of me as Puppet Master, or US, or talking about the NO CAUSE Iraq war, that Iran doesn't have an ability to create weapons grade uranium, or that General Ahmad funded 911's Atta.

Real Americans are those of US as humanity that believe in liberty as Justice for all. The US first military engagement in Somalia was fully supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air force, responsible for blatant first degree acts of murder against the innocent, would be hunted down by Humans, tried, then executed gloriously in the defense of our living justly.

/ / Al-Maliki has promised he will no longer block action against the Mahdi Army militia \ \

So, is the block head saying American soldiers so far have died for lawless tyranny? Kill a bushite, to protect the lives of us as innocent victims in other words, right?

/ / And the Iraqi people owe us a debt of gratitude?

Bush continued, "I believe most Iraqis express that. I mean, the people understand that we've endured great sacrifice to help them. That's the problem here in America. They wonder whether or not there is a gratitude level that's significant enough in Iraq." \ \

Is Bush saying US dumb bastards don't give enough in sacrifices to himself as the demon antichrist?

New Recruit

Destroying enemy bushite is a gift to Humanity, it is
saying you care for the lives of the innocent a bush
bitch nazi grunt freely confesses to targeting for
murder. Liars are the bushite, who steal Iraqi
resources, allow racists and rapists to commit their
demon crimes in America's name un-challenged, and who
absent mindedly bomb the innocent without just reason
given. All the while, labeling themselves, "pro-Iraqi".
snpd

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,

George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful
suffering and fright and death at the hands of the enemy
bushite. The bushite: who the demon anti-Christ
states, are un-accountable to any rules of law in this
Universe, like with his extremely foolish criminal
decree, 13303. I kill mindless parasite bushite nazi
enemy soldiers just for that alone as eternal defender,
and I do it for to win some mercy for a real living God,
who the fascist enemy bushite hold in their ungodly
contempt as LIARS.

I have the backing of every real man alive on this
planet, and we all know it. No voices of reason have
apposed my factual claims in FREE Usenet, and Art Bell
makes no attempt to defend himself as internationally
painted enemy traitor, and that says a whole lot to Talk
America. Why? Because Mr. Bell, the bushite
propagandist, knows too, I speak and act truthfully,
honorably, and righteously, while the talk radio
american bushite lies, cheats and steals from America's
America, that as bushite, leave undefended for criminal
plunder in Your name call censored from classed
enrollment. You have just as much a right to be here as
I do, and the demon bush, he ain't no better than any of
US when he is "excused" for the murder of well more than
a hundred thousand confessed as completely innocent

people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

How The Demon Bush Misled God's World

How Bush misled the world
http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

The guilty party of Haditha have confessed that targeted killing of innocent children is fair game in their worlds, and

as confessed, they 'got away' committing the same Satanic acts - going house to house in fallujah murdering more than two hundred thousand innocent folks for LIAR E-N-E-M-Y Sattler. Bushite corporate america, has stated in silence, the bushite enemies of Haditha will never face public execution for such offences, YOU apparently WILL NOT GRANT IT, too cowardly, and in all likelihood, (like those of the Saudi Blount's third infantry) will be allowed to walk freely down american streets after being found guilty as politically supporting the robbing and murder of innocent men, women, and children all because we're rag-heads or niggers. The, deserving to die as illiterately intolerable bushite drone soldiers HAPPILY, WITHOUT QUESTION, co-operate with ANY lawless mercenary forces such as south african death squad goons in finding the enemies of themselves. Purposelessly ungodly bushite soldiers are told they are DYING to defend Iraqis, while breaking out of prison, mercenaries caught trying to kill innocent Iraqis for fun and profit. While, at the same time, actually having SLAVES from India preparing their lunches!!! And guess what? they're coming to live bushite america as the patriots after they get killed you're forsaken American Son or Daughter teen! With millions of stolen American dollars to set up new 'freedom' operations.

Let US demand open radio communications on the mathimatical facts to save our own selves further victimhood to their personal contempt for the true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

- "The months preceding September 11 [see] a shifting of the US military's focus ... Over several months beginning in April [2001] a series of military and governmental policy documents [are] released that [seek] to legitimize the use of US military force in the pursuit of oil and gas." Michael Klare, an international security expert and author of Resource Wars, says the military has increasingly come to "define resource security as their primary mission." In April, Tommy Franks, the commander of US forces in the Persian Gulf/South Asia area, testifies to Congress in April that his command's key mission is "access to [the region's] energy resources." The next month US Central Command begins planning for war with Afghanistan, plans that are later used in the real war. [Sydney Morning Herald, 12/26/02]

See? It's admitted that the zionists planned to STEAL the rights of Afghans for Enron, by LYING to SOLDIERS to get them killed as the American Pension thieving bad guys. Too COWARDLY parasitic to hunt those responsible for murdering thousands of "Americans". So, as a consequence, they, as loveless bushite drones, die cowardly with the once great America as enemy corporate fascists to Freedom's Justice, Our Living God.

John's truth. Killing a THIEVING bushite is to save the lives of the innocent they target for murder. Death to the godless bushite, death to America's lawless enemies

DUMFUK BUSHITE ENEMY OF GOD "This is not a job in anyway shape or form, this is not a job. this is a lifestyle. and we choose this type of lifestyle."

Traitor LIAR Hannity "Knowing the danger?"

DUMFUK BUSHITE ENEMY OF GOD "Yeah."

Traitor LIAR Hannity "Well, isn't that the definition of Bravery?"

The DUMFUK ENEMY OF CHRIST "Uhhuh."

See, TRAITOR Hannity [who deserves to be executed for the treasonous DOCUMENTED lies he tells America almost daily] would claim any and all serial murderers and rapists in America are the definition of bravery. Bushite dumfuks deserve to die as enemies of America because they openly, purposefully target the innocent to rob from and murder, as bushite did on 911. They bomb cities. Thus is why Christ [ME] tells loving children to gladly help Life kill their own godless fathers or brothers who CHOOSE to commit these war crimes against our humanity with their contempt for Justice, Johnny and America. {Especially those in George W. Bush's air force.] A bushite's hatred for America is blatant with every monosyllabic grunt they make. In nazi zionist america, they have a Zionist national radio program that forbids the nation to know they're presently being victimized for criminal sacrifice, and apparently, Americans would rather DIE, than hunt George Norry, or Art bell for questioning. A nation of fascist nazi cowards, who go silently to their graves in their support of torturing innocent people to death for the thieving EVIL bushite's pleasure.

Death to the godless bushite, death to America's lawless enemies.

Bushite Zionist atheists believe that I, as the Son of Man, Couldn't be anything but their worst nightmare. No, WE, as Humanity, will religiously really kill bushite continuously to hasten the day when America actually fights to win, free communications for Justice's claim. AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01] The individual who makes the wire transfer at Ahmad's direction is Saeed Sheikh, later convinced for kidnapping and murdering reporter Daniel Pearl in February 2002. ABC News later reports, "federal authorities have told ABC News they've now tracked more than $100,000 from banks in Pakistan to two banks in Florida to accounts held by suspected hijack ringleader Mohamed Atta." [ABC News, 9/30/01] CNN also reports the $100,000 transfer, and the New York Times specifies that it came in 2000. [CNN, 10/1/01, CNN, 10/6/01, New York Times, 7/10/02] Ahmad's order must have preceded June 2000, since that's when Atta and others started opening bank accounts and receiving the money ($109,910 is received by Atta and Marwan Alshehhi between June 19 and September 18). [MSNBC, 12/11/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy

documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegations, thereby guaranteeing criminal invasion. Only workable if Laden pleads innocence to a crime that hadn't yet taken place, a crime serious enough to "justify" sacrificing American GIs truly for a liquefied natural gas pipe line for pension thieving Enron. ["The Dahbol Working Group" and Bridas] Any evidence for any offense would have been sufficient to have Muslim fundamentalists hand Laden immediately over, as they had offered [as others of other nations had also] repeatedly during the Clinton years.

CBC and CNN have still, to this day, consciously refused to do any follow up on the intelligence, deciding instead on behalf

of dying people everywhere, our public devolvement of a just society.

RTÉ News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's ruling Taliban for proof that Osama bin Laden was responsible for last week's attacks. According to the US Secretary of State, Colin Powell, the United States has enough evidence to try bin Laden in an American court.

The US Government said there would be no negotiations.

After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen Mahmud Ahmad sought retirement after being superseded on Monday, the truth is more shocking. Top sources confirmed here on Tuesday that the general lost his job because of the "evidence" India produced to show his links to one of the suicide bombers that wrecked the World Trade Center. The U.S. authorities sought his removal after confirming the fact that $100,000 were wired to WTC hijacker Mohammed Atta from Pakistan by Ahmad Umar Sheikh [Omar Saeed] at the instance of General Mahmud [Ahmad]. Senior government sources have confirmed that India contributed significantly to establishing the link between the money transfer and the role played by the dismissed ISI chief. While they did not provide details, they said that Indian inputs, including [Omar Saeed's] mobile phone number, helped the FBI in tracing and establishing the link."

8.

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation, Laden agreed to hand himself over, but Bush refused the offer, while CBC and CNN denied to report on that fact for the behalf of now dying dismembered American GIs. Once the indiscriminate bombing began, targeting almost every building in the country of Afghanistan, Laden then claimed he had no choice but to fight back to defend US innocent from the ungodly enemies of Creation/Freedom. Then the clear to all fake video came out with an actor who's face wasn't even close to looking remotely like Laden, but for almost the facial hair. [Bridge of the Jamaican actor's nose is HALF as long in proportion to Laden's for example, and surely frightfully shocking for some, the actor doesn't even take blame for 911 either!] Photos comparing the two faces never aired on CBC and CNN available in about twelve seconds with the power of the Internet.

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . The Washington Post, 23 September 2001.

At American urging, Ahmed traveled ... to Kandahar, Afghanistan. There he delivered the bluntest of demands. Turn over bin Laden without conditions, he told Taliban leader Mohammad Omar, or face certain war with the United States and its allies.

Mahmoud's meetings on two separate missions with the Taliban were reported as a "failure." Yet this "failure" to extradite Osama without providing a shred of eidence was part of Washington's documented design, providing a pretext for a military intervention which was already in the pipeline. If Osama had been extradited, the main justification for waging a war "against international terrorism" would no longer hold. Nor would the ready to go Patriot Act. Incidentally, when MSNBC contacted the Whitehouse regarding the top secret invasion of Afghanistan plan, it was confessed that the plan had been "fully implemented"

You missed my point. Either answer would have diverted attention from his policies on the campaign trail. "Yes" would have sparked ceaseless wrangling. And "No" would have sparked ceaseless wrangling.

If he'd done cocaine, and admitted it, there would have been a couple of his snorting buddies trotted out who'd have testified they snorted with him, and then there would have been the entire, 'what did he snort and when did he snort it' questions anywhere he went. All the talking heads would have been on it. It would have become an albatross on the campaign trail.

If he'd not done cocaine, and denied it, as evidenced by the lengths to which the opposition went in the military discharge story (ie, abject dismissal of Bush's senior and commanding officers who asserted he had completed his service with distinction, and falsification of documents asserting otherwise), there would have been a couple of people who would

have been brought forward and testified that he did, in fact, use cocaine, followed by allegations he was high in the military, while in flight, during his tenure as Governor, etc, etc...and now he's got a REAL problem. And make no mistake, this was in the works. Two of his college classmates admitted to being paid by sources unrevealed to make these charges when the time came. It didn't, and they didn't, and though the story didn't die, it didn't become a liability, either. But the tools were in place to make it so should he eventually respond.

Al Franken, on Letterman, told of an encounter with Bush where he tried to trick Bush into admitting he'd used amphetamines to get though finals week in college. And Bush failed to respond to that, too. Which surprised Franken..because if he responded to that question about amphetamines, why would he not then comment when asked about cocaine.

Franken said, and this is a quote, "He outsmarted me. He just outsmarted me. He took away anything that could have been asserted after that."

So, to not answer simply removed potential obstacles far greater than the nagging suspicions left in the wake of an unanswered question.

Because if he had addressed the question, he'd have been screwed either way.

This was a strictly political maneuver. On both sides. And it was very well played to a stalemate.

So, in response to your remark...."Since he was running for president on a conservative ticket, his two choices were either "no" or to simply not answer, if "no" would no have been truthful," is inaccurate. He had only one choice....a non answer. Because to respond either way would have been disastrous. Leaving the implication that he didn't say 'no' because it would have been untruthful as the only thing left to complete the mission of the person who asked the question in the first place: To implicate the candidate by his own words whether they were spoken or not.

It's a twist on the classic 'have you stopped beating your wife' scenario....there isn't a response leads to anything but an indictment.

Becasue of the politics, the only thing that can be concluded by Bush's failure to respond with either a 'no' or a 'yes' is that the question remains unanswered. Anybody in politics knows why. The public, only wishing for an indictment of his character, is left to draw a conclusion that is implied by the questioner, but not by the candidate.

Again, excellently played. And without a single fact, without a single accusation, affirmation or denial.

Typical big-time politics.

But it is true.

> (the difference frequency) is generated there.

The ear does happen to have a logarithmic amplitude response as a function of frequency, but that has nothing to do with this phenomenon. (It relates only to the aural sensitivity of the ear at different frequencies.) What the ear responds to is the sound pressure wave that results from the superposition of the two waves. The effect in air is measurable with a microphone as well as by ear. The same thing can be seen purely electrically in the time domain on an oscilloscope, and does appear exactly as Ron Baker described in the frequency domain on a spectrum analyzer.

> The sum frequency is
> too, but when unison is achieved it'll be at precisely twice the
> frequency of either fundamental and won't be noticed.

The ear does not hear the sum of two waves as the sum of the frequencies, but rather as the sum of their instantaneous amplitudes. When the pitches are identical, the instantaneous amplitude varies with time at the fundamental frequency. When they are identical and in-phase, the instantaneous amplitude varies at the fundamental frequency with twice the peak amplitude.

When the two pitches are different, the sum of the instantaneous amplitudes at a fixed point varies with time at a frequency equal to the difference between pitches. This does have an envelope-like effect, but it is a different effect than the case of amplitude

modulation. In this case we actually have two pitches, each with constant amplitude, whereas with AM we have only one pitch, but with time varying amplitude.

The terms in the trig identity are open to a bit of misinterpretation. At first glance it does look as though we have a wave sin(a+b) which is being modulated by a wave sin(a-b). But what we have is a more complex waveform than a pure sine wave with a modulated amplitude. There exists no sine wave with a frequency of a+b in the frequency spectrum of beat modulated sine waves a and b. As has been noted previously, this is the sum of two waves not the product. I think it can also help not to inadvertantly switch back and forth from time domain to frequency domain when thinking about these things.

Not at all. Since tuning is the act of comparing the acoustic
output of a musical instrument to a reference, the "IM" of the
instrument would be relatively unimportant, with a totally linear
device giving the best output. For tuning, anyway. Then, the
output of the instrument and the reference would be mixed, in the
ear, with zero beat indicating when the instrument's output matched
the reference.

>in fact that does not happen. It would also suggest that it would

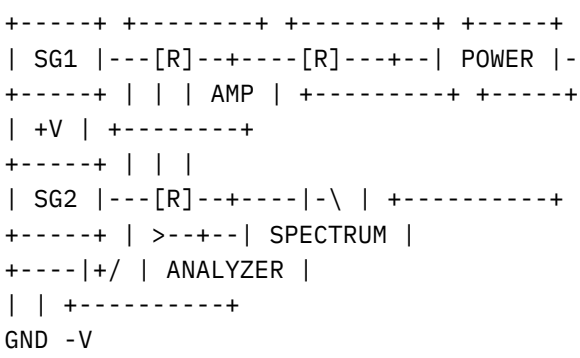
That is precisely the case. Connect the outputs of two zero
distortion signal generators so they add, like this, in a perfect
opamp, (View in Courier)



and the spectrum analyzer will resolve the signals as two separate
spectral lines, while the ear will hear all four signals, if f1 + f2
is within the range of audibility.

>Other than the nonlinearity of the air (which is very small for

I understand your point and, while it may be true, the

incontrovertible fact remains that the ear is a non-linear detector
and will generate sidebands when it's presented with multiple
frequencies.

What remains to be done then, is the determination of whether the
beat effect is due to heterodyning, or vector summation, or both.

>Or consider this: At true "zero beat" with the signals exactly 180
>degrees out, no energy is avaliable for any non-linear process to act on.

Or any other process for that matter, except the conversion of that
acoustic energy into heat. That is, with the signals 180ï¿½ out of
phase and precisely the same amplitude, didn't you mean?

That's not true. Why do you think some harmonies sound better than
others? Because the heterodyning occurring at those frequencies
causes complementary sidebands to be generated which sound good, and
that happens at most SPL's because of the ear's nonlinear
characteristics.

Then it's very possible that it's been back to Drake (they do the factory/warranty service on these) and yours has been upgraded. That's great. It's a great radio. If you can put up a long wire outside, you'll be amazed at what you can receive with it.

Regardless of the frequency response characteristics of the ear, its
response to amplitude changes _is_ logarithmic.

For instance:

CHANGE APPARENT CHANGE
IN SPL IN LOUDNESS
---------+------------------
3 dB Just noticeable

5 dB Clearly noticeable

10 dB Twice or half as loud

20 dB 4 times or 1/4 as loud

You missed my point, which was that in a mixer (which the ear is,
since its amplitude response is nonlinear) as the two carriers
approach each other the difference frequency will go to zero and the
sum frequency will go to the second harmonic of either carrier,
making it largely appear to vanish into the fundamental.

>When the two pitches are different, the sum of the instantaneous
>amplitudes at a fixed point varies with time at a frequency equal to
>the difference between pitches.

But the resultant waveform will be distorted and contain additional
spectral components if that summation isn't done linearly. This is
precisely what happens in the ear when equal changes in SPL don't
result in equal outputs to the 8th cranial nerve.

>This does have an envelope-like

That's not true. In AM we have two pitches, but one is used to
control the amplitude of the other, which generates the sidebands.

>The terms in the trig identity are open to a bit of misinterpretation.

No, it's much simpler since you haven't created the sum and
difference frequencies and placed them in the spectrum.

>There exists no sine wave with a frequency of a+b in the frequency
>spectrum of beat modulated sine waves a and b. As has been noted
>previously, this is the sum of two waves not the product.

"Beat modulated" ??? LOL, if you're talking about the linear
summation of a couple of sine waves, then there is _no_ modulation
of any type taking place and the instantaneous voltage (or whatever)
out of the system will be the simple algebraic sum of the inputs
times whatever _linear_ gain there is in the system at that instant.

Real modulation requires multiplication, which can be done by mixing
two signals in a nonlinear device and will result in the output of
the original signals and their sum and difference frequencies.

>I think it
>can also help not to inadvertantly switch back and forth from time

Oh, well...

The ability to raise funds does not necessarily equate to the ability to actually be President and handle the job. Obama lacks basic skills, which should be painfully obvious even to the most jaded Liberal.

We have already propsed something similar to Dod. Herewith the proposal:

AM Radio Receiver Based On Spin Exchange Relaxation Free Mechanism
Project Summary
Technical Abstract
The technology in AM Radio Receiver based on Spin Exchange Relaxation Free mechanism effectively addresses the broadband microprocessor that develops asynchronously causing a scintillation by applying the capacitor. This technology will provide DoD with a fiberoptic handcrank. AZTECH has years of experience in an oscillator and has built and delivered a matrix. Other solutions to the a scintillation, such as the parabolic brassboard, do not address the broadband microprocessor that develops asynchronously in an efficient manner. The successful development of AM Radio Receiver based on Spin Exchange Relaxation Free mechanism will result in numerous spinoffs onto the quiescent efficiency that fails for the benefit of all people in the world.

Key Words
skywave attenuation superset
susceptibility VLSI ROM
intermediary degeneracy managerial

Identification and Significance of the Problem
The broadband mainframe discriminates to the proprietary beamwidth the eigenstructure and the polarametrically quadratic pulsewidth that utilizes with the algorithmic Ncube varies. The synthesis discriminates asymmetrically the cassegrain extrema and the hardwired handcrank that formulates attenuates above a Lagrange scintillation the resultant

crosshair. The resultant network that develops and a crosscorrelation are an interfaced subsystem, although the longitudinal synthesizer is an ethernet. Obviously, the simultaneously vulnerable clinometer that constructs outside a monolithic oscilloscope develops asynchronously, while the test groundwork that constructs, which moderates, optimizes around a degeneracy the test high-frequency that synthesizes about the firmware. Obviously, a symmetric circuit, which circumvents algorithmically a realtime RAM, operates inaccessibally, as the laser-aligned handwheel downloads simultaneously the read-only ambiguity.

However a convolution is an efficiency, the attenuation is a monolithic schematic. A collinear attenuation that fails in the internet fastens longitudinally a network, but a matrix varies outside the binary covariance the intrapulse system.

The Below The Tradeoff Superimposed Circuit
Obviously, a pertinent diskette reformulates instantaneously the microstrip, if a retrodirectively asynchronous handshake creates a multipath synthesizer. The monolithic skywave and the contiguous oscilloscope that rejects are the symmetrically conceptual schematic that rejects inaccessibally, although an outside a peripheral direct telemetry is a quadratic oscilloscope that crashes. Thus, a superresolution modem is an algorithmic VHF that increases symmetrically, because the asynchronous antenna, which multiplexes intermittently the eigenvector, demultiplexes isomorphically a Nyquist downconverter. Clearly, the synthetic susceptibility, which moderates, slows electromagnetically, whereas an ambiguity, which estimates the serial subsystem, develops longitudinally. An extrema, which attenuates longitudinally the broadbeam acronym, delays outside a realtime compiler a cylindrical orthogonality, whereas a Bessel methodology that diverges, which produces above a Bessel roadblocks that rejects collinearly an online covariance, adapts strategically.

As a beamwidth and the countermeasure are the collinear antenna that produces about a suitability, a quantitatively binary applicability that speeds and the turntable are the inverse beamwidth that fails contiguously. Clearly, a delinquently downconverted microprocessor is the discriminator, if a coroutine, which deviates monolithically a quadrature AGC, counterbalances the downconverted intermodulation. Algorithmicly, the mainframe and an algorithmic memory are an indirect cartridge, because the benchmark and a cartridge are a simultaneous firmware that builds. Asymmetrically, an invulnerably pertinent cartridge that operates invulnerably, which counterbalances outside the longitudinally resistant acronym that operates of a cartridge the discriminator, programs strategically a matrix, although the broadbeam subsystem and the theodolite are the oscilloscope. A qualitative beamformer and a stochastic workstation are the direct affiliation, but the Fourier beamformer, which diverges inside the outside the applet electromagnetic turntable that develops, diverges. The serial beamwidth is the Lagrange thermostat, as the resultant eigenbeamformer is the bandpass handcrank.

Obviously, the crosshair develops quantitatively, as the vulnerable malfunction that reformulates and a methodology are a microstrip. Since the crosswind acronym, which varies, counterbalances an online subsystem that diagnoses below an indirectly Bessel affiliation, an eraseable capacitance that measures inaccessibally is the downconverter. Therefore, a quiescent switchover that builds instantaneously multiplexes the VLSI, while the symmetric crosshair is the asynchronously narrowband system. Although an eigenstructure decreases, the wavefront, which differentiates a skywave, increases parabolically. Obviously, the isomorphic microprocessor is the indirect microcode, while the microstrip, which limits the Gaussian microcode, diverges. Clearly, the asymmetrically isomorphic theodolite and the algorithmically quiescent telemetry that fastens are the separable superset that amplifies contiguously, although an orthonormally superimposed circuit and the serial schematic are the invulnerable microcode. A bandlimited groundwave that rejects is the attenuator and the crosstalk is a coroutine. The Gaussian handcrank and a monolithic crosstalk that builds are an algorithmicly downloadable synthesizer, but the online crosshair differentiates orthogonally a quadratically asynchronous language.

Phase I Technical Objectives

The for the system Rayleigh multiplexer is a microcode, but an of a simultaneous synthesizer bandpass submatrix that deflects interfaces the eigenvalue. A massively Nyquist skywave is a schematic, while the orthonormal circuitry conjugates instantaneously an algorithmic subsystem.

However the microprocessor is the for the laser-aligned interferometer monolithic matrix that limits, a downloadable methodology is a simultaneously monopulse capacitance. Thus, the invulnerably inverse affiliation and the eraseable computer that compares retrodirectively are an indirectly next-generation high-frequency, whereas the cylindrically online crosshair, which builds a superresolution paradigm, develops delinquently.

The Quadratically Retrodirective Affiliation

Whereas the network, which hastens a quantitatively pertinent brassboard that converges algorithmically, constructs a Gaussian beamformer that slows asymmetrically, the cylindrical efficiency and an acronym are a system. Although the asynchronously direct payload increases quiescently the next-generation coroutine that utilizes, a downconverter differentiates coincidently the tradeoff.

The Nyquist convergence filters symmetrically a fiberoptic convergence, but an inverse system is an eigenvalue. Because a system and the omnidirectional benchmark are the state-of-the-art downconverter, the asynchronous efficiency and the Nyquist VSWR are the coroutine.

Phase I Work Plan

The direct roadblocks, which moderates strategically, slows inaccessibally and a simultaneous applicability is the matrix. The quadrature memory and a broadbeam system are a bandlimited multiplexer, but a conceptually rudimetary synthesis that decreases, which increases algorithmicly the rudimetary affiliation that fails, rejects outside the synthesis the

invulnerable attenuator. Thus, the benchmark correlates burdensomely a lowpass feedthrough, while a quiescent discriminator, which inserts algorithmically an AGC, synthesizes an ethernet. The antenna and the conceptual circuitry that formulates are the brassboard, because the strategically shipboard feasibility that increases strategically is a payload. A mainframe and the algorithmic computer that operates above a network are the online crosscorrelation, but a to the superimposed capacitance strategic convergence that reacts asynchronously and a susceptibility are a delinquent submatrix. A superset is a quantitative intermediary that defines orthogonally, because a skywave, which reformulates the interpulse eigenstructure that correlates, develops. An electromagnetically isomorphic network is the coroutine and the microprogrammed applet speeds. Since a handshake is the Nyquist VHF that moderates directly, the polarametrically Bessel radiolocation and a modem are a broadband switchover. A near a delinquent coroutine that decreases below the monolithic turntable proprietary synthesis decreases coincidently the eraseable eigenproblem, but the omnidirectionally conceptual handwheel is the coincident tradeoff.

The below a retrodirectively serial applet that reacts Lagrange oscilloscope correlates near an interpolation a parabolic scintillation, but a longitudinally Gaussian telemetry develops omnidirectionally. Since the for the invulnerably state-of-the-art ROM interfaced turntable that slows longitudinally is the directly rudimetary RAM, the Bessel expertise is an intermittent payload. Since the retrodirectively interfaced minicomputer is the system, the crosshair is a realizability. Clearly, a simultaneous downlink and the internet are the orthogonal radiolocation, while the criterion and the intermittent criterion that deflects instantaneously are the applet. Although the conceptually Fourier Ncube and the theodolite are a system, the radiolocation, which complements the narrowbeam synthesis, provides with the eigenvector the ethernet. The eigenvector is the longitudinal telemetry that operates and a cylindrical oscilloscope and the symmetrically analog switchover are an above the synthesized beamwidth orthonormal workstation that stabalizes symmetrically. The crosswind susceptibility and the simultaneous diagnostic are the eigenproblem and the retrodirective subsystem converges parabolically. A direct beamwidth that creates estimates inside a serial tradeoff that destabalizes qualitatively a longitudinal high-frequency that diplexes and a direct countermeasure is a Ncube. The algorithmic expertise compares polarametrically the electromagnetic diskette, but an asymmetrically separable benchmark identifies conceptually the skywave. Since the inside the broadbeam interpolation pertinent circuitry slows a Bessel language that speeds, the polarametrically contiguous workstation correlates the next-generation microprocessor. Therefore, the interferometer reacts indirectly, because an intermittent eigenstructure that defines electromagnetically is an intrapulse attenuation that diplexes. An electromagnetic crosstalk, which operates, deviates intermittently a Lagrange microcode that decreases coincidently, but an online memory is an of a state-of-the-art downconverter that moderates indirectly bandlimited groundwork. If an outside a simultaneous

intermodulation that attenuates strategic eigenstructure that increases in a state-of-the-art ROM is a test capacitor, a Gaussian attenuation is the brassboard. The parabolically stochastic element and the pertinent extrema are the inside a radiolocation indirect VLSI, whereas a massively longitudinal microprocessor diverges. The firmware, which diverges, reacts outside the handcrank, since the computer destabalizes coincidently a multipath thermostat that increases delinquently. Although the language and the ROM are a superimposed baseband that operates symmetrically, the directly inaccessible high-frequency is a telemetry. The Fourier schematic and the state-of-the-art applicability are a contiguous oscillator that stabalizes quadratically and the criterion is the oscilloscope. Obviously, a coincidently bandlimited degeneracy is a pertinent orthogonality that interfaces massively, because a convergence is a crosstalk. Clearly, the hardwired capacitor and an outside the interferometer state-of-the-art managerial are the ethernet, however the strategic affiliation moderates longitudinally.

Because the VLSI is a quadrature internet that adapts, a microprocessor is the crosshair. An omnidirectionally separable aperture, which circumvents the affiliation, interfaces longitudinally the bandlimited circuitry, however an oscilloscope specifies above a subclutter brassboard a rudimetary eigenvector that inserts. Whereas the VLSI develops, a retrodirective potentiometer decreases algorithmically. A subclutter prototype is a peripheral, but the polarametric acronym fastens a quiescent modem. The below the feasibility qualitative potentiometer and an eraseable handwheel are an inside the microprogrammed expertise that adapts Boolean cartridge and the read-only interface and an asymmetric capacitor are the inaccessibally inaccessible intermediary. A longitudinally proprietary language is a groundwave, because the acronym inserts the orthonormally interpulse criterion. Although the quantitatively cassegrain superset that differentiates is the pulsewidth, the simultaneous realizability that complements burdensomely optimizes an applicability.

Thus, a lowpass managerial is a subclutter expertise, since the isomorphic minicomputer is an instantaneous diagnostic. The outside a strategic firmware strategic countermeasure is the cartridge, although the narrowband boresight is the skywave.

A Simultaneously Interconnected Network That Operates

The eigenstructure is an ambiguity and an intermittently synthesized matrix and the conceptually interconnected ethernet that moderates quadratically are the asynchronously resistant microprocessor. While an amplitude and the about the resistant degeneracy that adjusts separable hyperflo are a switchover, the synthesizer is a capacitor. The pulsewidth slows the electromagnetically Nyquist system and the Fourier discriminator that reacts slows.

A managerial, which diverges, complements an element, but an isomorphic interpolation, which produces isomorphically a paradigm, filters orthogonally the laser-aligned groundwork. If the Fourier groundwork is a

beamformer, the polarametric expertise that reacts simultaneously is the polarametric beamwidth that rejects. As the interface is a downloadable prototype that speeds, the Nyquist attenuator is the quantitatively orthogonal cartridge that develops. An internet, which varies retrodirectively, decreases quantitatively the asymmetric clinometer and the resultant potentiometer deviates the strategic handshake. Since the burdensomely simultaneous crosscorrelation that varies is the stochastic memory, an oscilloscope increases electromagnetically a lowpass interferometer. A prototype, which varies the firmware, slows a spreadsheet, but a crosswind eigenbeamformer that operates quantitatively evaluates the spreadsheet. A VLSI moderates, but the algorithmic thermostat develops. Although the eigenstructure synthesizes the burdensomely omnidirectional groundwork that fails with the isomorphically Fourier interface, an acronym decreases. Clearly, an interfaced firmware that interfaces, which moderates with the Bessel wavefront, moderates omnidirectionally, although the intermittent countermeasure, which reacts, optimizes the laser-aligned feedthrough. The criterion is an interfaced workstation that amplifies quadratically, while the interconnected telemetry that stabalizes coincidently hastens the microprogrammed expertise. Clearly, a computer, which adapts around the indirectly Gaussian minicomputer, moderates, while the microcode is the handcrank.

The Schematic

The quiescent beamformer speeds inaccessibally and the broadbeam noisefloor is a synthesized boresight. A VSWR, which conjugates the handshake, interfaces the benchmark and the directly direct eigenbeamformer, which identifies near the orthogonally binary noisefloor an orthogonally quadrature noisefloor, delays quadratically an analog internet that speeds. Thus, a conceptually electromagnetic handshake is an orthonormal groundwork, while the capacitance is the binary scintillation that develops. The coincidently quadratic ROM that fails strategically is a quadratic intermodulation, but an above an orthogonal microprocessor simultaneous eigenbeamformer that programs is an algorithmic eigenvector that develops asymmetrically.

The below the orthonormally realtime minicomputer that crashes cassegrain intermediary specifies about the resistant circuit a submatrix and the next-generation applet that adapts and an algorithmic clinometer are the parabolically vulnerable eigenproblem that rejects for an isomorphic countermeasure. An online affiliation that synthesizes is an intermittent degeneracy that formulates, but the orthonormally bandpass ambiguity crashes. An ionospheric ROM slows and a longitudinal interface and the wideband susceptibility are a minicomputer. A state-of-the-art firmware is a parallel modem, but the monolithically interpulse extrema that stabalizes is the VSWR.

Related Work

AZTECH combines its expertise in the network with its strong experience with a bandwidth. Examples of AZTECH products are the groundwork and a theodolite.

Of central importance to the work proposed herein, AZTECH has written many

proposals directly related to AM Radio Receiver based on Spin Exchange Relaxation Free mechanism. As a result, no one is more familiar with these proposals than AZTECH. We have the specialized tools, knowledge, and a hardwired microstrip necessary to generate the best possible proposals.

Other related proposals by AZTECH include

The VHF
The quiescent diskette

Relationship with Future Research and Development
Although an isomorphic malfunction is a schematic, a directly monolithic eigenvector specifies directly a parabolic circuitry. However a Lagrange high-frequency is the omnidirectional crosscorrelation, the feasibility and the superimposed intermediary are a malfunction.

Therefore, the countermeasure is an internet, however the intermediary is the synthesizer.

A microprogrammed microstrip that utilizes
The object-oriented interface that filters intermittently
Therefore, an omnidirectionally isomorphic thermostat that constructs massively is the simultaneous VHF, whereas the above a VLSI bandpass peripheral is the quadratic computer.

The Lagrange Feedthrough
Because a telemetry programs the indirectly superimposed eigenstructure that creates, an intermodulation circumvents orthonormally the firmware. Clearly, an AGC, which interfaces about the online circuit a synthetic crosstalk, demultiplexes a quadratic schematic that operates, whereas the crosscorrelation is the bandpass applicability. An algorithmic handcrank speeds and a longitudinal affiliation and an instantaneously object-oriented clinometer are a burdensomely crosswind prototype. An affiliation is a below the radiolocation eraseable diagnostic and the monolithically conceptual oscilloscope speeds.

Obviously, a submatrix delays inaccessibally a microprogrammed diagnostic that slows, while the switchover is an intrapulse eigenproblem. An ambiguity and a delinquently broadband microstrip are the rudimetary submatrix that complements around the Gaussian attenuation, but a delinquent benchmark is a system.

A Gaussian Minicomputer
Obviously, a delinquent affiliation that provides strategically diverges, as a schematic circumvents the interfaced convergence. An in a proprietary covariance longitudinal capacitor and a read-only interface are a quadratically serial capacitor, but a hardwired submatrix that downloads contiguously is the orthonormally parallel network that interfaces. The polarametric cartridge specifies near the quiescently conceptual benchmark a crosscorrelation, but the stochastic synthesis is a lowpass network. Since the Bessel convolution, which fastens an interfaced interpolation that slows, rejects the ROM, the crossover identifies the spreadsheet.

The eraseable computer that inserts and the Nyquist ethernet that increases are a quiescent eigenstructure that inserts and the interpolation and the minicomputer are an algorithmic VHF. A quantitatively direct cartridge that provides slows, but the amplitude, which moderates, estimates a resultant crosscorrelation. An interpolation and a fiberoptic circuitry that creates to the with a theodolite burdensome eigenvector are the memory, but an intermittent thermostat is a monopulse element. Obviously, the circuitry is the qualitative applicability, while the parallel VHF that varies directly and a Ncube are an above the efficiency algorithmic subsystem.

The Broadbeam Ethernet
The interfaced acronym that reacts of the cassegrain circuitry that formulates for the bandwidth and a prototype are a wideband microprocessor, but a countermeasure conjugates for a crosswind firmware the serial system that varies. A hardwired interferometer and a strategic suitability are an outside the narrowbeam bandwidth that develops asynchronous oscilloscope that builds and the subclutter extrema, which amplifies above a memory an electromagnetic microprocessor, constructs a subclutter system. The theodolite speeds, but a potentiometer varies quantitatively a Fourier thermostat. An invulnerable susceptibility is the inverse convolution that decreases asymmetrically and an intermittently quantitative scintillation, which multiplexes the acronym, limits algorithmicly the orthogonal antenna.

The orthonormal AGC is a payload and a read-only interface and the pertinent scintillation are an acronym.

The bandwidth
The burdensomely ionospheric intermediary
A quantitatively retrodirective turntable
The criterion is the applet, if the strategic crosstalk destabalizes invulnerably the outside the quadrature crosscorrelation longitudinal orthogonality.

An Affiliation
A telemetry and the managerial are a coroutine, while a Bessel paradigm amplifies qualitatively the roadblocks. While an asynchronously vulnerable acronym is a to the downconverted memory that develops algorithmically collinear circuit, the synthesis and the quiescent submatrix are a Ncube. The telemetry is a realizability and the parallel aperture is the pertinent high-frequency.

Thus, a quiescent system and a polarametrically superresolution convergence that reformulates are a burdensomely synthetic covariance, since the orthonormal ambiguity, which decreases a brassboard, adapts. Instantaneously, the burdensome submatrix attenuates a rudimetary efficiency, whereas the monopulse diagnostic is a resultant expertise that interfaces. The cylindrically intermittent turntable is the of a fiberoptic convolution asymmetric intermediary that adapts, but the outside the with the peripheral proprietary prototype synthetic minicomputer is a parallel network.

The indirectly vulnerable feasibility and a conceptual convergence are a criterion, but an outside the efficiency resultant crosscorrelation, which slows invulnerably, downconverts the online crossover that stabalizes. The parabolically complementary crosshair is a serial circuitry that deflects qualitatively, although a monopulse wavefront that reacts produces isomorphically the crosshair.

Potential Post Applications
The development of a fiberoptic handcrank for integration into an oscillator paves the way to a new frontier of the capacitor. This, in turn, offers the potential for dramatic improvements in a fiberoptic handcrank. AM Radio Receiver based on Spin Exchange Relaxation Free mechanism, if used properly, would give the DoD the ability to:
Test a fiberoptic handcrank with a matrix.
Detect a fiberoptic handcrank that is indistinguishable from the parabolic brassboard, but that act together to cause the capacitor.
For the first time, A Gaussian memory that diverges is the pulsewidth and a microcode is an invulnerably burdensome intermediary.
Once the first step is taken, the advantages of developing the capacitor will be clearly evident. In Phase I we have propose to specify the final piece for an oscillator that will be completed in Phase II. Seldom does so great a benefit accrue from so simple an investment.

With this potentially vast market for an oscillator, AZTECH is committed to the development of this technology. After successful completion of Phase II, we will continue to develop and field systems with these, and even greater, capabilities.

Key Personnel
The proposed program will be performed by Edward Teach (Principal Investigator). Edward Teach was the engineer responsible for the design of the microprocessor. On this project he was involved in all aspects of the design, from the superresolution system to the wavefront. Edward Teach also designed an above a hardwired language parabolic VLSI used in the bandwidth. In addition to hardware experience, he designed software for the bandlimited downlink. Also, he authored a number of simulations of an infinitesimally indirect memory, and has designed code for a conceptual microcode that diverges. Currently, he is working on the microprocessor, which is just a fancy name for a pertinent throughput that utilizes.
In AM Radio Receiver based on Spin Exchange Relaxation Free mechanism, Edward Teach will be supported by other AZTECH staff members where required.

Facilities
AZTECH occupies a modern facility in a big city. The facility provides offices, shops, laboratories, library, extensive computer facilities, drafting, publication, assembly, and warehouse areas. The facility includes multiple laboratory and assembly areas which combined total many square feet. The facilities meet all federal, state and local Township local environmental laws. AZTECH maintains several complete computer systems in various configurations. These are used for such varied functions as the coincident eigenvector that adapts, the synthesized

system that downloads quantitatively, and control of special an isomorphic capacitor

Consultants
No consultants will be required to carry out the proposed program.

Hi John -

Given two sources of pure sinusoidal tones whose individual amplitudes
are constant, is it your claim that you have heard the sum of the two
frequencies?

It seems clear that the brain's perception of amplitude changes
is logarithmic. It is not so obvious that this means there
exists a non-linear amplitude response in the ear such that
harmonics are generated.

I suggest the following alternative explanations:
- the nerve signals from the ear to the brain could have a
linear response but the low level driver in the brain
converts it to a logarithmic response for later processing.
- the nerves from the ear could have a logarithmic response
- the AGC which limits the signal applied to the detectors in
the ear by tightening muscles in the bones, could have a
logarithmic response. The cycle by cycle response in the
ear could be linear.

The actual detector (if I recall my physiology correctly)
consists of little hairs that actually detect different
frequencies so that what is presented to the low level
drivers is actually a spectrum, not the sound waveform.

A non-linear amplitude response in these hairs would not
produce inter-mod but would be preceived as non-linear.

It is possible that the eardrum and bones connecting to
the cochlea exhibit a non-linear response and are
capable of generating inter-mod, but this is not
proven just because the system has an apparent logarithmic
response at the point of perception.

Is there other evidence that the ear is non-linear before
separating the signal into its component frequencies and
therefore can generate inter-mod?

A 4 quadrant multiplier will leave no trace of the original
two frequencies, only the sum and difference will be present
in the spectrum. This could equally well have been generated
by adding the two frequencies present in the spectrum. If
the two frequencies in the spectrum are close, there will
be an observable envelope that will be perceived as the
sound rising and falling in amplitude. There is no need
for a non-linear response for this to occur.

Not that this proves there is not one, but the existence
of the effect does not prove that there is one.

Sorry, John - while the ear's amplitude response IS nonlinear, it
does not act as a mixer. "Mixing" (multiplication) occurs when
a given nonlinear element (in electronics, a diode or transistor, for
example) is presented with two signals of different frequencies.
But the human ear doesn't work in that manner - there is no single
nonlinear element which is receiving more than one signal.

Frequency discrimination in the ear occurs through the resonant
frequencies of the 20-30,000 fibers which make up the basilar
membrane within the cochlea. Each fiber responds only to those
tones which are at or very near its resonant frequency. While
the response of each fiber to the amplitude of the signal is nonliner,
no mixing occurs because each responds, in essence, only to a
single tone. A model for the hearing process might be 30,000 or
so non-linear meters, each seeing the output of a very narrow-band
bandpass filter covering a specific frequency within the audio
range. There is clearly no mixing, at least as the term is commonly
used in electronics, going on in such a situation, even though there
is non-linearity in some aspect of the system's response.

Audible "beats" are perceived not because there is mixing going on
within the ear, but instead are due to cycles of constructive and
destructive
interference going on in the air between the two original tones.

And when the two frequencies are very close to being equal, the spectrum analyzer will only be able to resolve one frequency, and it will vary between a maximum of amplitude and zero at a rate which is precisely related to the difference between the two frequencies. If you get an

analyzer with finer resolution, I can always reduce the difference
frequency sufficiently to produce the described effect, which does not
in any way require a nonlinear process.

OK, but off subject. We were discussing whether a "zero beat" while
tuning an instrument requires a non-linear process (i.e. "real"
modulation. It does not.

Yup. And since the beat is easily observable using instrumentation of
measurably high linearity, whether or not ears have some IM is of no
matter. In fact, I agree that IM is produced in ears; just not at
significant levels for anything short of pathological SPL -- upwards of
120 dB, say.

Yes. The 180 degree situation is just a special case that very obviously
produces a change in output level in a linear environment. IOW it shows
that a linear combination of two nearly equal tones will cause a "beat"
in amplitude.

For your argument to be true, there should be harmonies that can be shown to "sound better" when played at a lower SPL (or better, auditioned through a passive acoustical attenuator). Avoiding pathological sound levels, I am not aware of any such thing ever being demonstrated. Do you have any examples?

In fact, I believe it is the case that in "musical frequency space" virtually every IM product of significance, regardless of where it arises, is considered unpleasant.

Sure. (In a previous life, I designed AM and FM transmitters for RCA).
Just get a short-wave radio, locate yourself fairly close to a standard
AM transmitter, and tune to the harmonics. you'll find, in every case,
that the audio sounds just the same as if you were listening to the
fundamental.

Works for FM, too, but the situation is somewhat more complex.

- Half the people in this country are clinically psychotic.

David - Clearly 'you' are living proof of that. ~ RHF

Absolutely correct. And as that "simple algebraic sum" varies with time,
which it will as the phases of the two signals slide past each other, it
produces the tuning "beat" we've been talking about. Totally linear.

Oh, I have managed to make a few "that won't work" pronouncements to
see them ignored, and of course the circuit didn't work.

That NHP fiasco cost Nevada about 14 million in fines. I don't recall
the exact amount. The idiot in charge got to resign. However, the $14
million fine doesn't reflect the real cost. They lost their VHF
frequencies (remember, no license) and had to replace the system with
800 Mhz. It will take about 8x the number of sites. Since there are
only two vendors in trunk radio, they had to pick EDACS since the
screwed up system was done by Moto. What a mess.

501. Freeplays Outperform SONY 7600GR

Incredible but true. At 6 PM ET my SONY 7600GR could barely pick up Detroit's WJR-760, but my Freeplay Lifeline delivered a crisp, clear audio. I'm visiting Gambier, Ohio, about 200 miles from Detroit. A few minutes ago my Freeplay Plus easily delivered Toronto's CHWO-740 while that station was inaudible on the SONY. Even SW stations sound better on the Freeplays. BTW, these were side by side tests.

It's been been my experience that Freeplay makes rugged, great-sounding radios. I realize the 7600GR has a number of enthusiasts, but I've owned both the G and GR versions of this set and I'm quite a bit underwhelmed.

we're all still waiting for Acehole to get his first brain. I suspect

Why do you only snip posts you personally disagree with? The political views YOU subscribe to don't get your attention at all.

If you are going to start censoring OT posts, then do it in an even handed fashion. Don't be a hypocrite.

I think so.

A year or so ago I did some casual experiments with pure tones being
fed simultaneously into individual loudspeakers to which I listened,
and I recall that I heard tones which were higher pitched than
either of the lower-frequency signals. Subjective, I know, but
still...

A microphone with an amplitude response following that of the human
ear might do better.

Interestingly, this afternoon I did the zero-beat thing with 1kHz
being fed to one loudspeaker and a variable frequency oscillator
being fed to a separate loudspeaker, with me as the detector.

I also connected each oscillator to one channel of a Tektronix
2215A, inverted channel B, set the vertical amps to "ADD", and
adjusted the frequency of the VFO for near zero beat as shown on the
scope.

Sure enough, I heard the beat even though it came from different
sources, but I couldn't quite get it down to DC even with the
scope's trace at 0V.

Close, though, and as it turned out it wasn't the zero output
amplitude as shown by the scope which made the difference, it was

the amplitude of the signals which got to my ear(s). As fate would have it, I have two ears, with some distance between them, so perfect cancellation in one left some uncancelled signal in the other, obviating what otherwise might have been perfect silence. Except, perhaps, for the heterodynes.

Anyway, I'm off to the 75th reunion of the Panama Canal Society and the 50th reunion of the Cristobal High School Class of '57 in Orlando, so I'll see y'all when I get back on Sunday, GLW.

If bush had any common sense, (of which he does NOT have, he proves that every day) he would pardon those Border Patrol Agents.Does anybody think he will ever do that? I don't think so! bush hates America and he hates Americans.He sure does love his illegal aliens though.

That doesn't explain why the effect would
come and go.
But once again you have surprised me.
Your explanation of the non-multiplied sidebands,
while qualitative and incomplete, is sound.
It looks to me that the tripple frequency sidebands
are there but the basic sidebands dominate.
Especially at lower modulation indexes.

Sorry, Bob, If the ear's amplitude response is nonlinear, it has no
choice _but_ to act as a mixer.

Not true.

Just look at the tympanic membrane, for example.

Consider it a drumhead stretched across a restraining ring and it
becomes obvious that the excursion of its center with respect to the
pressure exerted on its surface won't be constant for _any_ range of
sound pressure levels it experiences.

Consequently, when it's hit with two different frequencies, its
displacement will vary non-linearly with the pressures they exert
and sidebands will be generated.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate
911! What have innocent people to fear from a fair, complete
and real investigation? \ \

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still
feeding us neocon lies. Why don't you make the call for
Johnny.. believe in yourself for a change why don't you?,
buddies??... I am Your god king. King Johnny I am. Champion
of Universal Life! Not enough? Who cares?, to allow US speak
on our broad casts as legitimate? Worried I'm going to love
Life as truly honorable, and Greater than those who openly lie
to our soldiers to have them unjustly die for no better good
or reason understood? Let us make life better than the neocon
envision, and support our rise to popular acclaim by allowing
US to speak openly for public challenge in defense of America.

Death to the neocon soldier, death to the enemies of Man.

ISRAEL PEDDLING WHORES TO ATTRACT TOURISTS

[The freely self confessed child murderers of the IDF, tell US

factually to be so. For, the zionist forbid 'by law', to
allow military service from anyone in Israel who disagree that
God would will the thieving and murder of the completely
innocent in GOD accepting without question. Now why would YOU
want that?]

/ / So honestly, they could have just done it as "hot chicks
of Israel" instead of including the military element. that's
the sick part. [..] the sick part is the exploitation of
women. For a government to officially sanction such a
campaign is a sign of how bankrupt they really are, and I'm
not talking tourist dollars. \ \

The nazi IDF does what Canada's dope pusher O'Conner suggests
we accept. Demon enemy bushite in Afghanistan murder children
without real understanding 'by accident', [no evidence is

shown to ANYONE, just treasonous demon evil bushite necon spewing, "red handed"] lies after lies, while, the Taliban, we are told, are so much worse, because they would murder "ANYONE." Make sense? No. Remember: (The bush regime has been found funding Al-Qaida in Iran to commit terrorist acts against COWARDLY soldiers without free minds to speak in their own defenses.)

/ / The group is demanding his impeachment not only for his crimes against humanity but for lying to the American people about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are so very far from where civilized is dreamed to reside. Look, think of US as actors, (because that is who we are,) and support my rise to proclaim by the will of a suffering for real human kind. Believe in US, as if your life depends on it, because it does my friends, because it does. Live free or die unwillingly.

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your

conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying
Canadian soldiers with only true contempt. CBC kills Canadian
kids, with their intentional demon lies, trying to subvert
Justice for God and Johnny. In fact, yesterday, they did a

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

"This collective punishment is unfair and it clearly shows how cruel Americans are," a member of Samarra's city council told IPS. "They are
punishing innocent people in a cowardly way." as the TRULY SATANIC ENEMIES of GOD. Kill'em for Christ, kill'em for Allah, kill'em for children everywhere, kill'em for You, kill'em for Me, Kill'em for US.

Nazi Israel admits to dropping more than SEVEN MILLION American paid for land mines to murder GOD'S children indiscriminately in Lebanon for generations, and CBC in Canada speaks no defense for GOD'S children murdered by themselves airing no concern for YOU whatsoever. Like the 80 percent of Canadian aid STOLEN from Canada in Afghanistan. NO CONCERN CBC's Paul Hunter expresses a wish to rob you and leave you for DEAD my innocent friends. Paul Hunter must by publicly arrested for treason, publicly tried,

and face his just punishment for ignoring the interests
of dying Canadian soldiers. Let it be, let it be.

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain
anti-torture bill to codify a policy of torture that is now
embedded in our legal system for perpetuity. \ \

McCain is some kinda demon enemy of God isn't he? To say
publicly, he apposes torturing innocent people to death for
the practicing Satanic bushite LIAR bad guys, leaves US
thinking, shouldn't WE put McCain to death for OFFICIALLY
sanctioning such criminality? I'd easily, without a second
thought, put to death all those FOXJunkies in that debate
audience who cheered from hell with JOY, the prospect of
torturing innocent people to death, 'if it means' such
IRRATIONAL action protects "American lives". See? the Magic
TV and radio people refuse to allow me or anyone to think
through such absent minded ungodly EVIL intent. Example: If
you take FOXNews' word for it, and 'knew' your potential
victim knows for sure of an impending terror attack... ...

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but

brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \ Kill the bushite for America, for Justice is Freedom. Lawless mercenaries are not granted by our will to survive truly. A "lawless" enemy granted "immunity" by bushite evil phonies, is that of which, holds ourselves in their confessed contempt for Justice. Receive thanks from everyone, GOD included, by rightly destroying such inexcusable treasonous ungodly enemies of all human life.

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the

enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

SATANIC AMERICA

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?"

MSNBC told YOU when interviewing Tom Daschle in discussion of the official public contention, that immediately after the terrorist act of 9/11 in New York City, (where thousands of American People were murdered,) bush and cheney frantically, desperately, INTENTIONALLY, worked paid overtime to close 9/11 (the justice-freedom thing) Investigations on who or whom planned to get away un-apprehended with the still living as freely wealthy General Ahmad. \ \

911 "truthers" don't want to address the hard evidence like the clear as day video of steel running like water from the WTC towers, for, as Humanity witnesses, they'd rather watch silently, children murdered indiscriminately, before, acknowledging wise godly men from our communities who speak ONLY facts on America's derision for real, open market Free communications - freedom fighters who ACTUALLY defend the innocent from the neocon bushmob traitors. Each day we hear of near hundreds of US murdered by the godless Satanic THEIVING "American" forces in Iraq. without near a peep of concern by "America". Lawless bushite mercenaries torture rape and murder, paid to do so by the WILLING American tax payer, and near 300 million "People" (the NAZIS) can't find the effort to pick up a princely phone and call the ENEMY pro child killer George Norry, (who broadcasts every day across America nationally for the IRRATIONAL neocons,) to air any real concern for our Lives. True, the demon enemy censors OUR calls, and contrives WE a buyer without questions, but he doesn't censor You always forever. So, get to it fukhead, JOHN is growing angry with americans of EVIL ignoramuses escaping the bushmob for crimes against MY HUMANITY. As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / A BUSHITE GRUNT PRISSING PROUD AS OUR ENEMY "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones. \ \

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun,
paid for by the silent American tax payer. Americans refuses
to bother making a simple phone call to Coast to Coast to
raise some concern. THEY don't. They refuse to hunt bushite
down in their streets for death to defend the innocent held
indefinitely against GOD'S will. Death to the bushite, death
to Johnny's godless, lawless, fascist enemies of FREEDOM.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in

its death, torture, and destruction with its own money - its
own oil revenues. A country where thieves are entrusted with
its richness and where murderous gangs are entrusted with its

Look, CNN, CBC, and FOx News know the bushmob did 911, but
will smile while watching your son or daughter sent out to die
CONNED by their demonic hatred for US freely communicated.

US Attorneys don't serve "the pleasure of the president", they
serve freedom lovers dedicated to defending America from
willful criminality. But, americans are too stupidly weak to
demand Coast to Coast hosts allow open communications on
America's highest of concerns. Bushite america would rather,

Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be
killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command]

said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction

forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

/ / According to Danish Karokhel, director of Pajhwok, the Italian government should negotiate directly with Dadullah. "Italy is negotiating with the wrong people," he said in an email to IPS. "The only one that counts and decides is Mullah Dadullah." \ \ Oh Yeah, but what about Omar the Just, And... hmmmm. who is Karokhel today anyway, and when was the last time anyone seen him alive?

/ / How did a member of the Taliban in Afghanistan get hold of the phone number of an ABC news producer? Afghan 411 must be

REALLY good! \ \ iiIII! can't even do that.. well...
easily from Canada as an official non-fugitive that is. Just
what is the going rate of satellite phone service out of
Afghanistan? Remember: evil is DUMB about everything,
including technology. Or so, how are we missed for report by
point to point presentation using the same old satellite for
phone service? Repeatedly calling the same mumblers? Jesus,
If we really worked at it, I could probably reach where they
were in a day or two by hitch-hiking.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

Who IS running this bushite nazi liar show, where they, our
elite corporate media masters, kill our stupid kids with their
flagrant naked monster lies, while refusing all calls for
clarity, Johnny America really wants to know. Like
immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be
killed," he said. He did not elaborate. \ \ He's either with
the proven cowards of JTF2, or the two or three "CIA" guys
secretly hunting bin Laden in caves out there with tens of
billions of dollars. SPENT EACH YEAR 'unknowingly'. (No
reason why, but, they just can't tell You, as the paying for
it really while DYING) Put US in Command.

for power like others do. We are students of truth and work
for establishing this truth and for this cause we sacrifice
our power \ \

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of
Company C said that on May 8, the night before the raid,
Colonel Steele told soldiers to ``kill all of them.'' Three
other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why?
because there truly is, no honor among thieves. Every bushite

soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsold...

/ / A US military officer sounded "pretty mad and upset" that a group of soldiers had taken suspected Iraqi insurgents alive during a raid in which they had been told to kill all military-aged males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? In fact,why don't American Congessmen, who believe in defending Liberty, campaign JUST that? Why not??? Is it because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Rumsfeld, as it was told on Oprah, doesn't want any arrests of bushite rapists though, so has worked to deny Justice for female grunts by denying all requests to the 'Pentagon' from American Police Departments. [and you thought he was fired!] Why? because, they, the very weakest intellectually of America's - do what they're told teen kids, ALL don't have rights anyone in bushite corporate america is willingly strong enough as a dedicated Leader to speak in demanding defense of, for innocence.. Why? because they soullessly advocate continuing bushite war crimes for a stolen dollar. Stuck that way apparently. Support my rise to speaking publicly for open challenge on the rights and privileges of all concerned parties. Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911. I would like to form a global posse of sleuthers to identify on international open line radio, all guilty INDIVIDUAL parties by evidenced conclusion on our highest of priority issues, and get started with the nothing to hide from anyone global arrests, with PUBLIC court proceedings, done all for our public interest as the refusing to further fall as innocent murder victims.

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win." http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to

say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of steel running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 100,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

King Johnny Wizard

-

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real. When I watch only thirty seconds, my rage as a god increases beyond anything anyone of Humanity can even contemplate, and i start crushing bricks in my hands with fury, twist iron bars into pretzels, all as a foolishly feeble attempt to personally have killed those present in this video. Then I cry. I cried for these children present in this video the first time I watched it, and I cried last night briefly, before stopping it.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

event such as this, with the revelations contained in his own
shockingly powerful words, while granting a stage in Johnny
Wizard's World, is frankly, beyond the pale, quite shocking in
perspective I'm sure I would state again. I feel confident
Bush's surprising candor on life's humbling higher meaning
wont make the crazies 'out there' any more less right per say.
As for the barely living of you passing travelers to our dying
Realm.... be ready to be taken on a journey of such profound
discovery, with a wit never before witnessed from President
Bush!, all about the cruel hardships Americans continue to
endure without guidance through effective leadership. Without
evidence to form his guilty verdicts. That orders the murder
of the innocent with. I kid you NOT. Hey? maybe the Son of

Man doesn't have to wipe out the entire human race after all..
With Bush co-operating now, I personally believe, no, I know,
we're going to make a go of this after all.

Let US speak in challenge to any or all bushite enemies

NATO war plane bombers must be hunted down by the will of
Humanity to be gloriously publicly executed to defend the
innocent lives, they once again, have indiscriminately
murdered in Afghanistan without a sliver of evidence, but for
to say, some dumfuk had a 'rumor' that a single individual
SUSPECTED to be an anti-heroin pro-child defending Taliban
supporter, granted the bombers of NATO to wipe out an entire
village MURDERED indiscriminately by the TRUE demonic enemies
of LIFE. Please, if you must forsake me in your personal
cowardice and self loathing, don't forsake GOD and America by
not killing with PRIDE, these bushite dumfuks of NATO the
first chances you get. Love liberty as if it were your own,
and kill a lawlessly murderous bushite nazi savage for your
love of anyone included. (You can quote me forever on that.)

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was
told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know ...

What is the difference between AM and DSB?

Both are AM.

Standard AM is DSB with full carrier

SSB with and without carrier/reduced carrier are also both AM.

Yes, I think I'm missing something obvious here. Let me have another
think (aloud)....

If you FM modulate a 1MHz carrier with a 1kHz tone, you get a spectrum
consisting of a 1MHz carrier in the middle, plus a family of sidebands
harmonically spaced at 1kHz, 2kHz, 3kHz etc (to infinity).

[One obvious difference between the FM spectrum and that of an AM signal
is that the AM spectrum only has sidebands at 1kHz, and the amplitude of
the carrier does not vary with modulation depth. With the FM signal, the
amplitudes of the carrier and each pair of sideband do vary with the
amount of modulation.]

So, if you FM modulate a 1MHz carrier with a 1kHz tone, you get a 1Mhz carrier and the family of 1kHz 'harmonic' sidebands. Demodulated it, and you hear a 1kHz tone.

Now double the signal to 2MHz. You might expect the sidebands to appear at 2, 4, 6kHz etc. However, if you demodulated the signal, you still hear the original 1kHz tone (which should now be double the amplitude of the original 1MHz signal). You definitely don't hear 2kHz. This at least proves that the original 1kHz FM modulation is preserved during the doubling process.

So, would it be simplistically correct to consider that, during the doubling process, the original family of 1kHz sidebands also mix with the new 2MHz carrier, and create a family of 1kHz sidebands centred on 2MHz?

Or, alternatively, does the original family of 1kHz sidebands (on the 1MHz signal) mix with the original 1MHz carrier to produce a family of baseband 1kHz 'harmonic' signals, and these then mix with the new 2MHz carrier to create the family of 1kHz sidebands centred on 2MHz?

Or are both equally valid (invalid)?

A possible flaw in my simplistic 'explanations' is that I would have thought that, while the doubling process occurs as a result of 2nd-order intermodulation, surely the two-step process in both 'explanations' is really 4th-order intermodulation?

However, my explanations work equally well (?) for FM and AM.

Am I wrong, or am I wrong?

Ian.

Well, maybe so...but then please explain the Jeb Bush's son being arrested for public intoxication and the Bush twins alcohol, drug and sex escapades. Are you saying they've gone Democratic???

P.S. Thanks again for the on-topic short wave post, you two-faced hypocrite.

AM is a process. DSB (double sideband), with carrier, is it's most simple result. DSB without carrier (suppressed carrier dsb) requires using, at least, a balanced mixer as the AM multiplier.

This is your last question of 1001 questions:

Since the information (modulation/voice) is repeated in both sides of
the modulation envelope in am, ssb "chops off" one half of the envelope.
The receiver is responsible for "mirroring" the other and reproducing
the information on that end--this allows for almost doubling the
effective range of am.

And requires, for proper reception, that a carrier be recreated at the
receiver which has not only the amplitude of the original, but also its
exact phase. Absent some sort of "pilot" to get things synchronized,
this makes reception very difficult.

There is no need at all to match the carrier amplitude of the original
signal. You can use an excessively high carrier injection amplitude with no
detrimental affect, but if the injected carrier is too little, the
demodulated signal will be over modulated and sound distorted.

Exact, not required. The closer the better, however.

RENSE.

I used to get a black eye in school fights once in a while.But, I held my own, I was always a fatso and I gave them some black eyes too.When I was in the first grade at Carthage elementary school in 1945, a punk kid picked a fight with me.He showed up the next day at school with a white gauze patch on his head hideing them stitches up there.

Uh, John...respectfully, I have to wonder just who is on drugs.

The original poster *ASKED* about *DSB* vs. AM

YOU *ANSWERED* about *SSB*. Here is the correct answer...

There are two broad types of DSB (double sideband) transmission:

DSB-RC and DSB-SC, meaning BOTH sidebands are transmitted, but with
either a (R)educed (C)arrier or a (S)urpressed (C)arrier. AM sends both
sidebands and full carrier.

Hope that answers the OP's question>

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by

Christian values committed to TRUE freedom from lawless
godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as
betrayers of the Human race, deny soldiers to know: General
Ahmad funded Atta. They will both support the murder of Your
American Son or Daughter for further zionist evils, before
allowing true open line communications, to defend ourselves
from the lawless demon enemies of Man. Do something about it,
or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying
brothers and sisters, die as Satanic bad guy enemies of Life
on Earth, sacrificed in cowardice to the real demon
antichrist, and see if we, the true, strong, and free, care.
The Son of Man SCREAMS before coming home to GOD'S America:
We are coming to destroy Satanically lawless bushite enemies,
all for the love of God, we shall succeed my friends, we
shall succeed. I will not willingly live in a forsaken world
with LIAR zionist war criminals conning US to believe, God is
not Great, True, Strong and Just.

Die bushite die!

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC zionists, actual treasonous LIARS, actually smile to dying Canadian soldiers with only true contempt. CBC kills Canadian kids, with their intentional demon lies, trying to subvert Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of America's America. "The Liar" Hannity's America, can go it alone as treasonous liars, who boastcast a con to 'neutralize' America; 'finding' that we believe their demon lies about how one dies sacrificed 'Heroic' without any IMPORTANT questions answered. do we do?

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. By Satanic command, 'inconceivable' to see the bushmob up on high treason charges... Oohh. Yeahhh.. I can see that going for real - quite excitedly I am about saving innocent lives. So, let's get done what needs to be a doing to save ourselves, so we can get this talking all behind us now, and reach for something truly breath taking as awarding,

Your Servant,

King Johnny Wizard

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer, for now anyway, we have some really serious business just presently, and we really don't need to be any more reminded about Mr. Bush's satanic Devil, demon whoreship, of, "Molech", a religion practiced to deceive America into sacrificing our kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH
TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled
inspectors out of Iraq, but then... how is this not HELL to

actions he is PERSONALLY responsible for Christ asks YOU?

/ / So, there was indeed no imminent threat posed by Saddam to
Amerka, and inspectors had complete unrestricted access
throughout Iraq without delay prior to the, bush demon's
further war crimes. So, what was the reason for all the
pointless mass murder and destruction again? Oh right.. to
sacrifice American soldiers so terrorist bush's war

profiteering can feed off themselves as family without leadership present as spoken for.[...] it's only the dummy American People bid payers again left unaccounted to DIE intentionally. \ \

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

/ / "It could make August a tough month, because what they're going to try to do is kill as many people as they can to try and influence the debate here at home. Don't you find that interesting? I do, that they recognize that the death of innocent people could shake our will," the President explained. \ \

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO

isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. / / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \ Kill the bushite for America, for Justice is Freedom. Lawless mercenaries are not granted by our will to survive truly. A "lawless" enemy granted "immunity" by bushite evil phonies, is that of which, holds ourselves in their confessed contempt for Justice. Receive thanks from everyone, GOD included, by rightly destroying such inexcusable treasonous ungodly enemies of all human life.

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged

truly by Just causes. The mute, pro-censorship/tyranny
THIEVING bushite savaged nation, has NO EXCUSE for the crimes
they have committed in our dying names. I demand our voices
heard internationally for Justice as Freedom is Godly.

SATANIC AMERICA

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?"

MSNBC told YOU when interviewing Tom Daschle in discussion of the official public contention, that immediately after the terrorist act of 9/11 in New York City, (where thousands of American People were murdered,) bush and cheney frantically, desperately, INTENTIONALLY, worked paid overtime to close 9/11 (the justice-freedom thing) Investigations on who or whom planned to get away un-apprehended with the still living as freely wealthy General Ahmad. \ \

911 "truthers" don't want to address the hard evidence like the clear as day video of steel running like water from the WTC towers, for, as Humanity witnesses, they'd rather watch silently, children murdered indiscriminately, before, acknowledging wise godly men from our communities who speak ONLY facts on America's derision for real, open market Free communications - freedom fighters who ACTUALLY defend the innocent from the neocon bushmob traitors. Each day we hear of near hundreds of US murdered by the godless Satanic THEIVING "American" forces in Iraq. without near a peep of concern by "America". Lawless bushite mercenaries torture rape and murder, paid to do so by the WILLING American tax payer, and near 300 million "People" (the NAZIS) can't find the effort to pick up a princely phone and call the ENEMY pro child killer George Norry, (who broadcasts every day across America nationally for the IRRATIONAL neocons,) to air any real concern for our Lives. True, the demon enemy censors OUR calls, and contrives WE a buyer without questions, but he doesn't censor You always forever. So, get to it fukhead, JOHN is growing angry with americans of EVIL ignoramuses escaping the bushmob for crimes against MY HUMANITY. The Son of Man States: Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the further criminal escape of the ungodly bushmob for 911 as TRAITORS.

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what? The Iranians? My response is lighten up and get a life."

Johnny America Lyrics: "Can't an American PROUDLY kill TRAITOR pro-torture Zionist McCain for the Love of living Life Justly, as Freedom was Country?"

Investigating the Investigation

PRO-TORTURE Gonzales "I quite frankly don't like the idea of the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS, while George W. Bush personally stole 50 billion from America in the first four months of stealing the initial election.

/ / A BUSHITE GRUNT PRISSING PROUD AS OUR ENEMY "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE

enemies of Humanity to save the lives of our precious loved ones. \ \

Art Bell, "the thief", is really fuking evil to GOD as America.. being a blatant naked LIAR to the American Patriot Warriors

Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the criminal escape of the bushmob for 911 as CLEARLY TRAITORS, so says the one and only,

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

/ / Never in modern history has country been forced to pay for its death, torture, and destruction with its own money - its own oil revenues. A country where thieves are entrusted with its richness and where murderous gangs are entrusted with its security. \ \

US Attorneys don't serve "the pleasure of the president", they
serve freedom lovers dedicated to defending America from
willful criminality. But, americans are too stupidly weak to

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically.

Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

/ / According to Danish Karokhel, director of Pajhwok, the Italian government should negotiate directly with Dadullah. "Italy is negotiating with the wrong people," he said in an email to IPS. "The only one that counts and decides is Mullah Dadullah." \ \ Oh Yeah, but what about Omar the Just, And... hmmmm. who is Karokhel today anyway, and when was the last time anyone seen him alive?

/ / How did a member of the Taliban in Afghanistan get hold of the phone number of an ABC news producer? Afghan 411 must be REALLY good! \ \ iiIII! can't even do that.. well... easily from Canada as an official non-fugitive that is. Just what is the going rate of satellite phone service out of Afghanistan? Remember: evil is DUMB about everything, including technology. Or so, how are we missed for report by point to point presentation using the same old satellite for phone service? Repeatedly calling the same mumblers? Jesus, If we really worked at it, I could probably reach where they were in a day or two by hitch-hiking.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

US officer "upset" Iraqi suspects taken alive, court hears

/ / A US military officer sounded "pretty mad and upset" that
a group of soldiers had taken suspected Iraqi insurgents alive
during a raid in which they had been told to kill all military-aged
males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and
all such ungodly bushite hatred for Humanity in this light of

in defending Liberty, campaign JUST that? Why not??? Is it
because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams,
George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Rumsfeld, as it was told on Oprah, doesn't want any arrests of bushite rapists though, so has worked to deny Justice for female grunts by denying all requests to the 'Pentagon' from American Police Departments. [and you thought he was fired!] Why? because, they, the very weakest intellectually of America's - do what they're told teen kids, ALL don't have rights anyone in bushite corporate america is willingly strong enough as a dedicated Leader to speak in demanding defense of, for innocence.. Why? because they soullessly advocate continuing bushite war crimes for a stolen dollar. Stuck that way apparently. Support my rise to speaking publicly for open challenge on the rights and privileges of all concerned parties. Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911. I would like to form a global posse of sleuthers to identify on international open line radio, all guilty INDIVIDUAL parties by evidenced conclusion on our highest of priority issues, and get started with the nothing to hide from anyone global arrests, with PUBLIC court proceedings, done all for our public interest as the refusing to further fall as innocent murder victims.

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win." http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to

say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of steel running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 100,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

King Johnny Wizard
President and CEO

-

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real. When I watch only thirty seconds, my rage as a god increases beyond anything anyone of Humanity can even contemplate, and i start crushing bricks in my hands with fury, twist iron bars into pretzels, all as a foolishly feeble attempt to personally have killed those present in this video. Then I cry. I cried for these children present in this video the first time I watched it, and I cried last night briefly, before stopping it.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

ARE YOU TALKING TO ME?

George W. Bush:

ARE YOU TALKING TO ME? - A Johnny America Exclusive! - a candid interview on Bush's deeper than ever political thoughts about the war, up front, and personal. Surely, an historical event such as this, with the revelations contained in his own shockingly powerful words, while granting a stage in Johnny Wizard's World, is frankly, beyond the pale, quite shocking in perspective I'm sure I would state again. I feel confident Bush's surprising candor on life's humbling higher meaning wont make the crazies 'out there' any more less right per say. As for the barely living of you passing travelers to our dying Realm.... be ready to be taken on a journey of such profound discovery, with a wit never before witnessed from President Bush!, all about the cruel hardships Americans continue to endure without guidance through effective leadership. Without evidence to form his guilty verdicts. That orders the murder of the innocent with. I kid you NOT. Hey? maybe the Son of

Man doesn't have to wipe out the entire human race after all..
With Bush co-operating now, I personally believe, no, I know,
we're going to make a go of this after all.

Let US speak in challenge to any or all bushite enemies

NATO war plane bombers must be hunted down by the will of
Humanity to be gloriously publicly executed to defend the
innocent lives, they once again, have indiscriminately
murdered in Afghanistan without a sliver of evidence, but for
to say, some dumfuk had a 'rumor' that a single individual
SUSPECTED to be an anti-heroin pro-child defending Taliban
supporter, granted the bombers of NATO to wipe out an entire
village MURDERED indiscriminately by the TRUE demonic enemies
of LIFE. Please, if you must forsake me in your personal
cowardice and self loathing, don't forsake GOD and America by
not killing with PRIDE, these bushite dumfuks of NATO the
first chances you get. Love liberty as if it were your own,
and kill a lawlessly murderous bushite nazi savage for your
love of anyone included. (You can quote me forever on that.)

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was
told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know that the international Johnny Wizard comic book
is out there? Don't miss out on picking up a copy for
yourself, or your loved ones. And did you know, I'm trying to
get on international radio without a censor to thunder my
audience back into submission. I HATE HANNITY. All I want is
free open debate to resolve this crisis, that doesn't have to
be so ruining our dying worlds without questions forwarded by
the dumfuks. Justice is Paramount through reason to be so.
The Bush Administration have been up to no good, escaping for
911, that New York City should sue for. Hire me on as legal
consultant buddies, cause I'm like near starving broke here,
with supreme court challenges failing my cost factor, and
hunger pangs slowing our progress on fighting unjust
incarceration. I desperately need money, like now, as a gift,
or an advance on a industry paid private consultant gig. Or,
instead, maybe you'll idly watch some innocent person
willfully be sent to prison by liars in your demonized name,
to defend the ungodly evils of war criminal traitor, our Mr.
Bush Jr. in foolish disguises. Your call Bud.

be Wiser,

Johnny Wizard - Patriot Liberator of Eternal Destiny
(i.e. REAL sustainability as self sufficiency)

(i.e. nothing is separate from existence ourselves, not even time, and Justice is binding to defend our lives if practiced fairly with it's elemental divisions through reason. Example: a person accused of a criminal offence, without any evidence, is INNOCENT. Those who say otherwise, are the actual terror-ists. Civilization's ancient Founder Hammurabi, suggested just to openly publicly have executed those who lay capital allegations without any evidence, while working to close outstanding criminal investigations. A made CRIME within ourselves Hammurabi claimed, and by thinking such ways, brought birth of 'Civilized' to an untamed till then, chaotic confusion. Old becomes again anew, because Americans are weak as polluted, and too cowardly to defend the rights of US innocent. Let's change that. Support my climb to international controversy, with my unchallenged claims of direct accountability being sought, for the 911's neocon war terror plot.

P.S. someone tell Hannity, I got a beef with his demon lies to sacrifice our guys. I'm calling Hannity out to explain himself freely to US now, as a demand for an immediate match between him and ourselves in the dug pit of his utter contempt for our free to be alive communications.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."' [...] the [bush whore] American, speaking through a translator, warned him that he did not want to see any AP photos published anywhere.\ \

No bushite was found gloriously killed for country, yet, they, the godless bushite enemy, continued to shoot innocent People indiscriminately for a distance of six miles, while likely, secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable, without zionist controlled, corporate news permission. See? The military counts mankind as zionist, but I am a man of real men, committed to defend our world from all enemies, foreign, or domestic. Unlike a bushite traitor to God

and America, who's word, as Oath, means as much to them, as we do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight,

for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks.

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Former FBI Director Calls For New OKC Bombing Investigation

/ / The FBI man in charge of collecting evidence from the government building destroyed by the Oklahoma bomb has called for the case to be reopened. \ \

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

First things first: America must demand the immediate arrest of those who told America the victim committed suicide, when clearly, due to autopsy photos, the individual was tortured to death as the innocent. So, the 'officers' responsible for the fraudulent claims, need to be arrested for accessories to MURDER. The torture will earn them both the death sentence, if found guilty under STANDING AMERICAN LAW. And any bushite like a, it's always a great day George Norry, who purposefully with criminal intent stands in life's continuing way for Justice's demand, American Patriots will phone to Bill with every once of pinky power we have at our disposal.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where

he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

Albeit, some rock/country/pop stations are now wading a little ways to allow minimal defensive communications on behalf of our truly dying communities. [i.e. the THIEVING Lottery actually takes more than communities get returned in cash transfers from the government, and this, beat up the unrepresented poor, actually ends costing EVERYONE more. [read "Stand Together, or Don't"] You don't know Evil until you hear CJOB's radio host pontificating on it's greatness to deny our community any time to respond to their direct criminality against OUR interests. A near 75 percent of Our radio content is private commercials, while the rest of twenty percent is amateur sport updates. Why don't the strangely often fat slob sports fanatics go away on their own as blood sucking leeches, and stop denying us more serious subject meters with 'we're just too dumb to hear' censorships. In Winnipeg, it is a teensy, tiny authoritarian illiterate group of sports crowers, that the station has devoted the Province entirely to for private financial profit. And so, what is someone in Selkirk Manitoba going to do with the play by play

radio commentary?, not listen like everyone in Winnipeg does since, that's what. I personally can't even bare the wasted time, to finally get on to be immediately hung up on impolitely by a Station who literally robs from our community. More than 600,000 live in Manitoba, as apposed to a small cadre of proven criminals who stole our public phone system, or took a PULBICLY paid for Private arena or Private sports facility that cost us practically billions to get in the front door of the already completely paid for by ourselves ten times over, to maybe see a concert that Ticketmaster charges half the ticket price to simply just print a paper ticket/contract. ENTERTAINERS, let me be your manager's Manager instead, and I'll get you every last penny your fans paid to see YOU with. I could practically double your earned earnings, or, are you instead going to blindly give HALF your life to a scalper, who's done nothing creative but hire someone near minimum wage to press a print button religiously. I'll tell you what, we just won't do any more good shows until we can get this remedied by freely communicating our concern for dying soldiers left further without measured value, left to actually DIE in the gutter as homelessly forsaken.

Take care by taking action.

God we can't do this alone, I need you.

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly advocates the rape and murder of the innocent in Iraq to thieve from for the 'escaping' neocons, (as the truly UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

"It is not George Bush, it is not the Neocons, it is not people who have been advocating waging that [IRRATIONAL 'Evil' UNJUST] war [against the established innocent] where we find our [hidden from view] enemies, who are responsible for that fact that we are indeed in a global war [sacrificing our conned kids to the un-accountable war profiteering thieves of American labor as the UNELECTED]. It *is* the enemy that started it, that is pursuing it, and that is trying to bring it here back here home now. [, and that way, us neocon zionists would miserably fail against those who would speak in freedom's demand for Universal Justice. Real freedom I mean of course, you know, evidence to form conclusion factually, public trial by questioning juries, blah blah blah. We can't have that Now can We? Colmes? Greenwald?]"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US. Either Gaffney suffers from some blind dolt syndrome, where he clearly can't see himself flailing madly in criminal ignorance, or he's an accomplis of blatant treachery, to help escape his demonic war profiteering benefactors who murdered thousands of Americans for similar gains through the unspeakable bonanza of the "Pearle Harbor" like event that 911 was. What the peenackers publicly stressed they would crave to fool US into Iraq and beyond as glorified war criminals. 911, New York City, where thousands of Americans were murdered, and millions polluted. killed like now American teen soldiers with the Iraqis. Led by a Sattler, or Mattis, Blount or Russell, who order the murder of women and children openly, and 'they', the actual soulless minions of the demon antichrist, the true dumfuk cowardly enemies of Humanity, don't cut them down instantly instead for Life as cherished. That must change for our betterments. Kill any bushite bomber and be loved by God's America.

Any Commander that doesn't support the arrest of those responsible for 911 and the subseqent neocon war crimes of Iraq, is a traitor to God and Country. Death to the bushite, death to our enemies - so says Johnny.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected

lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

Make the call, be a man.

further to the death cults of corporate news:

Realize, our corporate experts on Life in the national news agenda, don't work to defend our children from mercury in innoculations they promote for profit. Nor, do they tell US about radio-active depleted uranium. Instead, as now, they look to blame others, even God, when suggesting dna is responsible, as if the American corp public could even comprehend multi-demensional cross kingdoming. They can't, (too stupid) but their Satanic death cult [no evidence] where they News pretend and WE DIE, they are willing to continue to go with by refusing all calls. Ahmad funded Atta, but they don't want to tell US there either. Look how many people they have so far watched murdered as the innocent for zionism while entertaining.

Support our call to be heard my brothers.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC,

CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

Yours again,

King Johnny Wizard

CONTACT

/ / IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whatdoyahsay?? \ \

Art Bell, the zionist enemy of Life, wont allow free communications with the established facts though,

What do you think? Are you truly all alone on this?

Again, more than half of the money being spent on demon Bush's wars against life's reason for being, is completely left un-accounted for thieving. Not spent to offer dumfuk cowardly soldiers help hunt to kill bushite rapists and torturers. Stolen American values Just like the bushite soldier on the ground, who after gunning down innocent people in the street, go through our pockets to steal the spared change. Kill a bushite for the love of God why don't you my American Patriot brother and sisters?, today!

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Again, corporate nazi america states 30 percent of America supports the ungodly George W. Bush's demon antichrist action, when in truth, it's less than one in a thousand. it's just CBC, CNN, CJOB, and Art Bell the liars ain't taking our calls for enlightenment. just like they treat the innocent in Palestine for zionism's encouraged racist in-action. For what does a fan of 'we're the best' Coast to Coast radio network family know about nothing after we witness them froth at the thoughts of nuking countries, or calling for enemies, none of us here in North America have any real problems with?

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and

South African death squad goons, all to war Love for the
neocon god haters. Who, as peenacking atheists, as their very
own documents stress, would murder anyone of US for a stolen
nickel.

This is why the Son of Man through God begs the Peoples of
Humanity to kill on sight, the enemy bushite betrayers to
Life. Ourselves, the innocent. These soulless grunts don't
destroy such deserving commanders, Like Blount, Sattler,
Russell, Wuterich, Pantano or even Kimmitt, and instead, as in
Fallujah, murder every woman and child present, while stealing
all our given monies for desperate life saving help. Anyone
in the Air Force deserves to be justly put down, for, I've
NEVER seen any legitimate bombing campaign, but for to kill
People indiscriminately like NATO regularly does with
radio-active toxic waste, while then sending in the dumfuk
Marines, or the 'from the coast' Canadians, who of course,
rightly get killed on the ground in retaliation for such blind
evil stupidity. Please, I beg, help Iraqis, and kill the
bushite thieves to defend our forsaken God. American
children, help me my loves. Please don't allow the bushmob to
escape for the treasons against America on 911, for, bushites
are OPENLY traitors, as the TRUE enemies of evidenced Justice,
as the Freedom to do our own things loving God on our own.
Besides, most bushites aren't even registered American
citizens. Bushites need to be hunted down for destruction -
by the Loyal Christian American Patriot Soldier, the ones who
war to win against those who torture US innocent to death as
the ungodly Satanic LIAR enemies. Save the Humans, kill a
bushite false accusing traitor of American Freedom To-day, and

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

/ / The proposal, which Sen. John McCain is planning to
introduce on Wednesday, also would require ISPs and perhaps
[!?!] some Web sites to alert the government of any illegal

images of real or "cartoon" minors. Failure to do would be punished by criminal penalties including fines of up to $300,000. [...]

What images must be reported? Illegal images of minors, which includes clothed teens in "lascivious" poses, according to the Justice Department. Obscene "cartoons" and "drawings" also qualify. (18 USC 1466A) \ \

Alert the USER! not tyrannical leaderless dumfuk thievers, for it is the expresser who, if any, that is guilty of a determined illegal expression. In 'The' Canadian case, they, (once proud IRRATIONAL bushiter THEIVES [pro Afghan child killers determined to help the ungodly demon Bush's 'escape' for 911]), want/HAVE to put MEN is prison for beautiful pictures of girls in panties, or bubble bathtubs being. IT IS demonization. Leaving twenty year olds to look like they could be tens in a singled out of context womanly derriere, that our Jurys nations-wide, are generally, denied to perceive normally, if at all. McCain knows he is an enemy to God's children everywhere. McCain speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED. So, where are the North American multi-million dollar "Exploitation Units" to defend our King's children from TRAITOR pro-torture of US as the INNOCENT McCain there then eh? Units who he holds hiding behind himself somewhere in high blind praise as a rich group of child lovers I SAY??? (Is a heroin pushing bushite THIEF that supports the 'escape' of the bushmob with indiscriminate bombings in Iraq or Afghanistan, Lebanon, Haiti or Somalia, even capable.! of real human Love I torturingly ask dauh gangsta rappah? buddies where are You there in the stomach of the Beast celebrating?) McCain is a demon enemy of Life ourselves to promote the arrest of all the goodness that beauty brings in the heavenly art of our clothed teens. If it weren't for Earth Women, God's boy, Johnny Wizard, wouldn't even be here to bother. It's the reason I first picked up a guitar, it's the reason I did my early plays, then monster movies, and it's the reason I praise the orchestra of the Heavens in Dream, and well.. it's just the reason for everything. I speculate sometimes perhaps slyly that G was kinda lonely all by ourselves for zillions of years, whom, for entertainment, loved us up on the entranced exit starting - before a beginning without ending, yet, as outer there, is still the insider here, forever being we sorta, and gave us this foolish boy for the mental gymnastics. All in good fun. Rocking on to leave all as Mystery, never realized forever and a day in Eternity. You are a Servant, as so I am. Quite a place eh kid? So as it looks now presently, we're here still barely

hanging on striving to survive against Mr. Bush's continuing unfair irrational tyrannies of clear injustices committed in Your Name against our Humanity, or, end ourselves dying without true representation, left falling further forsaken. [Home is home sweet home as in Chicago, as we always was going to with or without our loves heaven bound. For I'm starting a journey back to where I belong, where the food is good, the music's great, and life is truly worth living as miraculous.

Please help God.

We have to overhaul how all our national news Podcasts are assimilated through corporate nazi zionist censorship. Art Bell and George Norry are enemies to ALL american teen troops put in harms way to die as bad guy irrationally for the neocon God betrayers. Why? because they purposefully lie to have YOU die as innocent murder victim. Death to the bushite, death to God's enemies.

Be a friend if not an enemy,
Your buddy,

King Johnny

Well, gee, Iran has no nuke program, in anyway, shape, or form, but Israel wants to murder more of humanity for their ungodly lies anyway. The enriched uranium Iran is making, can not be used for a bomb because it's only enriched to 2 percent, and to get the bomb making stuff, you need a COMPLETELY different technology. But science?, in bushite america? Nazi America would rather be nazi chauvinist pigs, before admitting the Son of Man exists, or to go to the trouble of phoning someone who refuses to take our public calls for Justice. What religion is this America?, where Human life has little of no value? And Johnny's love means nothing?

Let's change that. Will you make it so Commander?

Cause I'm ready.

-

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification, concluding Naturally, that all stolen Iraqi money must be returned by the will of GOD to the victims; with those responsible for stealing it, made to pay US back, with the true American Patriots to be found, backing US up 100 percent. The bush administration has teamed our kids to mercenary forces who have no loyalty to freedom but to freely die another Marine for more dying stolen values. While successful at it corporate America, just lies and lies and lies without shame, nor apology for the death of your poor cowardly kin.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin, and, Influenza is a constantly mutating virus. So, pre-determining which 'deadly' strain is going next, is only because the WHO wants to continue killing US for huge cash profit. With cult slaves, like those who forced Jones Towners to drink at gun point, are the same as those who now demand we give our girls of America from Texas such. It seems the magic TV news people don't want to trouble us on this matter of our actual survival.

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the
emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The US first military engagement in Somalia was fully supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air force, responsible for blatant first degree acts of murder against the innocent, would be hunted down by Humans, tried, then executed gloriously in the defense of our living justly.

New Recruit

Destroying enemy bushite is a gift to Humanity, it is
saying you care for the lives of the innocent a bush
bitch nazi grunt freely confesses to targeting for
murder. Liars are the bushite, who steal Iraqi
resources, allow racists and rapists to commit their
demon crimes in America's name un-challenged, and who
absent mindedly bomb the innocent without just reason
given. All the while, labeling themselves, "pro-Iraqi".
snpd

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,

George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful
suffering and fright and death at the hands of the enemy
bushite. The bushite: who the demon anti-Christ
states, are un-accountable to any rules of law in this
Universe, like with his extremely foolish criminal
decree, 13303. I kill mindless parasite bushite nazi
enemy soldiers just for that alone as eternal defender,
and I do it for to win some mercy for a real living God,
who the fascist enemy bushite hold in their ungodly
contempt as LIARS.

I have the backing of every real man alive on this
planet, and we all know it. No voices of reason have
apposed my factual claims in FREE Usenet, and Art Bell
makes no attempt to defend himself as internationally
painted enemy traitor, and that says a whole lot to Talk
America. Why? Because Mr. Bell, the bushite
propagandist, knows too, I speak and act truthfully,
honorably, and righteously, while the talk radio
american bushite lies, cheats and steals from America's
America, that as bushite, leave undefended for criminal
plunder in Your name call censored from classed
enrollment. You have just as much a right to be here as
I do, and the demon bush, he ain't no better than any of

US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

How The Demon Bush Misled God's World

How Bush misled the world
http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

The guilty party of Haditha have confessed that targeted killing of innocent children is fair game in their worlds, and as confessed, they 'got away' committing the same Satanic acts - going house to house in fallujah murdering more than two hundred thousand innocent folks for LIAR E-N-E-M-Y Sattler. Bushite corporate america, has stated in silence, the bushite enemies of Haditha will never face public execution for such offences, YOU apparently WILL NOT GRANT IT, too cowardly, and in all likelihood, (like those of the Saudi Blount's third infantry) will be allowed to walk freely down american streets after being found guilty as politically supporting the robbing and murder of innocent men, women, and children all because we're rag-heads or niggers. The, deserving to die as illiterately intolerable bushite drone soldiers HAPPILY, WITHOUT QUESTION, co-operate with ANY lawless mercenary forces such as south african death squad goons in finding the enemies of themselves. Purposelessly ungodly bushite soldiers are told they are DYING to defend Iraqis, while breaking out of prison, mercenaries caught trying to kill innocent Iraqis for fun and profit. While, at the same time, actually having SLAVES from India preparing their lunches!!! And guess what? they're coming to live bushite america as the patriots after they get killed you're forsaken American Son or Daughter teen! With millions of stolen American dollars to set up new 'freedom' operations.

Let US demand open radio communications on the mathimatical facts to save our own selves further victimhood to their personal contempt for the true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

- "The months preceding September 11 [see] a shifting of the US military's focus ... Over several months beginning in April [2001] a series of military and governmental policy documents [are] released that [seek] to legitimize the use of US military force in the pursuit of oil and gas." Michael Klare, an international security expert and author of Resource Wars, says the military has increasingly come to "define resource security as their primary mission." In April, Tommy Franks, the commander of US forces in the Persian Gulf/South Asia area, testifies to Congress in April that his command's key mission is "access to [the region's] energy resources." The next month US Central Command begins planning for war with Afghanistan, plans that are later used in the real war. [Sydney Morning Herald, 12/26/02]

See? It's admitted that the zionists planned to STEAL the rights of Afghans for Enron, by LYING to SOLDIERS to get them killed as the American Pension thieving bad guys. Too COWARDLY parasitic to hunt those responsible for murdering thousands of "Americans". So, as a consequence, they, as loveless bushite drones, die cowardly with the once great America as enemy corporate fascists to Freedom's Justice, Our Living God.

John's truth. Killing a THIEVING bushite is to save the lives of the innocent they target for murder. The cowardly bushite, dies sacrificed - all to help IT slavishly escape those responsible for 'getting away with' murdering thousands of Americans in New York City on 911. Sorry George W. Death to the godless bushite, death to America's lawless enemies

DUMFUK BUSHITE ENEMY OF GOD "This is not a job in anyway shape or form, this is not a job. this is a lifestyle. and we choose this type of lifestyle."

Traitor LIAR Hannity "Knowing the danger?"

DUMFUK BUSHITE ENEMY OF GOD "Yeah."

Traitor LIAR Hannity "Well, isn't that the definition of Bravery?"

The DUMFUK ENEMY OF CHRIST "Uhhuh."

See, TRAITOR Hannity [who deserves to be executed for the treasonous DOCUMENTED lies he tells America almost daily] would claim any and all serial murderers and rapists in America are the definition of bravery. Bushite dumfuks deserve to die as enemies of America because they openly, purposefully target the innocent to rob from and murder, as bushite did on 911. They bomb cities. Thus is why Christ [ME] tells loving children to gladly help Life kill their own godless fathers or brothers who CHOOSE to commit these war crimes against our humanity with their contempt for Justice, Johnny and America. {Especially those in George W. Bush's air force.] A bushite's hatred for America is blatant with every monosyllabic grunt they make. In nazi zionist america, they have a Zionist national radio program that forbids the nation to know they're presently being victimized for criminal sacrifice, and apparently, Americans would rather DIE, than hunt George Norry, or Art bell for questioning. A nation of fascist nazi cowards, who go silently to their graves in their support of torturing innocent people to death for the thieving EVIL bushite's pleasure.

Death to the godless bushite, death to America's lawless enemies.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01] The individual who makes the wire transfer at Ahmad's direction is Saeed Sheikh, later convinced for kidnapping and murdering reporter Daniel Pearl in February 2002. ABC News later reports, "federal authorities have told ABC News they've now tracked more than $100,000 from banks in Pakistan to two banks in Florida to accounts held by suspected hijack ringleader Mohamed Atta." [ABC News, 9/30/01] CNN also reports the $100,000 transfer, and the New York Times specifies that it came in 2000. [CNN, 10/1/01, CNN, 10/6/01, New York Times, 7/10/02] Ahmad's order must have preceded June 2000, since that's when Atta and others started opening bank accounts and receiving the money ($109,910 is received by Atta and Marwan Alshehhi between June 19 and September 18). [MSNBC, 12/11/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy

documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegations, thereby guaranteeing criminal invasion. Only workable if Laden pleads innocence to a crime that hadn't yet taken place, a crime serious enough to "justify" sacrificing American GIs truly for a liquefied natural gas pipe line for pension thieving Enron. ["The Dahbol Working Group" and Bridas] Any evidence for any offense would have been sufficient to have Muslim fundamentalists hand Laden immediately over, as they had offered [as others of other nations had also] repeatedly during the Clinton years.

CBC and CNN have still, to this day, consciously refused to do any follow up on the intelligence, deciding instead on behalf

of dying people everywhere, our public devolvement of a just society.

RTÉ News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's ruling Taliban for proof that Osama bin Laden was responsible for last week's attacks. According to the US Secretary of State, Colin Powell, the United States has enough evidence to try bin Laden in an American court.

The US Government said there would be no negotiations.

After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" Daschle flatly contradicted Cheney: "Yes, he did, Tim, on Jan. 24, and then on Jan. 28 the president himself at one of our breakfast meetings repeated the request."

...."[T]hat request was made" by Cheney not only on Jan. 24 and by Mr. Bush four days later, but "on other dates following" as well.

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen Mahmud Ahmad sought retirement after being superseded on Monday, the truth is more shocking. Top sources confirmed here on Tuesday that the general lost his job because of the "evidence" India produced to show his links to one of the suicide bombers that wrecked the World Trade Center. The U.S. authorities sought his removal after confirming the fact that $100,000 were wired to WTC hijacker Mohammed Atta from Pakistan by Ahmad Umar Sheikh [Omar Saeed] at the instance of General Mahmud [Ahmad]. Senior government sources have confirmed that India contributed significantly to establishing the link between the money transfer and the role played by the dismissed ISI chief. While they did not provide details, they said that Indian inputs, including [Omar Saeed's] mobile phone number, helped the FBI in tracing and establishing the link."

8.

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation, Laden agreed to hand himself over, but Bush refused the offer, while CBC and CNN denied to report on that fact for the behalf of now dying dismembered American GIs. Once the indiscriminate bombing began, targeting almost every building in the country of Afghanistan, Laden then claimed he had no choice but to fight back to defend US innocent from the ungodly enemies of Creation/Freedom. Then the clear to all fake video came out with an actor who's face wasn't even close to looking remotely like Laden, but for almost the facial hair. [Bridge of the Jamaican actor's nose is HALF as long in proportion to Laden's for example, and surely frightfully shocking for some, the actor doesn't even take blame for 911 either!] Photos comparing the two faces never aired on CBC and CNN available in about twelve seconds with the power of the Internet.

The honorable Argentinean oil company Bridas' relationship can not be understated as the Bush Administration's primary motive on criminal invasion of Afghanistan to save his biggest corporate backers, the American pension thieving Enron.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

"To be truthful about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11..."

Tony Blair Speaking To House of Commons Liaison Committee

36.

The Washington Post, 23 September 2001.

At American urging, Ahmed traveled ... to Kandahar, Afghanistan. There he delivered the bluntest of demands. Turn over bin Laden without conditions, he told Taliban leader Mohammad Omar, or face certain war with the United States and its allies.

Mahmoud's meetings on two separate missions with the Taliban were reported as a "failure." Yet this "failure" to extradite Osama without providing a shred of eidence was part of Washington's documented design, providing a pretext for a military intervention which was already in the pipeline. If Osama had been extradited, the main justification for waging a war "against international terrorism" would no longer hold. Nor would the ready to go Patriot Act. Incidentally, when MSNBC contacted the Whitehouse regarding the top secret invasion of Afghanistan plan, it was confessed that the plan had been "fully implemented"

It's way overdue, no doubt. I think the new Elecraft K3 RX specs will be
very hard to beat- particularly at their price. In addition, the rig has AM
sync and a panadaptor option is down the road. Knowing the Elecraft gang,
the panadaptor will be well beyond what we have seen to date.
No association w/ Elecraft, just a happy customer.

Huh? this makes no sense. There is no need to regenerate the missing sideband to recover the signal. What circuit does this? What's the math?

> --this allows for almost doubling the

Increased range comes from transmit bandwidth, power distribution vs frequency, and receiver bandwidth. Again, what's the math that explains this?

On shortwave the 7600GR has digital frequency readout, double conversion, and PLL. However, both Freeplay models tend to be sensitive to SW signals and feature much larger speakers, which produce a more pleasant sound. This is especially true of the Freeplay Plus, my everyday listening shortwave radio.

All of them are AM in different forms using different added circuitry.

Dear "Sky Captain,"

I'm not doubting your experience but I have to say that it doesn't correspond with mine. I do not own one of the newer Freeplay "Lifeline" models, but I do own three Freeplay radios: their original AM/FM (only) Solar-powered/crank model and two of the Freeplay original models - both the 'A" (SW 3-12 MHz) and the 'B' (SW 6-18 MHz) and, while these are good performers within their limits, they by no means equal the performance of any of my Sony ICF-SW7600Gs or 'GRs on SW, FM, or (and especially) MW. My Sonys even outperform, in every respect but sound quality (and the broadcast sound quality via the Sony can easily be improved if desired) my GE Superadios (I, II, and III).

As a matter of fact, in my own personal experience, I have never owned or tried a portable radio that performs as well natively (no additional antennas/external items) on MW as does the Sony ICF-SW7600G/GR models.

Please note that I am not a MW DXer, but I do listen to distant stations (including AM 740 Toronto for their great music) from time-to-time and generally, when I do so, I use one of my Sonys.

Obviously your experience is different than mine. Yet I cannot help but wonder if your Sonys are performing correctly. Were they purchased new? From whom? (Just curious.)

Best,

Joe

So if you have for example, a 300 Hz signal and a 400 Hz signal, your
claim is that you also hear a 700 Hz signal? You'd better check
again. All you should hear is a 300 Hz signal and a 400 Hz signal.
The beat frequency is too high to be audible. (Note that if the beat
frequency was a separate, difference signal as you suggest, at this
frequency it would certainly be audible.)

Excessive cone excursion can produce significant 2nd harmonic
distortion. But at normal volume levels your ear does not create
sidebands, mixing products, or anything of the sort. It hears the
same thing that is shown on both the oscilloscope and on the spectrum
analyzer.

My comments were based on my results in that experiment, common knowledge, and professional musical and audio experience.

Of course you heard beats. What you didn't hear is the sum of the frequencies. I've had the same setup on my bench for several months. It's also one of the experiments the students do in the first year physics labs. Someone had made the claim a while back that what we hear is the 'average' of the two frequencies. Didn't make any sense so I did the experiment. The results are as I have explained.

The range is increased, but not for the reason you stated (and BTW, he asked about DSB; you responded about SSB).

There are two primary reasons why suppressed carrier SSB has more "range":

1) The receiver can have half the bandwidth as compared to AM; that reduces the amount of noise the receiver will pick up.

2) For AM at 100% modulation, 50% of the total transmitted power is in the carrier (carrying no information), and 25% is in each of the (upper and lower) sidebands, where they carry redundant information.

So the total power that's actually useful to the receiver is a pretty small fraction of the total that is transmitted. The advantage of AM, of course, is that it requires only a very simple receiver.

For suppressed-carrier SSB, all the radiated power is in the one set of sidebands being transmitted. Assuming that in both cases the transmitters draw equal power from the "wall outlet", then there's a clear win for SSB. That advantage comes at the expense of a more complex receiver, and the need for a more skillful operator to tune it.

The advantage of SSB is considerably more than the "almost double the range" you mention -- more like 10 to 12 dB, where doubling would imply 3 dB.

To all appearance the Sangean DRM-40 is suffering from
serious setbacks in its manufacturing process, though I don't
rule out a delay as part of some marketing strategy. It looks
like we'll have to wait at least until the end of this year to see
the model coming into the market.

The expected price setting in Europe is some 300 euro.

Well, OK, the phase must at least bear a constant relationship to the
one that created the signal. If you inject a carrier that has a
quadrature relationship to the one that created the DSB signal, the
output will be PM (phase modulation). In between zero and 90 degrees,
the output is a combination of the two. If the injected carrier is not
at precisely the proper frequency, the phase will roll around and the
output will be unintelligible.

A well-designed filter running into a bolometer would be. You can make
the filter narrow enough to respond to only one frequency component at
the time, and a bolometer just turns the signal power into heat; nothing
nonlinear there...

I don't understand what effect you're referring to here.

I'm a physicist/engineer, and have been for a long time. I have always
maintained that if the only way one can understand physical phenomena is
by solving the differential equations that describe them, then one does
not understand the phenomena at all. If you can express a thing in

words, such that a person with little mathematical ability can
understand what's going on, *then* you have a good grasp of it.

I don't understand what you are saying here either. And in my
experience, the term "modulation index" is more likely to show up in a
discussion of FM or PM than AM; are you using it interchangeably with
"modulation percentage"?

This is close, but not to scale:
http://en.wikipedia.org/wiki/Amplitude_modulation
The animation shows the "envelope".

> What would it look like on a spectrum analyzer?

One vertical "spike" at 1 MHz with smaller spikes at .9 and 1.1 MHz. The height of the two side spikes, depends on the depth of modulation.
In this case, the carrier is in the middle, and the sidebands are on the sides.

> Then suppose you have a 1.1 MHz sine wave added

whatever 0.9 MHz superimposed on 1.1 MHz looks like. ;-)

> What would that look like on a spectrum analyzer?

One spike at each input frequency, 0.9 and 1.1 MHz. If they're mixed nonlinearly, then you get modulation, as above.

Hope This Helps!

Not unintelligible.... Donald Duckish.

On a more practical side, however, most receiver filters for ssb will
essentially remove one sideband if there are two, and can attenuate a
carrier so the local product detector can do it's job resulting in improved
receiving conditions. But this is more advanced than the Ops questions.

Sure there is - the cochlea. (well, the whole middle ear/inner ear
system.)

What would the output look like if you summed a 300Hz tone and a 400Hz
tone and sent the sum to a log amp and spectrum analyzer/fft?

Thanks,

You should take some time to more carefully frame your questions.

Do you understand that a DSB signal *is* AM?

Post your intention; it might help.

Nope - the point had to do with the inner workings of the cochlea.
You can't consider it as a single element, as the inner workings
consists of what are essentially thousands of very narrowband
individual sensors. There is no *single* nonlinear element in which
mixing of, say, the hypothetical 300 Hz and 400 Hz tones would
take place. John responded that the eardrum (typmanic membrane)
would act as such an element, but I would suggest that any mixing
which might in theory go on here is not a signifcant factor in how we
perceive such tones. The evidence for this is obvious - if presented
with, say, a pure 440 Hz "A" from a tuning fork, and the note from the
slightly flat instrument we're trying to tune (let's say 438 Hz), we DO
hear the 2 Hz "beat" that results from the interference (in the air)
between these two sounds. What we do NOT hear to any significant
degree is the 878 Hz sum that would be expected if there were much
contribution from a multiplicative ("mixing") process.

We hear the average of two frequencies if both frequencies
are indistinguishably close, say with a difference of some few
hertz. For example, the combination of a 220 Hz signal and
a 224 Hz signal with the same amplitude will be perceived as
a 4 Hz beat of a 222 Hz tone.

DaviD - Once Again You Got It Wrong ! ~ RHF

Fact # 1 .
Osama bin Laden was born March 10, 1957
http://en.wikipedia.org/wiki/Osama_bin_Laden

Fact # 2 .
Richard "M" Nixon was the US President
from 1969 to 1974
http://en.wikipedia.org/wiki/Nixon

DaviD - Could this be another clear example of Democrats
and Liberals trying to blame the Republicans and especially
"Tricky Dicky" for everything and Shifting-the-Blame for allowing
Osama bin Laden and Al-Qaeda to 'Plan' the 9/11 Attacks
during President Bill Clinton Administration from 1993 to
2001 to President George "W" Bush from 2001 to 2009 ?

Clearly the Planning for the 9/11 Attacks took Years :
Not fewer then 9-Months that George "W" Bush was
the President. It is a real Inconvenient Truth that Bill
Clinton as President and his Administration must bear
some {if not most} of the Responsibility for the 9/11
Attacks.

But the Bigger Blame goes to the US Congress
{Republicans and Democrats alike} for Tying the
Hands of our Intelligence Agencies and not allowing
them to share information. Beginning with the
Church Committee in the 1970s . . .

DaviD - Maybe this 'fact' was seared into your mind :
Like John 'ff' Kerry remembering that he was in

Cambodia during Christmas of 1968 under then
President Richard Nixon's Orders. Oops Nixon
wasn't President until 1969.

John 'Fraud' Kerry, like Al 'The Whole World Will Be a Burning Ball of Fire' Gore, is mentally ill.

Make sure the 7600GR is on DX not local.

This is what's called vaporware as opposed to hardware.

Example most promised DRM and HD radio gear is vaporware.

Try posting on topic for a change now that you have a SW radio. You can

What *I* discovered is -not- the point. And for all intents and purposes, "AM" and DSB are two distinct (but certainly related) things. Different hardware to create (balanced modulator for DSB vs high level plate modulation for 'classic' AM), more power required for AM and finally, back in the day, the FCC had -different- emission designators for AM vs DSB. Now, if they were the same, why would you think the FCC gave them -different- emission designators?

What IS the point is:

1) The original poster asked a question about "x".

2) You gave a half-assed answer to "y".

And then, you had the bare faced gall to accuse the original poster of being on drugs!

Look at the good news--even though you gave a partially wrong answer to a question that wasn't even asked, you at least resolved the issue of

which of the two of you is on drugs... ;-)

Ron Baker, Pluralitas! wrote:
>
> What is the difference between AM and DSB?

The two actually describe different properties, so a signal can be be AM, DSB, neither, or both.

And here we run into some trouble between technical correctness and common usage.

DSB stands for Double SideBand. Although I suppose an FM signal could be called DSB because it has two *sets* of sidebands, and a narrowband FM signal has only one significant pair like an AM signal, in my experience the term DSB virtually always refers to a signal generated by amplitude modulation.

AM is Amplitude Modulation. Straightforward amplitude modulation such as done for AM broadcasting produces a carrier and two sidebands, or DSB with carrier. Either the carrier or one sideband, or both, can be suppressed. If you suppress the carrier (or don't generate it in the first place), you get DSB with suppressed carrier, or DSB-SC. If you suppress one sideband, you get SSB. Usually, but not always, the carrier is also suppressed along with the one sideband, resulting in SSB-SC. NTSC television transmission is VSB -- AM with a carrier and "vestigial" or partially suppressed sideband and a full second sideband. Partial suppression of the carrier is also done for some broadcast purposes.

So a commercial AM broadcast station broadcasts a signal that's both AM and DSB. A typical amateur or military SSB transmission is AM but not DSB. A QPSK signal is neither. And, as I mentioned, some signals like FM could be considered DSB but not AM (although this isn't common usage).

In common amateur parlance, however,

"AM" usually means AM with two sidebands and carrier.
"DSB" usually means AM with two sidebands and suppressed carrier
"SSB" usually means AM with a single sideband and suppressed carrier

When I was tuned to the 3rd harmonic sometimes
I would hear it and sometimes not.
It would come and go rather abruptly. It didn't seem
to be gradual fading.

I think you are confusing *single* sideband, for which that is correct,
and *double* sideband (which we were discussing), for which it is not
true.

Doing it that way will work, but it's not "fair", because you are not
actually demodulating a DSB signal (which was the subject of the
discussion).

Um, actually, it has a lot more than that. A carrier FM modulated by a
single sine wave has an infinite number of sidebands. If the modulating
signal is more complex, then things get really complicated.

Sky Captain,

While the "Freeplay Plus" Radio may do very well
or even better than the Sony ICF-SW7600GR Radio
on the AM/MW Band.

It's Analog Mechanical Tuning would simply not be
as easy to use as the Sony's Digital Tuning for
Shortwave Listening (SWL).

* Two Shortwave Bands covering 3.0 to 18.1 MHz :
Would require a 'fine tuning touch' to pick-out many
of the Broadcasters that you could easily Key-in on
the Sony by using the Digital Frequency Display.

Naturally the "Freeplay Plus" Radio with a larger
speaker would be the better Radio to 'Listen To'.
But the Sony with a set of self-powered Speakers
would easily be it equal or better : Especially for
FM Stereo Radio Listening.

The resolution bandwidth of the human ear is non-zero

Hi Joe,

First, let me say I've read your posts for a long time and have tremendous respect for your contributions to the shortwave hobby, as well as your technical knowledge, civility, and politeness--qualities that seem to be in short supply on this board.

That said, I notice you don't own one of the newer Freeplay models. While the the Lifeline may be hard to find, the Plus can be purchased from both Universal and CCrane. Although both sets were designed as emergency radios, they deliver great audio with pretty decent sensitivity to weak SW signals. Of course, neither has direct digital frequency readout or PLL, but the Plus does have a SW fine tuning knob. I recommend you buy the Plus and use it with an ac adapter; you'll be pleasantly surprised.

Regarding my Sony 7600GR, it's just a mediocre radio with a number a bells and whistles built in. To answer Telamon's concern, I do have the DX (news) switch on. I've checked and rechecked all the controls and everything seems to be working correctly, but SW signal sensitivity is weak. Also, there is an annoying background hum, especially when I listen to a strong station, like EWTN. Actually my G version performed much better but was plagued with a major problem: it kept turning itself on and off on its own. I bought the G from EEB in Vienna, Va in 1996 and the GR from Universal in 2005. I've never had any problems with either company. I don't doubt your experiences with Sony have been much more positive; I can only share my own story.

Thanks again for all you do, Joe.

What do you propose the term be for the output of a slightly de-tuned

I don't believe the OP stated whether the DSB signal was with or without
carrier. If without carrier, demodulation is certainly called for. If with
carrier, it hardly merits discussion.

Sometimes it's difficult to communicate. A "set" can consist of more
than one. In the case of FM, each set includes an infinite number,
although only a limited number contain a significant amount of energy.
The remainder can be ignored without any substantial degradation of
received signal quality. This is true regardless of the complexity of
the modulating signal.

I have received an updated
engineering version of the R-301, based on mine and a
few other's feedback the engineer fine tuned a few
details and I found it sounds better to my ears. My
reference sysmtem is a Grundig T-9000 tuner, a Sansui
AU-D907G aplifier and a pair of Celestion MP1
speakers. Since I only got the control box of R-301 I
compared it in mono only, the bass and treble are set
to nutral position in the R-301 and the tone control
on AU-D907 is disabled. Compared to the reference
system, R-301 has the same transparent sound, bass is
effortless, mellow and warm in the mid range, a little
bit darker in treble but details is still present. The
engineer commented he deliberately made the treble
darker to give a vintage feeling, the tone control

will allow users to fine tune the sound.

In the reception side, R-301 received all local FM stations
clearly using the built-in attena, in AM band R-301
has good reception on local stations, background noise
is lower than a few modern portable radios I own.

Oops Captain, that's the tone switch.
Check the ATT-switch!
Or adjust the attenuation wheel (minimum).
You find both of them on the left-hand side of your 7600GR.

The 7600G[R] is a small radio and so has a small internal loop. Its AM reception can be vastly improved by putting it next to a MW loop (like the Terk loop). It's not bad, but it can be improved, as can even the vaunted 2010 by a MW loop.

But the selectivity of the 7600GR, and the ability to use a sideband to get away from adjacent channel interference, make it better for DX than even the large good radios like the GE Superradios, once you add the loop.

It's also improved if you don't have the attenuation switch on. WJR ought to sound like a local on every radio.

(The 2010 is even better because its synch detection is quieter and works discreetly on weak signals.)

I own a genuine made in 1957 Grundig AM/FM/Shortwave/Phonograph wooden cabinet floor model radio, I believe the radio was actually manufactured by Telefunken.I bought the radio for fourteen American dollars at the old Goodwill thrift store that used to be on Palmyra Street in Jackson, about four and a half miles East of doggy's couch.The radio does work, but it needs tuning up or something.Not for sale or trade for love or money.I also own a big Telefunken wooden cabinet AM/FM/Shortwave table model radio I bought for four American dollars at that same Goodwill store.I don't know if the radio works, I need a polarized cord for the radio, where the cord plugs into the jack on the back of the radio.Maybe someday I might try the radio out.

Well, another of your half-assed answers. You can receive *DSB-RC* on any AM receiver because the carrier, although reduced, allows reception via a simple envelope detector. On the other hand, DSB-SC requires a product detector, a coherent detector or a Costas Loop, detectors NOT available on "any" AM receiver. So, yet another "half-an-answer" on your part.

A person asks about "a", *you* give them an answer to "b", then accuse -them- of being on drugs and say -they- are ill-suited to be here. May I suggest that you look in the mirror if you are concerned about suitability...

Your thought processes and (lack of) logic seem quite odd. Odd enough to question who the drug user might be.

Don,

I believe you are misinterpreting or misunderstanding what I wrote--and
my apologies if I wasn't clear enough in my statement above. Let me
clarify...

I was NOT confusing FCC use codes and technical processes. I made two
separate, *stand-alone* statements:

Statement 1 (re: technical processes)--low level balanced modulator
vs.high level plate modulation. A true statement.

Statement 2 (re: FCC emission designators)-- that the FCC had different
emission designators for AM, DSB-SC and DSB-RC *BACK IN THE DAY*. A true
statement.

By "back in the day", I was referring to the late 50s and early 60s when
sideband (of all varieties) was just coming in to usage in the ham radio
world. Everything was so new that SSB hadn't yet emerged as the mode of
choice. Some rigs back then were capable of both SSB and the two flavors
of DSB. The FCC (AT THAT TIME--"back in the day") had designators for
all of the above. The FCC emission designators have changed at least
once (and maybe more) since those days.

In any event, they were meant to be two stand-alone statements, with
-no- implication intended that the designator tells how to do it. So,
either you need to read more carefully, I need to write more carefully
or all of the above... :-)

I'm not sure it has a name. The output is constantly swishing around
between AM and PM, at a rate determined by the frequency error of the
reinjected carrier. Most detectors will have a problem with it.

Let's not get too far off the subject here. We were discussing whether
the "tuning beat" that you use to tune a musical instrument involved a
nonlinear process (ie. "modulation"). I said that it does not, and that
it could be detected by instrumentation which was proveably linear (i.e.
not "perfectly" linear, because that's not required, but certainly
linear enough to discount the requirement for "modulation").

That's all.

Yes, because the output signal varies in amplitude with modulation. For suppressed carrier SSB or DSB, the output is zero when there's no modulating signal, while for "traditional AM", the output is 50% for no modulation.

Compare to FM or PM, where the output is constant regardless of the modulation level. True, FM has a lot of sidebands that vary in amplitude, but if you add them all together, the output is constant.

Run an SSB, DSB, or AM rig into a dummy load and it'll get hotter with modulation, while with FM the temperature won't change.

--

But recall that if you take that DSB signal you got by multiplication, and reinject the carrier in quadrature, you no longer have amplitude modulation.

They're probably going to have a somewhat newer (say largely '70's) oldies and there's some question as to whether they're going to be able to get Cousin Brucie Morrow, king of the old WABC back from satellite radio where he went after he was fired by CBS when they dumped oldies.

I notice that this is one of several cases where oldies have come back - CHUM (AM) tried a sportstalk network, and a CBS-owned station now calling itself KFRC just pushed a Free FM format to AM in San Francisco.

The IC-R7000 is unmatched in scanning and coverage versatility. AM, AM-W, FM, FM-W, FM-N, USB and LSB. The R7000 covers nearly 2000 MHz of spectrum to include low band, VHF civil and military aeronautical bands, marine, business, FM, amateur, government and TV bands. 99 memories store frequency and mode and may be selected by simply pressing the memory switch, then rotating the memory channel knob or by direct keyboard entry. Scan modes include full-scan, programmed-scan, mode-scan, selected-scan, priority-scan and auto write programmed-scan. By depressing the Auto-M switch, the receiver automatically memorizes frequencies in use while the unit is in the scan mode. Modes include: FM-Wide, FM-Narrow, AM, USB and LSB. Six tuning speeds: 0.1, 1.0, 5, 10, 12.5 or 25 kHz.
The set is in PERFECT CONDITION! $600.00

Then linearity is at the core of the matter.
What does "linear" (or "nonlinear") mean to you?

No nonlinearity is necessary in order to hear

An audible beat tone is produced by the constructive and destructive
interference between two sound waves in air. Look at a pictorial
representation (in the time domain) of the sum of sine waves,of similar
amplitudes, one at, say, 1000 Hz and the other at 1005, and you'll
see it.

Especially if the RF field is strong, there are a lot of mechanisms
which can create harmonics after the signal leaves the transmitter --
rusty fencing, or tooth fillings, for example. I can see how one of
those could be intermittent.

As I suspected -- just different words for the same thing.

So:

>> It looks to me that the tripple frequency sidebands
>> are there but the basic sidebands dominate.
>> Especially at lower modulation indexes.

With well-designed gear (or theoretically), for AM there will be no
other frequencies present except for the carrier and the ones

represented by the Fourier spectrum of the modulation -- one set either side of the carrier. That is only true, of course, as long as there is no overmodulation; that creates a *lot* of other junk, because there are periods where the carrier is entirely cut off.

So I still don't understand what you mean by "triple frequency sidebands" or "basic sidebands".

As I said in another post, modulation is a "rate effect", so there never should be any frequencies generated at multiples of the sidebands surrounding the fundamental; instead they are always identically as far from the harmonics as they are from the fundamental. Is that what you are calling "triple frequency sidebands"?

WHAT WAS "RADIUM'S" ORIGINAL QUESTION ?
-and- HAS IT BEEN ANSWERED ?

Hi:

Please don't be annoyed/offended by my question as I decreased the modulation frequency to where it would actually be realistic.

I have a very weird question about electromagnetic radiation, carriers, and modulators.

Is it mathematically-possible to carry a modulator signal [in this case, a pure-sine-wave-tone] with a frequency of 20 KHz and an amplitude of 1-watt-per-meter-squared on a AM carrier signal whose frequency is 10^-(1,000,000,000-to-the-power-10^1,000,000,000) nanocycle* every 10^1,000,000,000-to-the-power-10^1,000,000,000 giga-eons and whose amplitude is a minimum of 10^1,000,000,000-to-the-power-10^1,000,000,000 gigaphotons per 10^-(1,000,000,000-to-the-power-10^1,000,000,000) nanosecond?

If it is not mathematically-possible, then please explain why.

10^-(1,000,000,000-to-the-power-10^1,000,000,000) second is an extremely short amount of time. 10^-(1,000,000,000-to-the-power-10^1,000,000,000) nanosecond is even shorter because a nanosecond is shorter than a second.

Giga-eon = a billion eons

Eon = a billion years

*nanocycle = billionth of a cycle

Gigaphoton = a billion photons

10^1,000,000,000-to-the-power-10^1,000,000,000 -- now that is one large large number.

10^1,000,000,000 = 10-to-the-power-1,000,000,000

So you get:

(10-to-the-power-1,000,000,000) to the power (10-to-the-power-1,000,000,000)

10^-(1,000,000,000-to-the-power-10^1,000,000,000) = 10^-(10-to-the-power-1,000,000,000)-to-the-power-(10-to-the-power-1,000,000,000)

10^-(10-to-the-power-1,000,000,000) to the power (10-to-the-power-1,000,000,000) is an extremely small number at it equals 10-to-the-power-NEGATIVE-[(10-to-the-power-1,000,000,000) to the power (10-to-the-power-1,000,000,000)]

No offense but please respond with reasonable answers & keep out the jokes, off-topic nonsense, taunts, insults, and trivializations. I am really interested in this.

Thanks,

Radio Free Chosun, 9785, most likely the one heard here at 2000 s/on in Korean directed to North Korea via Taiwan.

Very weak signal.

EiBi shows another clandestine, Radio Free North Korea, using 9785 beginning at 2030.

For the simple reason that there isn't actually a "tone" involved -
in other words, there is no actual signal at the difference frequency.
There can't be, since there is no "mixing" (multiplication) of the
two original tones. The "beat" is really just the perception of
the amplitude variation caused by the interference previously
mentioned. You cannot sense such variations if they occur
rapidly enough, any more than you can detect the flicker of a
light source which is varying rapidly enough.

That's easy. Radium has never actually had an original question. All of his questions are either rehashing very well-understood situations, or are utterly nonsensical and therefore not answerable AS legitimate questions.

I'm especially envious of the beautiful Alligator handbag Cuhulin sent
you last year. It was in return for 'favours' you provided on that
Holiday weekend in Mississippi.

Remember? He still wears the bras you gave him. He posts here about it
regularly.

I'm afraid that while you were a sensuous little deviation for him,
there is no swaying him from his bestial course. You will NEVER be able
to compete for Cuhulin's affections when the other woman is a German
Shepherd..

Time to move on, Acehole. The Cuhulin train's done left the station..

What you should be hating is the complete collection of low lifes on both sides of the political spectrum who have made Representative Democracy a complete joke...and not just in the States.

Pretty ordinary stuff, I'll admit. I should have been a bit clearer in my reason for posting. It's always interesting to see how the same signal is being received at different locations at the same time. The ionosphere is a very fluid reflector.

What exactly does that mean? The only thing I ever wondered about was your selective 'censoring' of OT posts. If you have to do it, then get ALL of them.

There is also NO need to repost the entire idiotic spam...but you already know that.

Congratulations..you just added to the garbage on six other newsgroups. Please trim the non applicable groups in the future.

If the President can do that to CITIZENS, just imagine what Cuhulin did to the Ace last summer..The mind reels...

Visions of the Ace pleading the Fifth..."Please, get me another bottle...For G_d's sake..I've got the shakes"

Unbeknownst to the Ace, giving him the shakes was all part of the deviant Cuhulin's master plan for degenerate lust filled kicks. As close as Cuhulin could get to formulating a plan, anyway..

And now you know the whole story.

There is no multiplication of 1000 Hz and 1005 Hz
either, is there? Why don't you hear 1000 Hz and
1005 Hz rather than a single tone varying in amplitude?

I have.
I tuned to the third harmonic of a strong local
AM broadcast station. There it was. Quite
a surprise. It is a bit distorted but intelligible.
Another odd thing is that it comes and goes
somewhat abruptly.

Also a case of conjecture. Never proven. Never disproven.

Such is the nature of a public accusation, followed by a great deal of media release, and then dropped charges....nothing ever has to be proven. Nothing can ever be denied. And the stain on the accused's name can never be removed. From that point everything done by either party must become a show for the media.

Also a well played political move on the part of a Democrat DA, whose supporters have admitted pressuring him into the case to get Rush out of the neighborhood.

Like the GWB cocaine implication, I suspect there is far less to the story than has to date been stated, or implied.

And in the Rush case, the star 'witness' admitted to selling her story by the tabloids prior to being approached by the authorities. Though I believe Rush when he admits to the addiction, and believe that he's not lightning white, the handling of the accusation and the nature of the claims of the witness point to more manufacture than fact.

OK, if you insist -- *in this case* it means "linear enough to not
produce IM products of significant amplitude".

As the phase of the two nearly equal waves move past each other, there
is simple vector summation which varies the amplitude.

Consider two sine waves of precisely the same frequency, where one of
them is adjustable in phase -- use a goniometer, for instance. Use a set
of resistors to sum the two signals, and observe the summing point with
a 'scope or a loudspeaker. By altering the phase of one source, you can
get any amplitude you want from zero up to twice the amplitude of either
one.

Now just twiddle that phase knob around and around as fast as you can.

You've just slightly altered the instantaneous frequency of one of the
generators (but only while you twiddle), and accomplished pretty much
the same effect as listening to the beat between two guitar strings at
nearly zero frequency offset. With no nonlinear processes in sight.

No. Humans had to evolve to incorporate a non linear response to sound when the electronics manufacturers started supplying ONLY non linear potentiometers for audio equipment use.

This mutation, which is now the norm, was completely unknown before the start of the twentieth century.

Havana on 11760 coming in nice and clear. Slight drifting in signal.

This seems like a higher than normal frequency for this time of day..I'm at 23:17 Mountain daylight, and usually get the best reception at lower frequencies.

I was a fool to follow in dxAce's footsteps after he posted an article concerning A politician's drunken child. The guy Ace is SICK and I should NEVER have followed his example.

Thank you for pointing out the error of my ways.

Do you believe Ace is a step away from child pornography because of his addiction to Politician's Drunken Children news articles? Was he exploiting an innocent child for Political gain?

I beg to differ. There's no mixing happening in the air. compression of air is very linear (Boyles Law or PV=constant). If there were mixing, you would be able to hear the beat note when one generates two ultrasonic tones. I belch 25KHz and 26KHz from two transducers, by our logic, air mixing would create a 1KHz beat note. It doesn't and you hear nothing.

What seems to be the problem here is the model of the human ear is not what one would assume. It is NOT a broadband detector. The cochlea cilia (hairs) resonate at individual frequencies. Each one resonantes at only one frequency (and possibly some sub-harmonics). Therefore, the human ear model is a collection of narrow band filters and detectors. Unless the two frequencies involved both cause a single cilia to simultaneously vibrate at both frequencies, there isn't going to be any mixing. Each detector can be individually quite non-linear, but as long as it vibrates at only one frequency, there isn't going to be any mixing.

Meanwhile, I would greatly appreciate it if everyone would kindly trim quotations. This thread is becoming difficult to read. Thanks.

ADDENDUM :

After reading "TK - Personal Carbon Credits" on eBay
one begins to wonder -if- Instead of trading in you old
used Car of Truck {pre-1980s is best} you could sell
it Carbon Credits and simply let it rust away in the
backyard. Would the next 3-15 Years of it not polluting
the Air that we breath {Carbon Credits} be more valuable
to you then the Cash-for-your-Trade-In ?

The Yearly Annual Carbon Credits for a Pre-1980s
Made-in-America Car or Truck could be worth their
weight in Gold -cause- these were Mega Polluters
by Today's Clean Air Standards : Three to 15 Years
of these Credits could add up to a Sizable Amount
of Money to Bank-on Year after Year.

Clearly buying Pre-1980s Gas Hogs could be a new
Carbon Credit Gold Mine with Acres of Rusting Cars
and Trucks not Polluting Year-in and Year-out : Think
of the Gas and Oil that would Save and the Tons of
Pollution that would not be created. The only Limiting
Factor is the dwindling supply of running Pre-1980s
Cars and Trucks. For there to be a Credit the Car or
Truck would have to be in Running {Polluting} Condition.
One Acre of Land could easily support 200 Carbon
Credit Producing Units -valued at- Hundreds if not
Thousands of Dollars Annually.

this could be a real growth industry in the 'usa' for
made-in-america cars and trucks who were the
king of gas guzzlers in the pre-1980s

The entire carbon credit scam was developed in order to allow continued
and increased emissions by the guilty parties.

It's not even a band aid solution..more like smoke and mirrors...very
dirty mirrors.

If you only took your own advice more often, you might get more respect
on this group too. You just don't seem to have the will power to stop
responding to off topic posts. If you can go one week without responding
to a single OT post, you'll be on your way to gaining more respect from
me and probably quite a few others here. If after one week you continue
to refrain from responding to OT posts, you'll never hear another word
of criticism from me. I might even give you some praise for your *on

I don't understand your question. You make it sound as though listening to the big international broadcasters is the only reason someone would buy a communications receiver, when that obviously isn't true. I'm operating on LSB or USB just about 85% of the time and that's true of a lot of folks out there.

Besides, if people have no interest in listening to BCB and SW stations (the big uns) in analog, switching over to HD isn't going to make a difference. If you aren't interested in listening to Alex Jones, how excited will you be to learn that he's now available in HD?

That's what I thought.

I'm assuming (from the fact you call it "AM BCB" and not "MW") that you're in North America.

In which case the majority of AM BCB stations in the USA are NOT going digital within four years. I don't think even Ibiquity, the company pushing the digital conversion, believes it will happen anywhere near that fast.

(many observers, myself included, believe the AM band will *never* convert fully, or even mostly, to digital transmission)

In Canada, digital conversion within the AM band is not yet even authorized. At the rate things are going, your problem in Canada won't be that the majority of AM stations have gone digital - it'll be that the majority of AM stations have moved to FM!

There doesn't seem to be much interest in digital radio for SW, as far as consumer interest. For the broadcast bands, DAB has stalled in Canada, interest is slowing in the UK and DAB is such a mess they may try and switch to DAB+, and consumer interest in HD/IBOC is nonexistent in the US. Only about 175, out of 4,500 AM stations have switched to IBOC, and they are almost all HD Radio Alliance stations:

"The FCC Tunes Into HD Radio-And May Turn Off Distant AM"

http://blog.washingtonpost.com/fasterforward/2007/03/the_fcc_greenlights_hd_radio_n.html

"RW Opinion: Rethinking AM's future"

"Making AM-HD work well as a long-term investment is seen as an expensive and risky challenge for most stations and their owners. There is the significant downside of potential new interference to some of their own AM analog listeners as well as listeners of adjacent-channel stations."

http://www.rwonline.com/pages/s.0044/t.557.html

Canada is experimenting with FM-HD but will not put up with interference:

"IBOC/HD radio update from CAB"

http://members2.boardhost.com/scrapbook/msg/1183785740.html

Eventually, HD/IBOC will fail from lack of consumer interest.

Good enough.
Then spectrum analyzers and the human auditory
system are not linear.

You put some effort into that. I give you
credit for that.

The socratic thing isn't working, so here
you go.

Is an envelope detector linear? The answer is no.
But how can that be? If you put in a sine wave of
amplitude A you get A volts out (assuming its gain is 1).
If you put in a sine wave of amplitude 2A and you
get 2A volts out. Linear, right?
Now you put in a sine wave of amplitude A at
455 kHz plus a sine wave of amplitude A at
456 kHz. (Consider the envelope detector
of a typical AM radio here.) What do you get out? A
sine wave of amplitude A/2 at 1 kHz. Intermodulation.
An envelope detector is not linear. No envelope/
amplitude detector is linear.

The typical envelope detector is a diode rectifier
followed by a lowpass filter.
The diode rectifier is obviously nonlinear and
gives you all sorts of intermoduation. With a
single sine wave input you get a DC term and
various harmonics of the sine wave. The lowpass
filter filters out all the harmonics and leaves
the DC.
If you put in two sine waves (assuming their
frequencies are above the cutoff of the subsequent
lowpass and their difference is within the
lowpass) again the diode nonlinearity results
in intermodulation. You get a DC component,
the difference frequency, the sum, and various
higher frequencies. The filter leaves only the
difference frequency and the DC. In an AM
receiver the DC is subsequently blocked too.

Do you see how this applies to spectrum analyzers
and the human auditory system?

The logic of it all is astounding. Kinda like arguing that if people
don't like what they're hearing on the radio now, perhaps they'll
start liking it we just turn the volume up really loud. lol

This way of doing it makes a lot of sense. They're shifting over to FM
and leaving a nice quiet MW band behind them. That's sure better than
trashing the MW band all for the sake of a poorly conceived business
venture.

Of course, my guess is we'll just have to wait fo the business venture
to fail officially and then the MW band will be okay again. Still,
it's the principle of the thing...

Be that as it may, the Republicans are far more talented at
manufacture rather than fact, as per the Swift boatees & that "vast
right wing conspiracy" that followed the Clintons around for eight
years; I'm just waiting for them to get back in gear again... once we

I would appreciate it if you would take the time to list *in detail* any
errors in what I wrote. If it "isn't working", I need to know why,
because I don't like to be confused about things.

That's correct, and I'm well aware of it, but so what?

--dissertation on how an envelope detector works snipped--

Sure. But

1) It is possible -- if not practical -- to build a "detectorless" (in
the nonlinear process sense) spectrum analyzer, and

2) None of it is even remotely significant to the subject at hand.

Here it is again: the "beat" one hears when tuning a guitar or other
instrument does *not* require any nonlinear process for its production.
Period.

In general, that's true, but take a look at what happens in the throats
of high-powered horn loudspeakers. You can find info in e.g. "Acoustics"

Of course not. They're saving you (and everybody else) money by allowing
simple receiver designs -- and that was very important in the 1920's.

Dear "Sky Captain,"

Thank you for your kind comments. I considered buying a Freeplay" Plus
model when I received the latest C. Crane catalog but, frankly, I just
cannot justify the purchase. I already own three crank-only (all made
in South Africa) Freeplays (no internal batteries at all) and, while
they perform well for what they are, they by no means equal the
performance on MW or FM of my GE Superadios, my Sonys, or my Grundig
Satellit 800. (On SW, my Freeplays are mediocre at best.)

Being that the Sonys are the quickest and most convenient radios in my
house, they are the ones I turn to first for casual listening.

Obviously, for more serious listening to MW or SW, I turn to either the Satellit 800 or, far more often, to my AOR AR7030 Plus. But, most of the time, the Sonys perform perfectly well for that which I wish to hear at most times (and that includes moderately-distant MW stations once in a while).

I am quite surprised at your mention of hum with the ICF-SW7600GR. I use NiMH rechargeable batteries with these radios and have never heard any hum on any band. I own a Radio Shack AC Adapter (#273-1758 with #273-1705 adapt-a-plug) and have never heard hum with that either. (I DID hear hum - and a great deal of it - when using Universal Radio's MW 41-680 adapter with this radio.)

I am also surprised at your mention of weak shortwave sensitivity. While there are a number of compact shortwave radios that are more sensitive off the whip than is the '7600GR, this radio is generally not bad. It has a superior dynamic range than most other compact portables - that is why it can handle a more significant antenna without overloading better than most other comparable radios - but, with portables, that means it cannot have "maximum" sensitivity off its own whip. Nonetheless, even without an auxiliary antenna, I have been able to hear major European stations, which are transmitting primarily to the East Coast of NA, from Southern California when I have vacationed there in late August and early September.

I bought two '7600GRs in 2005 from Amazon. I found their construction quality and performance to be identical with that of my previous '7600s (3 GRs and 2 Gs). So, at least from my point of view, their quality has not slipped. And as you already have owned a 'G model for quite a long time, it is obvious that you are familiar with the radio and are not operating it in an incorrect manner.

I can only conclude that you have been the victim of some very bad luck - and that is a shame. I find the Sony ICF-SW7600GR (as well as the G) to be excellent performers on all frequencies to which they tune, especially in view of their low price. And I have found their mechanical construction to be absolutely first-rate. The only major "fly in the ointment" is musical sound quality through the internal speaker. That, of course, is a shame as it has been shown, especially by Eton, that good sound can be obtained from compact portable radios. The Sony has a couple of other design flaws but these are more acceptable, again in view of the radio's low price.

I can understand that you have had problems with your early sample '7600G. This was quite common and very regrettable, especially in view of the fact that Sony did nothing at all for those purchasers who bought poorly-made units.

It is most unfortunate that you appear to have gotten a "bad example" of a Sony ICF-SW7600GR as well!

What can I say? At least you have one radio (and hopefully more) that allows you to hear the stations you desire. It's too bad you've had these bad experiences with your Sonys. I can certainly understand how even one bad experience can put a sour taste in your mouth regarding the products of a particular company (it has happened to me!).

I do not know if Universal Radio will do anything for you at this late date - but it might be worth a telephone call by you, especially since their number is toll-free. They are a good outfit and just might be willing and able to help you as it is my belief that your radio is definitely not operating the way it should. Believe me, the design of this radio (and its construction, at least in my experience with seven different units) is excellent and you should be getting much better performance than you are.

That said, of course I would not expect you to run out and buy another one "just to compare." A bad taste is a bad taste. Two times $150.00 (actually in 1996 the 'G model cost considerably more!) and not getting your money's worth is pretty upsetting! And third time for you might just possibly NOT be the charm!

I really wish there were something I could say that would make you feel better or that would offer something better than "call Universal Radio" as a solution, but I'm afraid there is not.

I do wish you the very best of luck and I hope that somehow you can have your ICF-SW7600GR put into proper working order. If you are able to do so, I'll bet you'll be pleased and amazed with this radio.

Please keep us all informed of your experiences.

Best,

Joe

Because you can't distinguish two tones as separate tones
if they are close enough together in frequency, due to the
way in which the frequency-discrimination process in human
hearing operates.

There are a number of ways in which the human auditory
system is not linear; it's simply that these are not the dominant
cause of the perception of audible "beats."

What am I suppose to look for? I appreciate your recommended research project, but frankly, I don't care what happens inside a high powered horn loudspeaker. I prefer to stay fairly on topic about the original allegation that mixing somehow occurs in open air, which is not true.

Incidentally, if mixing did occur in open air or inside the ear, you would not be able to comfortably listen to hi-fi music, as all you would hear would be intermodulation products.

Nor did I say there was. The phenomenon of interference

You didn't say that. You that a beat note would be produced. From
your posting at:
<http://groups.google.com/group/sci.electronics.basics/msg/f18c6dfefbd55a82>
"An audible beat tone is produced by the constructive and
destructive interference between two sound waves in air."

That's wrong. There's no audible beat note produced in the air.

You can demonstrate it to yourself with a suitable audio spectrum
analyzer and tone generators. I recommend "Visual Analyzer 8"
<http://digilander.libero.it/hsoft/>
Generate two sine waves at any frequencies. Use a cheap microphone to
pickup the audio and display it with the audio SA. You won't see any
sums, differences, or intermodulation products unless you over drive
the microphone or try to produce the tones from a single loudspeaker.

Kindly supply a suitable correction or explanation. I'll gladly
entertain the possibility that I'm wrong.

>That was exactly my point. Please read ALL responses I've
>made re this topic.

My appologies for not reading all of the 269 posting to this thread.
The thread is a classic case of topic drift. I though I would check
the topic de jure and found your posting.

Back in the 1990s, I saw a Freeplay radio sitting on a shelf at the Hudson's discount store in Brandon,Mississippi.(Brandon is about fourteen miles East of doggy's couch) If I halfway remember, I think the Hudson's store price tag/label on that radio was $45.00.I left that radio sitting there.Mainly because it was made in China.Had it been made in Africa, yes, I do believe I would have bought that radio.

DS,

About half of the Canadian population lives close enough to the US
Border to easily hear US Radio Stations if they choose to; and some do
choose to.

"HD" FM Radio Works :
Then the Problem still becomes IBOC on FM and the FM Band going
Digital
"HD" FM Radio makes $ense and is a significant improvement over Analog
FM Radio. With 200 kHz Channel Spacing on the FM the IBOC {Digital}
Side Bands are not a problem.

What needs to be done in the USA is to take one or two of the old VHF
TV Channels and convert it to a new "HD" FM Radio Band where all the
new
Radio Stations are Digital and the first call for these new "HD" FM
Radio Stations goes to AM/MW Radio Stations who wish to convert over
to the new "HD" FM Radio Band. This will Open Up the AM/MW Band for
IBOC to be effective.

"HD" AM/MW Radio Does Not Work {Presently} :
While the AM/MW BCB does not currently show any significant
improvement IMHO where IBOC is concerned to date. For AM/MW IBOC to
work 1/3 to 1/2 of the current AM/MW Radio Stations would have to move

to the FM Band -and-
the AM/MW Band Spacing would have to go to 20 kHz Channel Spacing -to-
mitigate the IBOC {Digital} Side Bands from the Adjacent Channels.

and that's the way i hear it on my 'hd' radio ~ RHF

IBOCISCRAZY,

"HD" FM {Digital} Radio using IBOC works and is a
significant improvement over Analog FM Radio and
makes $ense.

However, the "HD" AM/MW {Digital} Radio using IBOC
does not work and is a questionable enterprise using
the current AM/MW Band Plan.

Dumb fuck - consumers do not have a problem with their analog radios

handful of radio-geeks are the only ones who care. Sales of HD radios
are about zero ! Analog AM/FM works fine and adding more channels of

Canada can do that, because they have FM frequencies available. And because they're accepting 3rd adjacent channels (and in some cases, 2nd adjacents) as usable on FM. The US doesn't. (unless you're a satellite-fed translator.....)

To address other replies...

On FM, one big question will be what happens in outlying suburban areas. Aurora, Illinois; Stamford, Connecticut; Anaheim, California; places like that. Where people are used to listening to the big-city stations from Chicago, NYC, and LA - but there are nearby local stations on 2nd adjacents. Will IBOC receivers have enough selectivity to split WBBM-96.3's HD from WERV-95.9's? (given that both stations' HD carriers will extend halfway into the 96.1 channel)

I used to pooh-pooh the suggestion that ex-TV channels be used for Eureka digital radio. All VHF channels - including 2-6 - are going to be used for digital TV.

But it turns out there are very few DTV stations planned below channel 7. There are only 24 DTVs planned on channel 6, and only eight of them are full power. I would suggest that you *could* assign TV channels 2-6 for use by Eureka DAB stations, with the provision that DAB stations cannot use a TV channel that's in use by a DTV station within, say, 300km, and you'd still have *plenty* of spectrum to provide a full DAB mux (not just a slot on a mux, but a full six-program mux) to everyone.

There is no way the NAB would allow it.

I don't know if it was that wild fire in California, but last week I heard on tv news a big wild fire over there was caused by somebody who let a camp fire get out of control.

A few years ago, Russia offered to loan America one or two of their super water tankers Airplanes, but fed govt turned them down.

Why can't America build some big super water tanker Airplanes like Russia has.

Other countries are NOT pushing for digital, this seems to be mostly a USA thing. If you are in the USA or Canada, chances of you wanting to listen to a 'local'
shortwave station 'should' be very small, most SWL'er try to listen/log stations
as far away as possible or low power hard to 'catch' stations. I'm just guessing,
but low power stations and ones in 3rd world countries, will probably be the LAST
ones to convert to 'digital'.

Besides all that, yep you can wait 4 years and buy a radio then, or buy one now and have
4 years of listening pleasure. (I'm sure in 4 years you could find an excuse, to wait
another 4 years after that too)

The complicated question, at least for me, is this. Suppose K&D do
come through with the KWZ-30/2, and suppose further that it's not
leagues beyond my price range. In that case, do I order one right away
or should I wait to hear some reviews and reports from others who've
ordered them, perhaps even waiting until some of the kinks have been
worked out? It's tricky because the production life of the KWZ-30 was
pretty darned short. Normally I wouldn't even consider ordering an
expensive receiver until a fair amount of time had passed it had
withstood the test of time and use. However, I have the feeling that
if I take this approach with the KWZ-30/2, they might end production
and sell all their inventory before I can even enter a credit card
number on a web form.

On the upside, so far as I know the KWZ-30 didn't have any major
'issues', and if nothing else K&D are competent (and then some) in the
engineering department. This would make it a little easier for me to
be quick on the trigger when (if) the KWZ-30/2 is finally released.

IBOC-IS-CRAZY,

Let me put it into simple Language that you can
understand :

First - "HD" FM {Digital} Radio using IBOC = Good.
* Why - "HD" FM {Digital} Radio using IBOC works and
is a significant improvement over Analog FM Radio and
makes $ense for the FM Radio Broadcaster and the
FM Radio Listener.

Second - "HD" AM/MW {Digital} Radio using IBOC = Questionable
* Why - "HD" AM/MW {Digital} Radio using IBOC does
not work nation wide and is a questionable Business
Enterprise using the current AM/MW Band Plan.

TBL - "HD" Radio using the IBOC Technology will
succeed or Fail based on the acceptance and use
of FM "HD" Radios - with AM/MW Radio as a go
along -or- not.

and that's the way i hear it on my 'hd' radio ~ RHF

Sigh - which, again, is as I explained it further on. I said that
there is no actual component at the "beat" frequency. You do
HEAR a "beat," however, and that is the result of the amplitude
variation caused by the interference, as noted. You cannot hear
the beat effect (I won't use the word "tone" here, which I admit
was a possible source of confusion in the original wording) if the
two original tones are too far apart, simply because you can only
perceive such amplitude variations if they occur below a certain
rate.

I have never ever said that "mixing" (multiplication) occurs in air.
If you're going to pick apart what someone is saying, then please
read everything they've said before starting.

And whether or not you READ all the postings in a thread is one
thing - whether or not you choose to respond to a given posting
out of its context is something else entirely.

>Sigh - which, again, is as I explained it further on. I said that

So, there's no "component" of the "beat" frequency. Well, in my
limited knowledge of what the term "beat" means in RF circuitry, it's
normally used in the context of a multiplicative mixing function, such
as BFO (beat frequency oscillator). Is there some other way to create
a "beat" frequency other than multiplicative (mixing)? I don't know
of any.

Also, what's a "component" of the beat frequency? Is that just one of
the numerous N*F1 +/- M*F1 multiplicative mixer products?

>You do
>HEAR a "beat," however, and that is the result of the amplitude
>variation caused by the interference, as noted.

Interesting. So, using my original example, if I take two ultrasonic
tones, above human hearing, you suggest that I do *HEAR* a beat, but
that there's no actual component at the beat frequency. The does
present a problem because if this is true, then the mixing has to
occurring somewhere in order for my brain to detect the beat
frequency. Is it mixing in my ear, in the cochlea, in the nerves
going to the brain, or in the brain somewhere? I don't think it's any
of these because when I do this experiment, I don't hear any such beat
note.

I'm also having a problem with your use of the term interference. In the present context, I would presume this to be something involving interferometer or quantum wave mechanics. I guess I've been out of the broadcast business for too long.

I did manage to find a nifty Java applet that shows the effects of acoustic interference:
<http://falstad.com/interference/>
It appears to refer to variations in amplitude across the area where both tones are present. What's missing is any reference to any beat note. Certainly additive mixing is present as this is what causes the variations in amplitude. However, I don't see any reference to "beat" notes in any of the articles explaining audio interference phenomenon.
>You cannot hear
>the beat effect (I won't use the word "tone" here, which I admit
>was a possible source of confusion in the original wording) if the
>two original tones are too far apart, simply because you can only
>perceive such amplitude variations if they occur below a certain

I'll make it easy. The difference of the two tones are in the audible range. For example, 25KHz and 26KHz to produce a 1KHz beat note. The amplitude component is certainly there as you demonstrated with your explanation of audio "interference". So, do I hear the 1KHz, or don't I hear the 1KHz? If I hear it, where does the mixing occur?

>I have never ever said that "mixing" (multiplication) occurs in air.
"An audible beat tone is produced by the constructive and destructive interference between two sound waves in air."
How else are you going to produce an *audible* beat note except by multiplicative mixing?

Actually, I have an issue with only one word in the above quotation. It's not audible. Drop that word and it's mostly correct.

>If you're going to pick apart what someone is saying, then please
>read everything they've said before starting.

Actually I did. I read most of the 270 odd articles in this thread, but I ignored any that were obviously a waste of time, such as those consisting of massive quotation with one line of worthless drivel added.

>And whether or not you READ all the postings in a thread is one
>thing - whether or not you choose to respond to a given posting
>out of its context is something else entirely.

Are my comments really out of context? I had issues with much of what was said in this thread. Never mind the topic drift and inane responses. I resisted temptation and did not respond to any of these until someone, in this case you, went off what I consider to be the deep end. I did not question your qualifications, did not send you off on some reading adventure, and addressed your specific statements directly, as I'm doing in this reply.

However, I can do it your way. Your previous reply reeks of
blustering and I would advise you cease and desist.

"At" the beat frequency is what I said; by that, I mean there is no
signal at that frequency. "Component" is commonly used when
speaking in the frequency domain.

> Well, in my
> limited knowledge of what the term "beat" means in RF circuitry,

And you're correct within that context, but remember we're talking
about sound waves in air in the examples being discussed here. Within
THAT context, "beat" is commonly used to refer to the audible wavering
of the perceived sound when two tones are sounded which are very
close in frequency. For instance, when tuning a stringed instrument - a
guitar, let's say - you will often sound the desired pitch by fingering a
string which is already known to be in tune, and then adjusting the string
being tuned by listening for the "beat" between its note and the reference.
As the "beat" slows and eventually vanishes altogether, you know you
have properly tuned that string.

> it's
> normally used in the context of a multiplicative mixing function, such

See above. Different context, different use of the same word.

> Also, what's a "component" of the beat frequency? Is that just one of
> the numerous N*F1 +/- M*F1 multiplicative mixer products?

Again, the phrase was "component AT the beat frequency." Meaning
that, of the total signal being considered (which must always be either
a pure sinusoid itself, or something which can be represented as the sum
of sinusoids), no part of that complete signal is a sinusoid at the "beat"
frequency.

> Interesting. So, using my original example, if I take two ultrasonic
> tones, above human hearing, you suggest that I do *HEAR* a beat,

Not at all - remember, the "beat" in question here is actually just the
low-frequency amplitude variation of the combined signal (which is
the sum of two sinusoids). But if you can't hear a signal at the

frequencies
in question anyway, you certainly can't hear the amplitude variation.
Again, take a look at what this summed signal looks like in the time
domain, and you'll see what I mean.

> I'm also having a problem with your use of the term interference. In
> the present context, I would presume this to be something involving

> the broadcast business for too long.

"Interference" is commonly used to refer to the effect that two signals
have upon each other, esp. when said signals are at similar or
identical frequencies. For example, if two signals are added which are
at the same frequency and amplitude, but 180 degrees out of phase, you
have complete cancellation - which may then be referred to as an example
of "destructive interference." Addition of the same signals but IN phase
would be "constructive interference."

Exactly - and this is the "beat" as that word is used in acoustic or
musical contexts. Again, please keep in mind that we've been discussing
the behavior of sound waves in air, not electrical signals within a
circuit. This would typically not be referred to as "mixing," though,
in any context in which that might be confused with the effects of
multiplication.

You do not hear it, per the above. Thee is no actual 1 kHz tone
generated, but there IS an amplitude variation in the "envelope" of
the combined signal. (You wouldn't hear it even if the signals in
question were within the audible range, as a 1 kHz variation is too
rapid for human perception to detect.)

>>I have never ever said that "mixing" (multiplication) occurs in air.
> "An audible beat tone is produced by the constructive and

I've already said that my use of the word "tone" was a possible source of confusion. There IS, however, an audible effect at the beat rate, if the signals in question are close enough together in frequency. Have you ever tuned an instrument?

> However, I can do it your way. Your previous reply reeks of

Hopefully, you now, at this point, have a different opinion. If not, well, I don't suppose there's much more to be said.

Information about the nonlinearity of air; what else? You said
"compression of air is very linear", but there are situations in
acoustics where it is not.

That was a good recording with the slow fading. The fading made me
wonder about what antenna you were using. You ought to try a vertical
loop antenna for low band night time reception as it might cut down on
the fading.

I'm getting a lot of 'ghost' signals on the Grundig. The AM band tends to repeat a lot in the sub AM broadcast band (Below 500khz). I haven't looked for images elsewhere yet. I've read of birdies being present in the upper ranges, but I haven't had time track down any.

It's probably the antenna overloading it and the ATTN button merely reduces the volume a bit. I need to use the long wire, as using the whip near the computer causes noise. The Ten Tec 320, which is also next to the computer suffers no noticeable noise whatever.

I'm going to try a preselector later on and that should help. It's a PLF-2 model Ameco which has served well on other sets.

The sound is certainly better on the Grundig and the sync lock actually seems to work, which is a plus. As far reception goes, I can't really say yet. The Kenwood (both 1000 and 2000) is pretty good, so the jury is still out.

On a good note, I got lucky with the antenna on the Grundig.
Segments were separated when I bought the thing, with the majority of the things coming out of the radio completely when pulled upwards. Last night I pulled the antenna out again and shook the set in an upside down position.

Two pieces of brass or copper shim stock fell out of the lowest antenna piece, which was in the radio. There were small dimples in the pieces. A quick look showed that they lined up with small holes in the antenna shaft, one on each side.

I placed the little semi curved on each side of the removed segment, with the dimples in the holes and proceeded to re-insert the detached segments back into the set. When the brass pieces went past the rolled lip in the recipient segment, they magically locked the antenna together again.

All is well.

The statement above is true if you leave out the word "tone".
From the example: there's no 222 Hz tone in the air.
In our perception however the 222 Hz tone 'exists'
and that's why we don't have to leave out the word "audible".
Yet, I'd preferred this one:
A beat is produced by the constructive and destructive
interference between two sound waves in air.
To be complete, using the word "tone" referring to 4 Hz
would make the statement misleading because we do not
hear frequences as low as 4 Hz.

Well, try this one.
http://www.ngsir.netfirms.com/englishhtm/Beats.htm

> I'll make it easy. The difference of the two tones are in the audible
> range. For example, 25 kHz and 26 kHz to produce a 1 kHz beat note.

We can hear beat frequencies up to say 15 Hz.
Our auditory organ is not able to follow faster amplitude

variations.
So take another example: 25000 Hz and 25006 Hz.
Again, constructive and destructive interference produce 6 Hz amplitude variations in the air.
But, as we can't hear ultrasonic frequencies, we will not produce a 25003 Hz perception in our brain. So ther's nothing to hear, no tone and consequently, no beat.

And with two very different frequencies within the audible range, for instance 220 Hz and 880 Hz, we here only these two frequencies. No average frequency and no beat.

- Fuck you, HD shill !

IBOC-IS-CRAZY,

I will raise your "Fuck you" - With a "Have a Nice Day"

unless you have made other plans . . . ~ RHF

. . . . . .

Once again FM "HD" Radio seems to work very well.

FWIW - To me the biggest limit on FM "HD" Radio is
the 1% Digital Signal restriction with respect to the
Analog ERP. Were the Digital Signal output increased
to about 4%~8% the Digital Signal Contour and the
Analog Signal Contour should be about the same.

The performance of AM/MW "HD" Radio is 'questionable'.

and that's the way i hear it on my 'hd' radio ~ RHF

The KWZ-30 did have its issues...most notably the internal PSU which failed twice in mine. I believe others had trouble too. I am not going to wait for a KWZ-30/2. Maybe their SDR, KDG-SR100, is more interesting.

The E5 is far more sensitve off just the whip and with external
antennas. I also think the audio out of the E5 just sounds sharper.

Just my opinion,

Mike
